

Visual Mapper - Workstation

Overview If you have maps created with version 5.1-1, 5.2, 5.2-1, or 5.3 of Gentran:Server, you can install the current version of the earlier mapper — the Visual Mapper— to facilitate the transition to the new mapper — the Application Integration Mapper. Installing the Visual Mapper is optional.

These instructions explain how to install the Visual Mapper for Gentran:Server Workstation 6.1. They are a supplement to the *Gentran:Server Workstation Getting Started Guide*. Please refer to that guide for system requirements and all other installation information for Gentran:Server Workstation 6.1.

Installing the Visual Mapper on the Workstation

Introduction To install the Visual Mapper, you run the Windows program setup.exe from the Workstation Visual Mapper installation CD.

Before you begin You must first install the core Gentran:Server Workstation software before you can install the Visual Mapper. See “How to Install Gentran:Server Workstation” in the *Gentran:Server Workstation Getting Started Guide*.

What you need You need the following to install the Visual Mapper on the Workstation:

- ▶ Visual Mapper installation CD
- ▶ Visual Mapper serial number

Procedure Use this procedure to install the Visual Mapper on the Workstation.

Step	Action
1	Close all programs running on your computer.
2	Insert the Workstation Visual Mapper installation CD into the CD-ROM drive of the Windows computer. (Continued on next page)
