Contents

Chapter 1. Import and Export Issues and Resolutions	1	Chapter 4. Upgrade and Installation Issues and Resolutions	7
Chapter 2. Permissions Issues and Resolutions	3	Chapter 5. User Interface Issues and Resolutions	9
Chapter 3. Service and Adapter Issues and Resolutions	5	Notices	13

Chapter 1. Import and Export Issues and Resolutions

Defect 248999

Issue: When you need to export a large number of partner and/or user configurations for EBICS, if you use the Sterling B2B Integrator Export Resource functionality the system appears to hang.

Resolution: Use the EBICS XAPI to export a large number of partner/user configurations in batches.

Chapter 2. Permissions Issues and Resolutions

Defect 174070

Issue: When you make changes to the subgroups in the **Accounts > Groups > Assign Subgroups** page, the **Assign Permissions** page is not refreshed and the originally selected subgroups are still displayed.

Resolution: Cancel the Groups Settings wizard and provide the proper subgroups when you first set up the group.

Defect 229479

Issue: A user created with all permissions cannot log in.

Resolution: Delete the user that was created with all permissions and create a new user. When creating the new user, do not add either the DS_ADMIN or DS_USER permissions.

Chapter 3. Service and Adapter Issues and Resolutions

Defect 250931

Issue: When you enable or disable the B2B Mail Client Adapter, a message is generated in the servicesctl.log file.

Resolution: The B2B Mail Client Adapter is actually enabled or disabled correctly as you specified, and this log statement can be safely ignored.

Chapter 4. Upgrade and Installation Issues and Resolutions

Defect 250026

Issue: After installation of the Sterling B2B Integrator 5.2.2 patch, errors similar to the following may be seen in the InstallService.log.

Error: No version directories found in installed_data/patch
/components/*/jars/backups.

Resolution: These log messages do not indicate a problem and may be safely ignored.

Defect 249793

Issue: During installation of Sterling B2B Integrator Patch 5.2.2, if you deselect the **Apply schema automatically** checkbox, the installer displays a "fail" error.

Resolution: If you receive a "fail" error after deselecting the **Apply schema automatically** checkbox during the 5.2.2 install, verify that the error did not occur because of a legitimate reason causing the install to fail. If nothing occurred during the install to legitimately cause it to fail, ignore the error and proceed with the rest of the installation process.

Chapter 5. User Interface Issues and Resolutions

Defect 33295

Issue: If you delete a group instance in the user interface and validate the updated document, this will add non-relevant entries to the change report when the instance removed is not the last one in the sequence. If you removed the last instance of the group, then no reshuffling of instances occur and the change report looks normal.

Resolution: These irrelevant entries are notifying you that the sequence data from instances below the one that was removed were moved up into a new instance. The group instance that was removed also appears in the change report as a deleted entry, but this is the only piece of information that should be displayed in the report (the other entries are irrelevant).

Defect 185580

Issue: If you click two times on a list that has only one item in its drop-down menu, it causes the Internet Explorer 7 to crash in some Windows environments.

Resolution: This is an error within Internet Explorer 7. You should not click twice on drop lists or you can upgrade to a newer version of Internet Explorer if you know that this problem is resolved in that version.

Defect 231199

Issue: Opening the XLS preview of a report from the Confirm page of the Report Configuration wizard fails and causes the PDF preview to close if the PDF preview of the report is already open.

Resolution: Ensure that the PDF preview window is not open before opening the XLS preview.

Defect 173550

Issue: When you view the Deprecation Report (by selecting **Admin Console > Operations > Reports**), an unnecessary blank page is displayed.

Resolution: This blank page can be safely ignored.

Defect 192414

Issue: The addLicenseSet.sh script may return the error message "Error '1' refreshing LM".

Resolution: This error occurs if the Sterling B2B Integrator node has never been started. Ensure that the Sterling B2B Integrator node has been started at least once prior to running the script addLicenseSet.sh.

Defect 35191

Issue: When viewing **Advanced Search > Documents**, the same document is displayed more than once. The document details, including the datetime stamp, are exactly the same.

Resolution: The identical documents are the same, and multiples can be disregarded.

Defect 229517

Issue: External Perimeter Server running in High Secure mode gets disconnected if it is Disabled and Enabled through **Operation > System > Troubleshooter > PS Status**.

Resolution: Restart the Perimeter Server and then click **Disable/Enable** in the **Troubleshooter** page. The Perimeter Server will be connected and enabled.

Defect 250408

Issue: In the SiteMap link, the **Sequence Manager** link is displayed under the **Operations** menu and when you are using a non-Oracle database and click this link, a "Processing Error" message is displayed.

Resolution: If you do not use Oracle, do not click the **Operations > Sequence Manager** link, as this will generate an error if you are a non-Oracle user.

Defect 250614

Issue: When creating a user account, if you attempt to create a username with the characters \$ and &, you will receive a warning that you entered an invalid character but those characters will not show in the display of invalid characters.

Resolution: The special characters \$ and & are no longer valid in a user name and should not be used.

