STERLING COMMERCE SOFTWARE

*****TRADE SECRET NOTICE*****

THE STERLING COMMERCE SOFTWARE DESCRIBED BY THIS DOCUMENTATION ("STERLING COMMERCE SOFTWARE") IS THE CONFIDENTIAL AND TRADE SECRET PROPERTY OF STERLING COMMERCE, INC., ITS AFFILIATED COMPANIES OR ITS OR THEIR LICENSORS, AND IS PROVIDED UNDER THE TERMS OF A LICENSE AGREEMENT. NO DUPLICATION OR DISCLOSURE WITHOUT PRIOR WRITTEN PERMISSION. RESTRICTED RIGHTS.

This documentation, the Sterling Commerce Software it describes, and the information and know-how they contain constitute the proprietary, confidential and valuable trade secret information of Sterling Commerce, Inc., its affiliated companies or its or their licensors, and may not be used for any unauthorized purpose, or disclosed to others without the prior written permission of the applicable Sterling Commerce entity. This documentation and the Sterling Commerce Software that it describes have been provided pursuant to a license agreement that contains prohibitions against and/or restrictions on their copying, modification and use. Duplication, in whole or in part, if and when permitted, shall bear this notice and the Sterling Commerce, Inc. copyright notice.

U.S. GOVERNMENT RESTRICTED RIGHTS. This documentation and the Sterling Commerce Software it describes are "commercial items" as defined in 48 C.F.R. 2.101. As and when provided to any agency or instrumentality of the U.S. Government or to a U.S. Government prime contractor or a subcontractor at any tier (Government Licensee), the terms and conditions of the customary Sterling Commerce commercial license agreement are imposed on Government Licensees per 48 C.F.R. 12.212 or 227.7202 through 227.7202-4, as applicable, or through 48 C.F.R. 52.244-6.

These terms of use shall be governed by the laws of the State of Ohio, USA, without regard to its conflict of laws provisions. If you are accessing the Sterling Commerce Software under an executed agreement, then nothing in these terms and conditions supersedes or modifies the executed agreement.

1 Introduction

1.1	Why Software	1
1.2	Configurations For Printing Documents.....	2
1.2.1	Choosing Label Formats	2
1.2.2	Choosing the Printer	3
1.2.3	Configuring Printers.....	3
1.2.3.1	In the Software Print Server.....	3
1.2.3.2	In the Sterling nWMS PCA	3
1.3	Sterling nWMS PCA Prints.....	4
1.3.1	Inbound Prints	4
1.3.2	Inventory Prints	5
1.3.3	Outbound Prints	5

2 Inbound Prints

2.1	License Plate Label	9
2.1.1	Layout	9
2.1.2	Typical Preferences.....	10
2.1.3	Default Preferences	11

2.1.4	Print Size	11
2.1.5	Printer Type	11
2.1.6	Print Time	11
2.1.7	Print Location	11
2.1.8	Print Documents	12
2.1.9	Label Formats	12
2.1.10	Print Service	15
2.1.11	Printing Manually	15
2.1.12	Additional Setup Required	20
2.2	Putaway Task List	21
2.2.1	Layout	21
2.2.2	Typical Preferences	23
2.2.3	Default Preferences	23
2.2.4	Print Size	24
2.2.5	Printer Type	24
2.2.6	Print Time	24
2.2.7	Print Location	24
2.2.8	Print Document	25
2.2.9	Label Formats	25
2.2.10	Print Service	27
2.2.11	Printing Manually	27
2.2.12	Additional Setup Required	28
2.3	Receiving Worksheet	29
2.3.1	Layout	29
2.3.2	Typical Preferences	31
2.3.3	Default Preferences	31
2.3.4	Print Size	31
2.3.5	Printer Type	31
2.3.6	Print Time	32
2.3.7	Print Location	32
2.3.8	Print Documents	33
2.3.9	Label Formats	33
2.3.10	Print Service	36
2.3.11	Printing Manually	36
2.3.12	Additional Setup Required	37

3 Inventory Prints

3.1	Count Sheet	40
3.1.1	Cycle Count Sheet.....	40
3.1.1.1	Layout	40
3.1.1.2	Typical Preferences.....	42
3.1.1.3	Default Preferences	42
3.1.1.4	Print Size	42
3.1.1.5	Printer Type	43
3.1.1.6	Print Time	43
3.1.1.7	Print Location	43
3.1.1.8	Print Documents	44
3.1.1.9	Label Formats.....	44
3.1.1.10	Print Service.....	46
3.1.1.11	Printing Manually	46
3.1.1.12	Additional Setup Required	47
3.1.2	Physical Count Sheet	47
3.1.2.1	Layout	47
3.1.2.2	Typical Preferences.....	49
3.1.2.3	Default Preferences	49
3.1.2.4	Print Size	49
3.1.2.5	Printer Type	49
3.1.2.6	Print Time	50
3.1.2.7	Print Location	50
3.1.2.8	Print Documents	50
3.1.2.9	Label Formats.....	51
3.1.2.10	Print Service.....	53
3.1.2.11	Printing Manually	53
3.1.2.12	Additional Setup Required	54
3.2	Hazmat SKU Label.....	55
3.2.1	Layout	55
3.2.2	Typical Preferences.....	56
3.2.3	Default Preferences	56
3.2.4	Print Size	56
3.2.5	Printer Type	56
3.2.6	Print Time	56

3.2.7	Print Location	57
3.2.8	Print Documents	57
3.2.9	Label Formats	57
3.2.10	Print Service	59
3.2.11	Printing Manually.....	59
3.2.12	Additional Setup Required	60
3.3	Replenishment Task List.....	61
3.4	Retrieval Task List	62
3.5	UPC Case Code Label	63
3.5.1	Layout	63
3.5.2	Typical Preferences.....	63
3.5.3	Default Preferences	64
3.5.4	Print Size	64
3.5.5	Printer Type	64
3.5.6	Print Time	64
3.5.7	Print Location	64
3.5.8	Print Documents	65
3.5.9	Label Formats	65
3.5.10	Print Service	67
3.5.11	Printing Manually.....	67
3.5.12	Additional Setup Required	67

4 Outbound Prints

4.1	Carrier Labels	71
4.2	Cart Manifest Task List.....	72
4.2.1	Layout	72
4.2.2	Typical Preferences.....	74
4.2.3	Default Preferences	75
4.2.4	Print Size	75
4.2.5	Printer Type	75
4.2.6	Print Time	75
4.2.7	Print Location	75
4.2.8	Print Documents	76
4.2.9	Label Formats	76
4.2.10	Print Service	78

4.2.11	Printing Manually	78
4.2.12	Additional Setup Required	79
4.3	Certificate of Origin	80
4.3.1	Layout	80
4.3.2	Typical Preferences.....	84
4.3.3	Default Preferences	85
4.3.4	Print Size	85
4.3.5	Printer Type	85
4.3.6	Print Time	85
4.3.7	Print Location	85
4.3.8	Print Documents	86
4.3.9	Label Formats.....	86
4.3.10	Print Service.....	89
4.3.10.1	Print Service for Shipments	89
4.3.10.2	Print Service for Load	90
4.3.11	Printing Manually	90
4.3.11.1	Certificate of Origin for Shipments.....	90
4.3.11.2	Certificate of Origin for Loads.....	91
4.3.12	Additional Setup Required	91
4.4	Combined Picking and Packing Slip	92
4.4.1	Layout	92
4.4.2	Typical Preferences.....	95
4.4.3	Default Preferences	95
4.4.4	Print Size	95
4.4.5	Printer Type	95
4.4.6	Print Time	96
4.4.7	Print Location	96
4.4.8	Print Document.....	96
4.4.9	Label Formats.....	97
4.4.9.1	Combined Picking and Packing Slip for Single Page	97
4.4.9.2	Combined Picking and Packing Slip for Multiple Pages.....	99
4.4.10	Print Service.....	101
4.4.11	Printing Manually	101
4.4.12	Additional Setup Required	102
4.5	Commercial Invoice	103

