# *Connect:Direct OS/400 Version 3.5.00 Maintenance Updates*

The *Connect:Direct OS/400 Version 3.5.00 Maintenance Updates* document supplements Connect:Direct OS/400 version 3.5 documentation. This document describes the issues resolved in the Connect:Direct OS/400 version 3.5 release.

## Maintenance Updates in Version 3.5.00

The following table lists the issues resolved for Connect:Direct OS/400 version 3.5.00. Connect:Direct version 3.5.00 contains all maintenance fixes that were applied to previous versions of Connect:Direct.

| SR Number | Explanation |
|---|---|
| 1060948 | CDLOG and statistics CDSELSTAT command shows compression of 0 although compression was performed. |
| 1064568 | Permanent Session Manager jobs are not being restarted after a MCH3402 error is encountered in a Session Manager. |
| 1064585 | Connect:Direct does not end with a ENDCD command. |
| 1067346 | When SNODENVIRN is equal to OS390, CDRUNJOB results in the error message, CPF0804. |
| 1067778 | PMGR is looping at start up if session limits are exceeded. |
| 1067878 | Unable to delete submitted Processes using a CL command. |
| 1077343 | The WRKSPLMONE command results in the error message, CEE9901. |
| 1085503 | MBCS002E-Function iconv failed. Argument list was too long. |
| 1086933 | An inbound transfer fails with AIPC045I error when TCP/IP buffers are set larger than 64K and the remote node sends an RU size greater then 64K. |
| 1088768 | Some user spaces are not being deleted after normal transfer. |
| 1098821 | CDE0301 error is being issued at the same time the CDLOG shows the copy step completed. |

| SR Number | Explanation |
| --- | --- |
| 1099141 | When an invalid value for COMPRESS is entered in a CDRCV command, the following message appears: *Text not available for message CDK0142 file CDMSGF.* |
| 1124733 | A RUNJOB to an OS/400 node is being submitted twice because a dropped socket occurs when trying to send a positive response back to a remote node. |
| 1127083 | RUNJOBs are going into the Hold queue because user profile JOBD is set to HOLD(*YES) and RUNJOB now uses JOBD(*USRPRF) instead of JOBD(CDJOBD). |
| 1140143 | If Connect:Direct is not shut down every 24 hours, the license key is checked and causes an MCH0601 error resulting in CDPGMR ending and recovering itself. |
| 1140176 | Network map entry only allows up to 65000 instead of 65535 for the transmission buffer size. |
| 1169867 | WRKCDPARM does not change the local node name in the data area, if the local node name is changed. |
| 1182739 | Using an invalid IFS name in FDSN causes MCH0601 and MCH3601 errors. |
| 1183195 | A Connect:Direct UNIX node sends a Process with no name causing a MCH3601 error. |
| 1184807 | A Connect:Direct OS/390 node sends a FMH with no OUID on a DMBATCH when security is not set up and no stage-1 security exit causing a MCH3601 error. |
| 1185435 | CHKOBJ fails on USRSPC after a failed Process CPF0001. |
| 1190264 | Requests a look up capability on Connect:Direct commands on the SNODE. |
| 1203788 | CDSND using SNDFFD(*YES) fails with a MCH3601 error. |
| 1205968 | CDSND using SNDFFD(*YES) fails with AFLH088I if a file is empty because of limits with a _Riofbk() function. |
| 1228084 | Using TEXTFILE(*YES) not writing CRLF in ASCII format. Using 0D25 instead of 0D0A. |
| 1232200 | Invalid Output queue in CDSPLMON causes a job to abend. |
| 1236321 | CDTRACE spool files only show hh:mm:ss on traces. |
| 1236472 | Permanent Session Manager job getting MCH3402 error. |
| 1245382 | Continual display of message, APSM007E, not necessary as users understand that they are not licensed. |
| 1246270 | A TCP/IP timeout on a CDRUNTASK results because RUNTASK Max Time to Wait (RUNTASKTIM) is not being honored over TCP Max Time to Wait (TCPTIMEOUT). |
| 1248876 | Perm Session Manager issues the wrong message if trying to issue COPY to an invalid network map after a previous error. |
| 1251058 | Inbound transfers to a Connect:Direct OS/400 node get an error message MCH3402 at the end of the job. |