Defect 250826

Issue: The following log message may be observed:

```
Got Illegal State Exception DLSS0SessionHash.updateSessionTimeout()
```

Resolution: This is caused by a call to a session that has already ended and can be safely ignored.

Defect 250965

Issue: The following error message is displayed when you select Yes for the query **Block potentially unsafe components from being run** in the GPM.

```
Unexpected exception: java.lang.NullPointerException
```

Resolution: If you receive the query **Block potentially unsafe components from being run** in the GPM, click No for the GPM to function properly.

Defect 229904

Issue: If you change a **Report By** parameter by clicking the link, you must click **Next** for this change to take effect in the Report Configuration.

Resolution: Click **Next** for your change to take effect in the Report Configuration.

Notices

This information was developed for products and services offered in the U.S.A.

IBM® may not offer the products, services, or features discussed in this document in other countries. Consult your local IBM representative for information on the products and services currently available in your area. Any reference to an IBM product, program, or service is not intended to state or imply that only that IBM product, program, or service may be used. Any functionally equivalent product, program, or service that does not infringe any IBM intellectual property right may be used instead. However, it is the user's responsibility to evaluate and verify the operation of any non-IBM product, program, or service.

IBM may have patents or pending patent applications covering subject matter described in this document. The furnishing of this document does not grant you any license to these patents. You can send license inquiries, in writing, to:

IBM Director of Licensing

IBM Corporation

North Castle Drive

Armonk, NY 10504-1785

U.S.A.

For license inquiries regarding double-byte character set (DBCS) information, contact the IBM Intellectual Property Department in your country or send inquiries, in writing, to:

Tokyo 103-8510, Japan

The following paragraph does not apply to the United Kingdom or any other country where such provisions are inconsistent with local law:

INTERNATIONAL BUSINESS MACHINES CORPORATION PROVIDES THIS PUBLICATION "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. Some states do not allow disclaimer of express or implied warranties in certain transactions, therefore, this statement may not apply to you.

This information could include technical inaccuracies or typographical errors. Changes are periodically made to the information herein; these changes will be

incorporated in new editions of the publication. IBM may make improvements and/or changes in the product(s) and/or the program(s) described in this publication at any time without notice.

Any references in this information to non-IBM Web sites are provided for convenience only and do not in any manner serve as an endorsement of those Web sites. The materials at those Web sites are not part of the materials for this IBM product and use of those Web sites is at your own risk.

IBM may use or distribute any of the information you supply in any way it believes appropriate without incurring any obligation to you.

Licensees of this program who wish to have information about it for the purpose of enabling: (i) the exchange of information between independently created programs and other programs (including this one) and (ii) the mutual use of the information which has been exchanged, should contact:

IBM Corporation

555 Bailey Avenue

San Jose, CA 95141-1003

U.S.A.

Such information may be available, subject to appropriate terms and conditions, including in some cases, payment of a fee.

The licensed program described in this document and all licensed material available for it are provided by IBM under terms of the IBM Customer Agreement, IBM International Program License Agreement or any equivalent agreement between us.

Any performance data contained herein was determined in a controlled environment. Therefore, the results obtained in other operating environments may vary significantly. Some measurements may have been made on development-level systems and there is no guarantee that these measurements will be the same on generally available systems. Furthermore, some measurements may have been estimated through extrapolation. Actual results may vary. Users of this document should verify the applicable data for their specific environment.

Information concerning non-IBM products was obtained from the suppliers of those products, their published announcements or other publicly available sources. IBM has not tested those products and cannot confirm the accuracy of performance, compatibility or any other claims related to non-IBM products. Questions on the capabilities of non-IBM products should be addressed to the suppliers of those products.

All statements regarding IBM's future direction or intent are subject to change or withdrawal without notice, and represent goals and objectives only.

All IBM prices shown are IBM's suggested retail prices, are current and are subject to change without notice. Dealer prices may vary.

This information is for planning purposes only. The information herein is subject to change before the products described become available.

This information contains examples of data and reports used in daily business operations. To illustrate them as completely as possible, the examples include the names of individuals, companies, brands, and products. All of these names are fictitious and any similarity to the names and addresses used by an actual business enterprise is entirely coincidental.

COPYRIGHT LICENSE:

This information contains sample application programs in source language, which illustrate programming techniques on various operating platforms. You may copy, modify, and distribute these sample programs in any form without payment to IBM, for the purposes of developing, using, marketing or distributing application programs conforming to the application programming interface for the operating platform for which the sample programs are written. These examples have not been thoroughly tested under all conditions. IBM, therefore, cannot guarantee or imply reliability, serviceability, or function of these programs. The sample programs are provided "AS IS", without warranty of any kind. IBM shall not be liable for any damages arising out of your use of the sample programs.

Each copy or any portion of these sample programs or any derivative work, must include a copyright notice as follows:

© IBM 2013. Portions of this code are derived from IBM Corp. Sample Programs. © Copyright IBM Corp. 2013.

If you are viewing this information softcopy, the photographs and color illustrations may not appear.