4.5.1	Layout	103
4.5.2	Typical Preferences.....	108
4.5.3	Default Preferences	108
4.5.4	Print Size	108
4.5.5	Printer Type	108
4.5.6	Print Time	108
4.5.7	Print Location	108
4.5.8	Print Documents	109
4.5.9	Label Formats.....	109
4.5.9.1	Commercial Invoice for Single Page	109
4.5.9.2	Commercial Invoice for Multiple Page	111
4.5.10	Print Service.....	111
4.5.10.1	Commercial Invoice for Shipments.....	111
4.5.10.2	Commercial Invoice for Load.....	112
4.5.11	Printing Manually.....	112
4.5.11.1	Commercial Invoice for Shipments.....	112
4.5.11.2	Commercial Invoice for Loads	113
4.5.12	Additional Setup Required	113
4.6	Item Pick Task List	114
4.6.1	Layout	114
4.6.2	Typical Preferences.....	116
4.6.3	Default Preferences	117
4.6.4	Print Size	117
4.6.5	Printer Type	117
4.6.6	Print Time	117
4.6.7	Print Location	117
4.6.8	Print Document	118
4.6.9	Label Formats.....	118
4.6.10	Print Service.....	120
4.6.11	Printing Manually.....	120
4.6.12	Additional Setup Required	121
4.7	LTL Manifest	122
4.7.1	Layout	122
4.7.2	Typical Preferences.....	124
4.7.3	Default Preferences	124

4.7.4	Print Size	124
4.7.5	Printer Type	124
4.7.6	Print Time	124
4.7.7	Print Location	125
4.7.8	Print Documents	125
4.7.9	Label Formats.....	125
4.7.10	Print Service.....	127
4.7.11	Printing Manually	127
4.7.12	Additional Setup Required	128
4.7.13	Hazmat Manifest	128
4.7.13.1	Layout	128
4.8	Multi-SKU UCC-128 Container Shipping Label.....	131
4.8.1	Layout	131
4.8.2	Typical Preferences.....	133
4.8.3	Default Preferences	134
4.8.4	Print Size	134
4.8.5	Printer Type	134
4.8.6	Print Time	134
4.8.7	Print Location	134
4.8.8	Print Document.....	135
4.8.9	Label Formats.....	135
4.8.10	Print Service.....	137
4.8.10.1	Print Service for Shipments	137
4.8.10.2	Print Service for Container.....	137
4.8.11	Printing Manually	138
4.8.11.1	Multi-SKU UCC-128 Container Shipping Labels for Shipments	138
4.8.11.2	Multi-SKU UCC-128 Container Shipping Labels for Container	139
4.8.12	Additional Setup Required	139
4.9	North American Free Trade Agreement Certificate of Origin.....	140
4.9.1	Layout	140
4.9.2	Typical Preferences.....	146
4.9.3	Default Preferences	146
4.9.4	Print Size	146
4.9.5	Printer Type	146
4.9.6	Print Time	146

4.9.7	Print Location	146
4.9.8	Print Documents	147
4.9.9	Label Formats	147
4.9.10	Print Service	149
4.9.10.1	Print Service for Shipments	149
4.9.10.2	Print Service for Load	149

Index

Preface

This manual explains the prints that can be generated using the Sterling nWMS PCA.

Intended Audience

This manual provides information for individuals responsible for implementing the Sterling nWMS PCA.

This manual is also useful for individuals using the Sterling nWMS PCA prints, such as, warehouse managers, receiving supervisors, inventory supervisors, and shipping supervisors.

Structure

This document contains the following chapters:

Chapter 1, "Introduction"

This chapter introduces the prints provided with the Sterling nWMS PCA.

Chapter 2, "Inbound Prints"

This chapter explains the inbound prints provided with the Sterling nWMS PCA.

Chapter 3, "Inventory Prints"

This chapter explains the inventory prints provided with the Sterling nWMS PCA.

Chapter 4, "Outbound Prints"

This chapter explains the outbound prints provided with the Sterling nWMS PCA.

Appendix A, "Configuring Prints"

This appendix explains the process of configuring prints in Sterling nWMS PCA.

Appendix B, "Configuring the Printer"

This appendix explains the process of configuring the printer in Sterling nWMS PCA.

Appendix C, "Sterling nWMS PCA Prints Samples"

This appendix provides samples of the various documents that can be printed using the Sterling nWMS PCA.

Documentation

For more information about the Sterling Networked Warehouse Management System PCA[®] (Sterling nWMS PCA[®]) components, see the following manuals in the Sterling nWMS PCA[®] documentation set:

For a description of the various documents in the Sterling nWMS PCA® documentation set, see the Sterling nWMS PCA® Documentation Home Page at:

<YFS_HOME>/documentation/YNW_doc_home.html

where <YFS_HOME> = <YANTRA_HOME>/Runtime

and <YANTRA_HOME> is the directory where this PCA and *Sterling Supply Chain Applications®* are installed.

Conventions

The following conventions may be used in this manual:

Convention	Meaning
. . .	An ellipsis represents information that has been omitted.

Convention	Meaning
< >	Angle brackets indicate user-supplied input.
mono-spaced text	Mono-spaced text indicates a file name, directory path, attribute name, or an inline code example or command.
/ or \	Slashes and backslashes are file separators for Windows, UNIX and LINUX operating systems. The file separator for the Windows operating system is "\" and the file separator for Unix and Linux systems is "/". The Unix convention is used unless otherwise mentioned.
<YANTRA_HOME>	User-supplied location of the Sterling Supply Chain Applications installation directory.
<YFS_HOME>	Location of the generated <YANTRA_HOME>/Runtime directory.
<YANTRA_HOME_OLD>	User-supplied location of the Sterling Supply Chain Applications installation directory for previously installed releases. This is only applicable for Release 7.7 or above.
<YFS_HOME_OLD>	This is the <YANTRA_HOME_OLD>/Runtime directory of previously installed releases.

Introduction

The Sterling Networked Warehouse Management System PCA helps you manage operations in mid-sized Finished Goods distribution centers (DCs). The Sterling nWMS PCA can be used by manufacturers, retailers, distributors, and logistics providers.

The Sterling nWMS PCA provides many prints for use in day-to-day warehouse operations. These include prints required to meet compliance requirements, such as those of a carrier or buyer, prints mandated by governments of countries, such as, export documents for international shipping, and so forth. Each of these prints is associated with a unique identifier, which is known as the print document ID.

Prints can be triggered automatically upon certain events or manually, based on request. You can enter the number of copies of the label to be printed.

The Sterling nWMS PCA uses Loftware, a third party printing solution, to design and print documents at run time.

1.1 Why Loftware

The Sterling nWMS PCA integrates with Loftware Print Server to generate labels.

Loftware Print Server is a server based software solution for managing and processing barcode label and RFID technology requests from corporate applications. This enterprise-class solution is a highly scalable and fault tolerant system that is designed to handle thousands of requests targeted to hundreds (or thousands) of printers. It has all of the appropriate queuing, status, and recovery features that are needed in an RFID technology and barcode printing software system.

The integration option provides the flexibility needed to optimize the Software Print Server to the specific needs of your system design and implementation requirements. The Sterling Supply Chain Applications off load all barcode label printing and RFID technology tagging to the Software Print Server, which translates your request into device specific code before sending it to printers.

There are various advantages of integrating with Software for generating labels. Some of these are:

- Easily create new labels
 - Label Wizard: Helps you to create a new label, open a compliance label template for custom editing, or open a pre-existing label.
 - Label Design Mode: Helps you to easily create any type of barcode or RFID 'Smart' Label.
- Direct TCP/IP link

The Software Label Manager delivers additional network connectivity features by remotely attaching network printers directly through TCP/IP Windows sockets.
- Printer support

Support for wide range of printer models such as Zebra, ELTRON, Data max, Intermec, and so forth.
- Support for load balancing and clustering
- Administration capabilities

Helps you to audit your print jobs, and view label history and security features for controlling access.

1.2 Configurations For Printing Documents

This section introduces the basic configurations needed to print documents using the Sterling nWMS PCA.

1.2.1 Choosing Label Formats

Documents can have multiple label formats. For example, the Packing Slip document can have the following formats: Itemized Packing Slip, Packing Slip with Package Level Details, and Combined Picking and

Packing Slip. The default format of the Packing Slip is the Itemized Packing Slip. Based on the buyer's preferences, the Packing Slip with Package Level Details or the Combined Picking and Packing Slip can be set up as a preference for the buyer's document type. Similarly, document type preferences can be set up for the seller, carrier, enterprise, and node.

For more information about defining label formats, see [Section A.2, "Defining Label Formats"](#)

1.2.2 Choosing the Printer

The printer that prints a document is selected based on the type of document being printed (the label format of the document), the user who prints the document, and the location of the user's workstation.

You can set up User Printer Preferences to determine the printer to use when a specific user or user group prints a document. You can set up Equipment Printer Preferences to determine the printer to use when a specific equipment is used. You can also set up Station Printer Preferences to determine the printer to use for a specific station. For more information about defining printer preferences, see [Section B.3.2, "Defining Printer Preferences"](#).

1.2.3 Configuring Printers

The process of configuring printers has to be done manually.

This section introduces how to configure printers in the Software Print Server (LPS) and the Sterling nWMS PCA.

1.2.3.1 In the Software Print Server

The Software Print Server provides an interface to configure printers. Separate drop directories have to be configured for each printer in LPS.

A drop directory (scan directory) is a directory from which LPS parses the .pas files and sends them to the printer. After configuring printers in LPS, the same printers need to be configured in the Sterling nWMS PCA.

1.2.3.2 In the Sterling nWMS PCA

All devices in the Sterling nWMS PCA are associated with a device type. For example, a printer is predefined as a device type. A device sub type

further categorizes a device type. For example, a device type of Printers can be further categorized or sub-typed into HP LaserJet 5P and Zebra 170. Each individual sub-type enables for device configuration and its respective parameters. For more information about configuring printers, see [Appendix B, "Configuring the Printer"](#).

1.3 Sterling nWMS PCA Prints

The labels provided with the Sterling nWMS PCA are grouped into the following classifications:

- [Inbound Prints](#)
- [Inventory Prints](#)
- [Outbound Prints](#)

1.3.1 Inbound Prints

Inbound Prints are documents that are printed as a part of the Inbound Process. These documents may either be printed automatically, on completion of a certain task, or printed manually through the console.

For more information about inbound prints, see [Chapter 2, "Inbound Prints"](#).

The different inbound prints provided with the Sterling nWMS PCA are:

- [License Plate Label](#)

Warehouses can use License Plate Labels instead of using pre printed UCC-128 barcode. This is useful because License Plate Labels may have additional product details such as Item ID, description, Purchase Order (PO), and Advance Ship Notice (ASN) number.

- [Putaway Task List](#)

The Putaway Task List provides Putaway task details for a batch. This task list contains details of Item, From Location, To Location, and Quantity.

- [Receiving Worksheet](#)

The Receiving Worksheet lists all the expected items for a shipment. This enables the user to record the actual receipt of the items.

1.3.2 Inventory Prints

Inventory Prints are documents that are printed as a part of the warehouse operations. These documents may either be printed automatically on completion of a certain task, or printed manually through the console.

For more information about inventory prints, see [Chapter 3, "Inventory Prints"](#).

The different inventory prints provided with the Sterling nWMS PCA are:

- [Count Sheet](#)
A Count Sheet displays all locations and items that are to be included for the cycle count.
- [Hazmat SKU Label](#)
Hazmat SKU Labels are applied on cartons or containers carrying Hazmat items when these items are shipped.
- [Replenishment Task List](#)
The Replenishment Task List provides replenishment task details for a batch. This task list contains details of Item, From Location, To Location, and Quantity.
- [Retrieval Task List](#)
The Retrieval Task List provides retrieval task details for a batch. This task list contains details of Item, From Location, To Location, and Quantity.
- [UPC Case Code Label](#)
This is the standard Universal Product Code (UPC) Case Code label that the warehouse can use to track inventory in the warehouse. It contains the UPC Case Barcode that gives information about the item and case quantity.

1.3.3 Outbound Prints

Outbound Prints are documents that are printed as a part of the Outbound Process. These documents may either be printed automatically, on completion of a certain task, or printed manually through the console.

For more information about outbound prints, see [Chapter 4, "Outbound Prints"](#).

The different outbound prints provided with the Sterling nWMS PCA are:

- [Cart Manifest Task List](#)

The Cart Manifest Task List provides task details for a batch to enable the operators to execute picking using Pick Carts. It lists the cart locations and carton sizes for each location so that items can be picked into the cartons. It also contains details of Item, From Location, Cart location, and Quantity.

- [Certificate of Origin](#)

The Certificate of Origin is used to indicate the country where the product is made.

- [Combined Picking and Packing Slip](#)

The Combined Picking and Packing Slip is used as a combined pick list, packing slip and invoice. It contains details of the pick location, item, and cost details.

- [Commercial Invoice](#)

The Commercial Invoice is a document that has to accompany all International Shipments in order to be cleared by customs in the receiving country.

- [Hazmat Bill Of Lading](#)

The Hazmat Bill of Lading is used when the shipment or load has any Hazmat items. This BOL contains additional information about the Hazardous item, such as like Hazard Class, Packing Group, and so on.

- [Hazmat Manifest](#)

The Hazmat Manifest is similar to the LTL Manifest. However it is generated only for shipments that contain any Hazmat items.

- [Item Pick Task List](#)

The Item Pick Task List provides task details for a batch to enable the operators to execute picking. The task list contains details of Item, From Location, To Location, and Quantity.

- [LTL Manifest](#)

The LTL Manifest is generated by the shipper for shipments that are shipped through Less than Truck Load (LTL) carriers to an intermediate location, such as a distribution center, consolidator, and so on. Some Parcel Carriers also provide LTL services.

- [Multi-SKU UCC-128 Container Shipping Label](#)

The Multi SKU UCC-128 Container Shipping Label has the SSCC barcode to track the container and its contents.

- [North American Free Trade Agreement Certificate of Origin](#)

The North American Free Trade Agreement (NAFTA) Country of Origin document is used within the NAFTA countries (Canada, USA, and Mexico) to indicate the country where the product is made.

- [Packing Slip](#)

A Packing Slip displays the shipment lines that are ready to be shipped. It also contains the Ship From and Ship To addresses. The Packing Slip accompanies the shipment.

- [Packing Slip With Package Level Details](#)

This label is similar to the Packing Slip, but has additional details of the contents in each container associated with the shipment.

- [RFID Slap and Slip Label](#)

The RFID Slap and Ship Label contains information about the GTIN (Global Trade Identification) number and UPC number or the GTIN number and SSCC number.

- [Shipper's Export Declaration](#)

A Shipper's Export Declaration is a document that has to accompany International Shipments from the USA. This document serves as a record of US exports and is used to compile trade statistics.

- [Single-SKU UCC-128 Container Shipping Label](#)

The Single SKU Uniform Commercial Code (UCC)-128 Container Shipping Label has the Serial Shipping Container Code (SSCC) barcode to track the container and its contents.

- [Special Ticket Label](#)

Special Ticket Labels can be printed as part of Value Added Services (VAS) for specific customers. The special ticket label identifies the Customer's Item ID, in addition to the Node's Item ID.

- [VICS Bill Of Lading](#)

The VICS (Voluntary Interindustry Commerce Standards) Bill Of Lading (BOL) provides inventory-processing information through supply chain to a shipper, carrier, and customer. It is a document issued by the transportation carrier to the shipper, acknowledging that they have received the shipment of goods

Two types of Bill of Ladings can be printed:

- VICS Bill Of Lading for Shipment
- VICS Bill Of Lading for Load

- [Wave Start Label and Wave End Label](#)

When labels are printed during wave release this label acts as an identifier that indicates the first and last labels for the wave. This label also provides information about the number of shipments, cartons, batches, and so on.

Inbound Prints

Inbound Prints are documents that are printed as a part of the Inbound Process. These documents may either be printed automatically, upon completion of a certain task, or printed manually through the console.

The following inbound labels can be generated using the Sterling nWMS PCA:

- [License Plate Label](#)
- [Putaway Task List](#)
- [Receiving Worksheet](#)

2.1 License Plate Label

Warehouses can use License Plate Labels instead of using pre printed UCC-128 barcodes. This is useful because License Plate Labels may have additional product details such as item ID, description, PO, and ASN number.

2.1.1 Layout

The default License Plate Label that the Sterling nWMS PCA prints is displayed here:

Figure 2–1 Licence Plate Label

Table 2–1 Licence Plate Label

Field	Description
Item ID	The identifier or serial number of the item.
Desc	The description of the item.
Quantity	The quantity of the item.
Print Date	The date on which the label is printed.
ASN No.	The ASN number of the shipment.
Order No.	The order number associated with the Shipment.

You can use the Sterling nWMS PCA to configure the License Plate Label for an Enterprise, Seller Organization, and Buyer Organization.

Note: For a loose case, an asterisk (*) is printed next to the UOM in the LPN Label. For a full case the asterisk(*) is not printed.

2.1.2 Typical Preferences

Preferences for License Plate Labels are typically determined by the node.

2.1.3 Default Preferences

Default label preferences for the License Plate Label is determined by the node.

2.1.4 Print Size

License Plate Labels are printed on 4" x 2" paper.

License Plate Labels are printed in portrait layout.

2.1.5 Printer Type

License Plate Labels can be printed using a Zebra printer.

2.1.6 Print Time

License Plate Labels are printed when the receipt is started.

License Plate Labels can also be printed upon request.

2.1.7 Print Location

License Plate Labels are printed at the printer that is configured for the end user.

2.1.8 Print Documents

The Print Document associated with License Plate Labels is YNW_LPN_LABEL_DOCUMENT.

The Label Format provided by the Sterling nWMS PCA for the License Plate Label is YNW_LPN_LABEL_FORMAT.

Figure 2–2 Print Document for License Plate Label

The YNW_LPNIlabel.lwl and YNW_LPNIlabelMap.xml files are stored at:

<YFS_HOME>\template\prints\label\ynw directory

Here, <YFS_HOME> points to the <YANTRA_HOME>\Runtime directory.

2.1.10 Print Service

The service provided for printing the License Plate Label is YNW_PrintLPNIlabelsOnStartReceipt_75

When a shipment is received, the On Success event of the On Start Receipt transaction is raised, which invokes the YNW_PrintLPNIlabelsOnStartReceipt_75 service.

The YNW_PrintLPNIlabelsOnStartReceipt_75 service then initiates the printing of the License Plate Label.

To activate the YNW_PrintLPNIlabelsOnStartReceipt_75 service:

1. Navigate to the Purchase Order Receipt Repository
2. Navigate to the Transaction Repository
3. Associate the On Start Receipt event, with the YNW CalcQC and Print Recv WS(75) action, which invokes the YNW_PrintLPNIlabelsOnStartReceipt_75 service

2.1.11 Printing Manually

License Plate Labels can also be printed manually upon user request. You can print a License Plate Label from the Inbound Console.

To print a License Plate Label manually:

1. Navigate to Inbound > Print Case/Pallet LPN Labels. The Print Case/Pallet LPN Label search screen displays.

Figure 2–4 Print Case/Pallet LPN Label Screen

Table 2–3 Print Case/Pallet LPN Label, Shipment Information

Field	Description
Document Type	Indicates the document type of the shipment. The document type can be Blind Receipt, Transfer Order, or Purchase Order.
Shipment #	Indicates the identifying shipment number for the shipment.
Buyer	Indicates the buyer of the shipment.
Item ID	Indicates the identifier of the item.
Receiving Node	Indicates the receiving node of the shipment.
Ship Node	Indicates the node that ships the shipment.
Order #	Indicates an order number of the shipment. The shipment lines displayed in this screen belongs to this order number.

Table 2–3 Print Case/Pallet LPN Label, Shipment Information

Field	Description
Unit Of Measure	Indicates the unit of measure of the item. The shipment lines displayed in this screen belong to this unit of measure.
Enterprise	Indicates the enterprise to which the shipment belongs.
Seller	Indicates the seller to which the shipment belongs.
Release #	Indicates the release number of the shipment lines.
Label Type	Indicates the type of container. The Label Type can be either Case or Pallet.

Table 2–4 Print Case/Pallet LPN Label, Shipment Lines

Field	Description
Shipment Line #	Enter the shipment line number.
PO	Enter the purchase order number.
Line #	Enter the line number of the purchase order.
Release #	Enter the release number of the shipment line.
Item ID	Enter the identifier or serial number of the item. It is mandatory to enter the Item ID.
Description	Indicates the description of the item. This field is automatically populated when you enter the item ID.
PC	Enter the product class of the item.
UOM	Indicates the unit of measure for the item. This field is automatically populated when you enter the item ID. It is mandatory to enter the UOM.
Quantity To Be Received	Enter the quantity to be received.

Table 2–4 Print Case/Pallet LPN Label, Shipment Lines

Field	Description
Quantity Per Label	Enter the quantity to be shipped. It is mandatory to enter the quantity.
No. of Labels	Enter the number of labels to be printed.

3. In the Print Pallet LPN Label screen, select the appropriate Shipment Line #.

Note: You can only select and print one Shipment Line # at a time.

4. Click Print. The Print pop-up window displays.
5. In the Print pop-up window,
 - a. From the Print Service Name drop-down list, select YNW_PrintAdditionalLPNLabels_75.
 - b. From the Printer drop-down list, select Zebra.
 - c. In the No. of Copies text box, enter the number of copies to print.
 - d. Click OK.
6. You can also click the Start Again button in the Print Case/Pallet LPN Label screen to print more shipment labels.

2.1.12 Additional Setup Required

In the receiving node's preferences, 'Build Pallet' or 'Build Case' is mandatory to print the LPN Labels.

2.2 Putaway Task List

The Putaway Task List provides Putaway task details for a batch. This task list contains details of the item, the location from which the item is putaway, the location to which the item is putaway, and the quantity of the item that is putaway.

2.2.1 Layout

The default Putaway Task List that the Sterling nWMS PCA prints is displayed here:

Figure 2–6 Putaway Task List

[illegible]

Table 2–5 Putaway Task List

Field	Description
WHSE	The warehouse where the tasks are executed.
BATCH #	The batch number associated with the task.
Shipment #	The shipment number associated with the putaway task.

Table 2–5 Putaway Task List

Field	Description
Receipt #	The receipt number associated with the putaway task.
Request#	The request number associated with the putaway task.
From Location/ From LPN	The location or LPN from where the item is picked.
Item/Serial No.	The identifier or serial number for the item.
UOM	The unit of measure for the item.
Item Description	The description of the item.
Qty	The number of units of the item to putaway.
To Location	The location where the items should be deposited.
Tag Details	The tag details for the item, such as lot number, batch number, and revision number.
Picked By	The user who executed the tasks.
Checked By	The user who inspected the items.
Confirmed By	The user who confirmed the tasks.

You can use the Sterling nWMS PCA to configure the Putaway Task List label format for an Enterprise, Seller Organization, and Buyer Organization.

2.2.2 Typical Preferences

Label preferences for the Putaway Task List are typically determined by the node.

2.2.3 Default Preferences

The default label preferences for the Putaway Task List are determined by the node and the equipment type.

2.2.4 Print Size

Putaway Task Lists are printed on A4 paper.

Putaway Task Lists are printed in landscape layout.

2.2.5 Printer Type

Putaway Task Lists can be printed using any Windows printer.

2.2.6 Print Time

Putaway Task Lists are printed when putaway tasks are generated after the close receipt.

Putaway Task Lists can also be printed upon request.

2.2.7 Print Location

The Putaway Task Lists are printed at the printer specified when setting the printer preferences.

Note: Sterling Commerce recommends that you set the printer preferences to print the label at the printer that is closest to the work area.

2.2.8 Print Document

The Print Document name associated with the Putaway Task List is TASKLIST.

The Label Format provided by the Sterling nWMS PCA for the Putaway Task List is ITEM_PICK_BATCHSHEET.

Figure 2–7 Print Document for Putaway Task List

Print Document	Document Description	Save Directory	Default Label Format

The `Item_Pick_BatchSheet.lwl` and `ItemPickBatchSheetMap.xml` files are stored at:

`<YFS_HOME>\template\prints\label`

Here, `<YFS_HOME>` points to the `<YANTRA_HOME>\Runtime` directory.

2.2.10 Print Service

The service provided for printing the Putaway Task List is `PrintMoveTickets`.

When a shipment pack is completed, the `On Success` event of the `Release Move Request` transaction is raised, which invokes the `Print MoveTickets` service.

The `PrintMoveTickets` service then initiates the printing of the Putaway Task List.

To activate the `PrintMoveTickets` service:

1. Navigate to the Move Request Execution Repository
2. Navigate to the Transaction Repository
3. Associate the `On Success` event with the `Print Move Tickets` action, which invokes the `PrintMoveTickets` service

2.2.11 Printing Manually

Putaway Task Lists can also be printed manually upon user request. You can print the Putaway Task List from the Task Console.

To print a Putaway Task List manually:

1. Navigate to `Task > Task Console`. The `Task By Task Type` search screen displays.
2. From the entities menu choose the `Batch` option. The `Batch By All Attributes` search screen displays. For more information, see the *Sterling Warehouse Management System User Guide*.
3. Enter the appropriate search criteria and click `Search`. The `Batch List` screen displays.
4. In the `Batch List` screen do either of the following:
 - Check the box for the appropriate batch.

- Click the appropriate batch number.
- 5. Click Print. The Print pop-up window displays.
- 6. In the Print pop-up window:
 - a. From the Print Service Name drop-down list, select PrintTaskkList.
 - b. From the Printer drop-down list, select the appropriate printer.
 - c. In the No. of Copies text box, enter the number of copies to print.
 - d. Click OK.

2.2.12 Additional Setup Required

There is no additional setup required to print this document.

2.3 Receiving Worksheet

The Receiving Worksheet lists all the expected items for a shipment. This enables the user to record the actual receipt of the items.

2.3.1 Layout

The Receiving Worksheet provided with the Sterling nWMS PCA prints is displayed here:

Figure 2–9 Receiving Work Sheet

<u>RECEIVING WORK SHEET</u>						Page1 Of1			
Printed 12/20/05 14:44									
Shipment #: 100000191 		Receipt Type: Purchase Order Receipt Date: 2005-12-20 Receiving Dock: D1-010101 Origin: ,Tewksbury		Carrier: USPS BOL #: BOL-1 Trailer #: Trailer-1 PRO #: PRO-1 Seal #: Seal-1

RECEIVED BY: _____ CHECKED BY: _____ CONFIRMED BY: _____

Table 2–6 Receiving Worksheet

Field	Description
Shipment #	The identifying shipment number for the shipment.
Receipt Type	The type of the receipt.
Receipt Date	The receipt date.
Receiving Dock	The dock at which the items are received.
Origin	The location from where the shipment is shipped.
Carrier	The carrier that is transporting the shipment.
BOL #	The identifying BOL number for the Bill of Lading.
Trailer #	The number of the trailer.
PRO #	The progressive number assigned by the carrier to track the load.
Seal #	The shipment seal number. The shipment seal number is used if the shipment is a full truck load from the origin to destination.

Table 2–7 Receiving Worksheet, SHIPPING INFORMATION

Field	Description
PO #	The purchase order number of the shipment that has been received.
Item No.	The identifying item number for the item.
Description	The description of the item.
UOM	The unit of measurement for the item.
Storage Type	The storage type code for the item.
Std Case Quantity	The number of units of the item in a standard case. If the standard case quantity is not set up, "***" is printed against the item.
Std Pallet Quantity	The number of units of the item in a standard pallet. If the standard pallet quantity is not set up, "***" is printed against the item.

Table 2–7 Receiving Worksheet, SHIPPING INFORMATION

Field	Description
Computed QC Quantity	The number of units of the items to divert to QC for quality checking.
Received Quantity	The number of units of the items received.
Damaged Quantity	The number of units of the items damaged.
RECEIVED BY	This is signed by the user who receives the item.
CHECKED BY	This is signed by the user who checks the receipt.
CONFIRMED BY	This is signed by the user who confirms the receipt.

You can use the Sterling nWMS PCA to configure the Putaway Task List label format for an Enterprise, Seller Organization, and Buyer Organization.

2.3.2 Typical Preferences

Label preferences for the Receiving Worksheet are typically determined by the node.

2.3.3 Default Preferences

The default label preference for the Receiving Worksheet are determined by the node.

2.3.4 Print Size

Receiving Worksheets are printed on A4 paper.

Receiving Worksheets are printed in landscape layout.

2.3.5 Printer Type

Receiving Worksheets can be printed using any Windows printer.

2.3.6 Print Time

Receiving Worksheets are generated On Success of the Start Receipt transaction.

Receiving Worksheets cannot be printed on request.

2.3.7 Print Location

Receiving Worksheets are printed at the printer that is associated with the Receiving Dock.

2.3.8 Print Documents

The Print Document associated with the Receiving Worksheet is RECEIVING_WORKSHEET_DOCUMENT.

The Label Format provided by the Sterling nWMS PCA for the Receiving Worksheet is RECEIVING_WORKSHEET_WO_EXP_QTY.

Figure 2–10 Print Document for Receiving Worksheet

The YNW_ReceivingWorksheet_withoutExpQty.lwl,
 YNW_ReceivingWorksheet_withExpQty.lwl,
 YNW_ReceivingWorksheet_withoutExpQty_Map.xml and

YNW_ReceivingWorksheet_withExpQty_Map.xml files are stored at the location:

<YFS_HOME>\template\prints\label\ynw directory

Here, <YFS_HOME> points to the <YANTRA_HOME>\Runtime directory.

2.3.10 Print Service

The service provided for printing the Receiving Worksheets is YNW_PrintReceivingWorksheet_75.

When a shipment is received, the On Start Receipt event of the Start Receipt transaction is raised, which invokes the YNW_PrintReceivingWorksheet_75 service.

The YNW_PrintReceivingWorksheet_75 service then initiates the printing of the Receiving Worksheet.

To activate the YNW_PrintReceivingWorksheet_75 service:

1. Navigate to the Purchase Order Receipt Repository.
2. Navigate to the Transaction Repository.
3. Associate the On Start Receipt event with the YNW CalcQC And Print Recv WS(75) action, which invokes the YNW_PrintReceivingWorkSheet_75 service.

2.3.11 Printing Manually

Receiving Worksheets can also be printed manually upon user request. You can print the Receiving Worksheets from the Inbound Console.

To print Receiving Worksheets manually:

1. Navigate to Inbound > Inbound Receipt Console. The Receipt By Receipt search screen displays.
2. Enter the appropriate search criteria and click Search. The Inbound Order Receipt List screen displays. For more information, see the *Sterling Warehouse Management System User Guide*
3. In the Inbound Order Receipt List screen, check the box for the appropriate receipt
4. Click Print. The Print pop-up window displays.

5. In the Print pop-up window,
 - a. From the Print Service Name drop-down list, select YNW_Print ReceivingWorksheet_75.
 - b. From the Printer drop-down list, select the appropriate printer.
 - c. In the No. of Copies text box, enter the number of copies to print.
 - d. Click OK.

2.3.12 Additional Setup Required

There is no additional setup required to print this document.

Inventory Prints

Inventory Prints are documents that are printed as a part of the warehouse operations. These documents may either be printed automatically on completion of a certain task, or printed manually through the console.

The following inventory documents can be generated using the Sterling nWMS PCA:

- [Count Sheet](#)
- [Hazmat SKU Label](#)
- [Replenishment Task List](#)
- [Retrieval Task List](#)
- [UPC Case Code Label](#)

3.1 Count Sheet

A count sheet displays all locations and items that are to be included in the cycle count and physical count.

Counts are typically done to eliminate mismatches between the system and the actual inventory.

The types of Count processes that may be followed are:

- [Cycle Count Sheet](#)
- [Physical Count Sheet](#)

3.1.1 Cycle Count Sheet

Cycle Counts are done for a group of locations, on a daily basis, to ensure that location inventory mismatches are eliminated

3.1.1.1 Layout

The Cycle Count Sheet provided with the Sterling nWMS PCA is displayed here:

Figure 3-1 Cycle Count Sheet

Table 3–1 Cycle Count Sheet

Field	Description
BATCH #	The batch number associated with the cycle count.
WHSE	The warehouse where the count tasks are executed.
COUNTED BY	The user who performed the cycle count.
Location	The location where the items are counted.
Item	The items that are counted.
Product Class	The Product Class of the item.
Count Qty	Enter the item quantity counted at the location.
CHECKED BY	Enter the name of the user who inspected the items.
CONFIRMED BY	Enter the name of the user who confirmed the task.

You can use the Sterling nWMS PCA to configure the Cycle Count Sheet label format for an Enterprise, Seller Organization, and Buyer Organization.

3.1.1.2 Typical Preferences

Label preferences for the Cycle Count Sheet are typically determined by the node and the enterprise.

3.1.1.3 Default Preferences

The default label preferences for Cycle Count Sheet are determined by the node and the enterprise.

3.1.1.4 Print Size

Cycle Count Sheets are printed on A4 paper.

Cycle Count Sheets are printed in portrait layout.

3.1.1.5 Printer Type

Cycle Count Sheets can be printed using any Windows printer.

3.1.1.6 Print Time

Cycle Count Sheets are printed when the count batches are created.

Cycle Count Sheets can also be printed upon request.

3.1.1.7 Print Location

Cycle Count Sheets are printed at the printer configured for the users.

3.1.1.8 Print Documents

The Print Document associated with the Cycle Count Sheet is COUNTSHEET.

The Label Format provided by the Sterling nWMS PCA, for the Cycle Count Sheet, is COUNT_SHEET.

Figure 3–2 Print Document for Cycle Count Sheet

The CountSheet.lwl and CountSheetMap.xml files are stored at:

<YFS_HOME>\template\prints\label

Here, <YFS_HOME> points to the <YANTRA_HOME>\Runtime directory.

3.1.1.10 Print Service

The service provided for printing the Cycle Count Sheet is `PrintTaskList`.

When a batch of count tasks is created, the `Batch Created` event of the `Create Batch` transaction is raised, which invokes the `PrintTaskList` service.

The `PrintTaskList` service then initiates the printing of the Cycle Count Sheet.

To activate the `PrintTaskList` service:

1. Navigate to the Task Execution Repository
2. Navigate to the Transaction Repository
3. Associate the `Batch Created` event with the `Print Count Sheet` action, which invokes the `PrintTaskList` service

Note: The `PrintTaskList` service is activated by default.

3.1.1.11 Printing Manually

Cycle Count Sheets can also be printed manually on user request. You can print a Cycle Count Sheet from the Task Console.

To print a Cycle Count Sheet manually:

1. Navigate to `Tasks > Task Console`. The `Task By Task Type` search screen displays.
2. From the `Entities` menu select `Batch`.
3. Enter the appropriate search criteria and click `Search`. The `Task List` screen displays.
4. In the `Task List` screen do either of the following:
 - Check the box for the appropriate task
 - Click the appropriate batch number
5. Click `Print`. The `Print` pop-up window displays.

6. In the Print pop-up window,
 - a. From the Print Service Name drop down list, select `PrintTaskList`
 - b. From the Printer drop down list, select the appropriate printer
 - c. In the No. of Copies text box, enter the number of copies to print
 - d. Click OK

3.1.1.12 Additional Setup Required

There is no additional setup required to print this document.

3.1.2 Physical Count Sheet

Physical Counts are performed to synchronize the physical and system inventory and are required as a part of the corporate policy or client requirements. During the physical count process, the warehouse is closed and no other activity is performed.

3.1.2.1 Layout

The Physical Count Sheet provided with the Sterling nWMS PCA is displayed here:

Figure 3–4 Physical Count Sheet

COUNT SHEET

BATCH # :

DATE :

WHSE :

COUNTED BY :

Location	LPN #	ItemID	Item Description	PC	Count Qty

CHECKED BY:

CONFIRMED BY:

Table 3–2 Physical Count Sheet

Field	Description
BATCH #	The batch number associated with the physical count.
DATE	The date when the physical count are performed.
WHSE	The warehouse where the physical count tasks are performed.
COUNTED BY	The user who performed the physical count.

Table 3–2 Physical Count Sheet

Field	Description
Location	The location where the items are counted.
LPN#	The LPN number of the containers.
Item ID	The identifier of the items that are counted.
Item Description	The description of the items that are counted.
PC	The Product Class of the items that are counted.
Count Qty	Enter the item quantity counted at the location.
CHECKED BY	Enter the name of the user who inspected the items.
CONFIRMED BY	Enter the name of the user who confirmed the task.

You can use the Sterling nWMS PCA to configure the Physical Count Sheet label format for an Enterprise, Seller Organization, and Buyer Organization.

3.1.2.2 Typical Preferences

Label preferences for the Physical Count Sheet are typically determined by the node and the enterprise.

3.1.2.3 Default Preferences

The default label preferences for Physical Count Sheet are determined by the node and the enterprise.

3.1.2.4 Print Size

Physical Count Sheets are printed on A4 paper.

Physical Count Sheets are printed in portrait layout

3.1.2.5 Printer Type

Physical Count Sheets can be printed using any Windows-supported printer.

3.1.2.6 Print Time

Physical Count Sheets are printed when the count batches are created.

Physical Count Sheets can also be printed upon request.

3.1.2.7 Print Location

Physical Count Sheets are printed at the printer configured for the users.

3.1.2.8 Print Documents

The Print Document associated with the Physical Count Sheet is `PICOUNTSHEET`.

The Label Format provided by the Sterling nWMS PCA, for the Physical Count Sheet, is `PI_COUNT_SHEET`.

The PI_CountSheet.lwl and PICountSheetMap.xml files are stored at:

<YFS_HOME>\template\prints\label

Here, <YFS_HOME> points to the <YANTRA_HOME>\Runtime directory.

3.1.2.10 Print Service

The service provided for printing the Physical Count Sheet is `PIPrintTaskList`.

When a batch of count tasks is created, the `Batch Created` event of the `Create Batch` transaction is raised, which invokes the `PIPrintTaskList` service.

The `PIPrintTaskList` service then initiates the printing of the Physical Count Sheet.

To activate the `PIPrintTaskList` service:

1. Navigate to the Task Execution Repository.
2. Navigate to the Transaction Repository.
3. Ensure that the `BATCH_CREATED` event is configured in the `Create Batch` transaction. To do this, double-click on the `BATCH_CREATED` event. Modify the displayed `Print Count Sheet` action to invoke the `PIPrintTaskList` service instead of the `PrintTaskList` service. Click `Save`.

3.1.2.11 Printing Manually

Physical Count Sheets can also be printed manually upon user request. You can print a Physical Count Sheet from the Task Console.

To print a Physical Count Sheet manually:

1. Navigate to `Tasks > Task Console`. The `Task By Task Type` search screen displays.
2. From the `Entities` menu, select `Batch`.
3. Enter the appropriate search criteria and click `Search`. The `Task List` screen displays.
4. In the `Task List` screen do one of the following:
 - Check the box for the appropriate task.
 - Click the appropriate batch number.
5. Click `Print`. The `Print` pop-up window displays.

6. In the Print pop-up window,
 - a. From the Print Service Name drop down list, select `PIPrintTaskList`.
 - b. From the Printer drop-down list, select the appropriate printer.
 - c. In the No. of Copies text box, enter the number of copies to print.
 - d. Click OK.

3.1.2.12 Additional Setup Required

There is no additional setup required to print this document.

3.2 Hazmat SKU Label

Hazmat SKU Labels are applied to cartons or containers carrying hazardous materials items when these items are shipped.

3.2.1 Layout

The Hazmat SKU Label provided with the Sterling nWMS PCA prints is displayed here:

Figure 3–7 Hazmat SKU Label

DOT SHIPPING NAME: Isopropanol		
ITEM: PS2		
HAZARD CLASS: Class X	IDENTIFICATION NUMBER: 12345	PACKING GROUP: P1
DOT LABEL CODE: Label X		

Table 3–3 Hazmat SKU Label

Field	Description
DOT SHIPPING NAME	The shipping name as registered with the United States Department of Transportation.
ITEM	The item identifier.
HAZARD CLASS	The hazard class for the item.
IDENTIFICATION NUMBER	The four-digit number that identifies the hazardous items (such as explosives or poisonous materials) of commercial importance. This is widely used in international commerce.

Table 3–3 Hazmat SKU Label

Field	Description
PACKING GROUP	Indicates the degree of danger of a hazardous item within its hazard class or division and the type of packaging required for the item. The valid values are: Packing Group I - high danger, Packing Group II - medium danger, Packing Group III - low danger.
DOT LABEL CODE	Indicates the label code of the hazardous item as assigned by the United States Department of Transportation.

You can use the Sterling nWMS PCA to configure the Hazmat SKU Label format for an Enterprise, Seller Organization, and Buyer Organization.

3.2.2 Typical Preferences

Label preferences for the Hazmat SKU Label are typically determined by the enterprise.

3.2.3 Default Preferences

The default label preferences for the Hazmat SKU Label are determined by the enterprise.

3.2.4 Print Size

Hazmat SKU Labels are printed on 4" x 2" labels.

Hazmat SKU Labels are printed in portrait layout.

3.2.5 Printer Type

Hazmat SKU Labels can be printed using a Zebra printer.

3.2.6 Print Time

Hazmat SKU Labels are printed only upon request.

3.2.7 Print Location

Hazmat SKU Labels are printed at the printer configured for the users.

3.2.8 Print Documents

The Print Document associated with the Hazmat SKU Label is HAZMAT_SKU_LABEL.

The Label Format provided by the Sterling nWMS PCA, for the Hazmat SKU Label, is HAZMAT_SKU_LABEL.

Figure 3–8 Print Document for Hazmat SKU Label

The `HazmatSKULabel.lwl` and `HazmatSKULabelMap.xml` files are stored at:

`<YFS_HOME>\template\prints\label`

Here, `<YFS_HOME>` points to the `<YANTRA_HOME>\Runtime` directory.

3.2.10 Print Service

The service provided for printing the Hazmat SKU Label is `PrintHazmatSKULabel`.

Note: There is no transaction triggered for this service as it can only be generated manually.

3.2.11 Printing Manually

Hazmat SKU Labels can only be printed manually upon user request. You can print the Hazmat SKU Label from the Inventory Console.

To print a Hazmat SKU Label manually:

1. Navigate to Inventory > Print SKU Labels. The Print SKU by Item search screen displays.
2. Enter the appropriate search criteria and click Search. The Print SKU List screen displays.
3. In the Print SKU List screen do either of the following:
 - Check the box for the appropriate task
 - Click the appropriate Item ID
4. Click Print. The Print pop-up window displays.
5. In the Print pop-up window,
 - a. From the Print Service Name drop-down list, select `PrintHazmatSKULabel`
 - b. From the Printer drop-down list, select the appropriate printer
 - c. In the No. of Copies text box, enter the number of copies to print
 - d. Click OK

3.2.12 Additional Setup Required

There is no additional setup required to print this document.

3.3 Replenishment Task List

The Replenishment Task List provides replenishment task details for a batch. This task list contains details for the Item, From Location, To Location, and Quantity.

The Replenishment Task List is printed automatically when an item is replenished from storage to the active area. The Replenishment Task List can also be printed upon a user requests.

The Replenishment Task List is printed on A4 paper.

The layout, typical preferences, default preferences, print size, printer type, print time, print location, print document, default file names, print service, and manual printing information for the Replenishment Task List is similar to the Putaway Task List. For this information about the Replenishment Task List, see [Section 2.2, "Putaway Task List"](#) in [Chapter 2, "Inbound Prints"](#).

3.4 Retrieval Task List

The Retrieval Task List provides retrieval task details for a batch. This task list contains details for the Item, From Location, To Location, and Quantity.

The Retrieval Task List is printed automatically when the item is retrieved from one location to another. For example, the Retrieval Task List is printed automatically when an item is moved from bulk storage to the VAS Station. The Retrieval Task List can also be printed upon a user request.

The Retrieval Task List is printed on A4 paper.

The layout, typical preferences, default preferences, print size, printer type, print time, print location, print document, default file names, print service, and manual printing information for the Retrieval Task List is similar to the Putaway Task List. For this information about the Retrieval Task List, see [Section 2.2, "Putaway Task List"](#) in [Chapter 2, "Inbound Prints"](#).

3.5 UPC Case Code Label

This is the standard Universal Product Code (UPC) Case Code label that the warehouse can use to track inventory in the warehouse. It contains the UPC Case barcode that provides information about the item and case quantity.

3.5.1 Layout

The UPC Case Code Label provided with the Sterling nWMS PCA prints is displayed here:

Figure 3–10 UPC Case Code Label

Table 3–4 UPC Case Code Label

Field	Description
Item ID	The identifier or serial number for the item.
Description	The description of the Item.
Quantity	The number of units of the item in the case.

3.5.2 Typical Preferences

Label preferences for the UPC Case Code are typically determined by the enterprise.

3.5.3 Default Preferences

The default label preferences for the UPC Case Code are determined by the node and enterprise.

3.5.4 Print Size

UPC Case Code Labels are printed on 4" x 2" labels.

UPC Case Code Labels are printed in portrait layout.

3.5.5 Printer Type

UPC Case Code Labels can be printed on a Zebra printer.

3.5.6 Print Time

UPC Case Code Labels can be printed upon request only.

3.5.7 Print Location

UPC Case Code Labels are printed at the printer configured for the user.

3.5.8 Print Documents

The Print Document associated with the UPC Case Code is UPCCASECODE.

The Label Format provided by the Sterling nWMS PCA, for the UPC Case Code, is UPC_CASE_CODE.

The YNW_LabelforUPCCaseCode.lwl and YNW_LabelUPCCaseCode_Map.xml files are stored at:

<YFS_HOME>\template\prints\label\ynw directory

Here, <YFS_HOME> points to the <YANTRA_HOME>\Runtime directory.

3.5.10 Print Service

The service provided for printing the UPC Case Code Label is YNW_PrintUPCCaseCodeLabel_75.

Note: There is no transaction triggered for this service as it can only be generated manually.

3.5.11 Printing Manually

The UPC Case Code Label is printed manually upon user request through the Inventory Console.

To print a UPC Case Code Label manually:

1. Navigate to Inventory > Print Case/Pallet SKU Labels. The Print Case/Pallet SKU Label search screen displays.
2. Enter the appropriate search criteria and click Search. The Print Case/Pallet SKU Label screen displays.
3. In the Number of Labels field, enter the appropriate value.
4. Click Print. The Print pop-up window displays.
5. In the Print pop-up window,
 - a. From the Print Service Name drop-down list, select YNW_PrintUPCCaseCodeLabel_75
 - b. From the Printer drop-down list, select the appropriate printer
 - c. In the No. of Copies text box, enter the number of copies to print
 - d. Click OK

3.5.12 Additional Setup Required

There is no additional setup required to print this document.

4

Outbound Prints

The following outbound prints can be generated using the Sterling nWMS PCA:

- [Carrier Labels](#)
- [Cart Manifest Task List](#)
- [Certificate of Origin](#)
- [Combined Picking and Packing Slip](#)
- [Commercial Invoice](#)
- [Item Pick Task List](#)
- [LTL Manifest](#)
- [Multi-SKU UCC-128 Container Shipping Label](#)
- [North American Free Trade Agreement Certificate of Origin](#)
- [Packing Slip](#)
- [Packing Slip with Lot- and Serial-Tracked Items](#)
- [Packing Slip With Package Level Details](#)
- [Packing Slip with Lot- and Serial-Tracked Package Level Details](#)
- [RFID Slap and Slip Label](#)
- [Shipper's Export Declaration](#)
- [Single-SKU UCC-128 Container Shipping Label](#)
- [Special Ticket Label](#)
- [VICS Bill Of Lading](#)

- Wave Start Label and Wave End Label

4.1 Carrier Labels

The Sterling nWMS PCA does not use Software to print Carrier Labels. For more information about Carrier Labels, see the *Sterling Parcel Carrier Adapter Guide*.

4.2 Cart Manifest Task List

The Cart manifest Task List provides task details for a batch to enable the operators to execute picking using Pick Carts. It lists the cart locations and carton sizes for each location so that items can be picked into the cartons. It also contains details for the Item, From Location, Cart location, and Quantity.

The Cart Manifest Task List can be printed automatically upon Wave Release.

The Cart Manifest Task List is printed for the A4 paper.

4.2.1 Layout

The Cart Manifest provided with the Sterling nWMS PCA prints is displayed here:

Figure 4–1 Cart Manifest Task List

[illegible]

Important: If the cart locations are less than or equal to eight slots, configure two slots for each location. Otherwise, configure one slot per location.

Table 4–1 Cart Manifest Task List

Field	Description
WHSE	The warehouse where the tasks are executed.
BATCH #	The batch number associated with the cart manifest batch sheet.
Wave #	The wave number associated with the cart manifest batch.
Shipment #	The shipment number associated with the cart manifest batch. The shipment number gets printed if the batch belongs to a single shipment.
CART LOCATION	The slot in which the item should be placed.
CARTON SIZE	The size of the carton in the current slot.
LOCATION	The pick location from where the items have to be picked.
ITEM	The description of the item.
UOM	The unit of measure for the item.
QTY	The total item quantity to be picked.
PICKED BY	The user who executed the tasks.
CHECKED BY	The user who inspected the items.
CONFIRMED BY	The user who confirmed the tasks.

You can use the Sterling nWMS PCA to configure the Cart Manifest custom label format for an Enterprise, Seller Organization, and Buyer Organization.

4.2.2 Typical Preferences

Label preferences for the Cart Manifest Task List are typically determined by the node and the equipment type.

4.2.3 Default Preferences

The default label preferences for the Cart Manifest are determined by the node and the equipment type.

4.2.4 Print Size

Cart Manifest Task Lists are printed on an A4 sheet paper.

Cart Manifest Task Lists are printed in landscape layout.

4.2.5 Printer Type

Cart Manifest Task Lists can be printed using any Windows printer.

4.2.6 Print Time

Cart Manifest Task Lists are printed when tasks are generated after the close receipt.

Cart Manifest Task Lists can also be printed on request.

4.2.7 Print Location

Cart Manifest Task Lists are printed at the printer available first.

4.2.8 Print Documents

The default print document name associated with the Cart Manifest Task List is TASKLIST.

The Label Format shipped along with the Sterling nWMS PCA, for the Cart Manifest, is ITEM_PICK_BATCHSHEET.

SPECIAL_TICKET	ynw/YNW_SpecialTicketLabel.lwl	ynw/YNW_SpecialTicketLabelMap.xml
LPN_LABEL_FORMAT	ynw/YNW_LPNLabel.lwl	ynw/YNW_LPNLabelMap.xml

The `Cart_Manifest_BatchSheet.lwl` and `CartManifestBatchSheetMap.xml` files are stored at the location:

`<YFS_HOME>\template\prints\label`

Here, `<YFS_HOME>` points to the `<YANTRA_HOME>\Runtime` directory.

4.2.10 Print Service

The service provided for printing the Cart Manifest is `YNW_PrintWave_75`.

When a shipment pack is completed, the `On Success` event of the `Print Wave` transaction is raised, which invokes the `YNW_PrintWave_75` service.

The `YNW_PrintWave_75` service then initiates the printing of the Packing Slip.

To activate the `YNW_PrintWave_75` service:

1. Navigate to the Outbound Picking Repository
2. Navigate to the Transaction Repository
3. Associate the `On Success` event with the `YNW Print Wave(75)` action, which invokes the `YNW_PrintWave_75` service.

4.2.11 Printing Manually

Cart Manifest Task List can also be printed manually on user request. You can print the Cart Manifest Task List from the Task Console.

To print Cart Manifest List manually:

1. Navigate to Task > Task Console. The Task By Task Type search screen appears.
2. Click the drop down button on Task to choose the Batch option. The Batch By All Attributes search screen appears.
3. Enter the appropriate search criteria and click Search. The Batch List screen appears.
4. In the Batch List screen do either of the following:
 - Select the check box against the appropriate batch.
 - Click the appropriate Batch #
5. Click Print. The Print popup window appears.

6. In the Print popup window,
 - a. From the Print Service Name drop down list, select `PrintTaskList`
 - b. From the Printer drop down list, select the appropriate printer
 - c. In the No. of Copies text box, enter the number of copies to print
 - d. Click OK.

4.2.12 Additional Setup Required

There is no additional setup required to print this document.

4.3 Certificate of Origin

The Certificate of Origin is used to indicate the country where the product is made.

This document is used for all countries except the North American Free Trade Agreement (NAFTA) countries, which are Canada, USA, and Mexico. In the NAFTA countries, the [North American Free Trade Agreement Certificate of Origin](#) document is used.

The Certificate of Origin document can be printed when a load or shipment is confirmed.

4.3.1 Layout

The multi-page Certificate of Origin for load and shipment provided for the Sterling nWMS PCA prints is displayed here:

Figure 4-4 Certificate of Origin, First Page

Table 4–2 Certificate of Origin

Field	Description
Authorized Signature	The signature of the shipping supervisor. This information appears only on the first page of the Certificate of Origin.
Company	The name of the enterprise. This information appears only on the first page of the Certificate of Origin.
Name	The name of the shipping supervisor signing the Certificate of Origin. This information appears only on the first page of the Certificate of Origin.
Title	The title of the shipping supervisor. This information appears only on the first page of the Certificate of Origin.
Date	The date when the certificate is signed. This information appears only on the first page of the Certificate of Origin.
Telephone	The telephone number of the enterprise. This information appears only on the first page of the Certificate of Origin.
Fax	The fax number of the enterprise. This information appears only on the first page of the Certificate of Origin.

You can use the Sterling nWMS PCA to configure the Certificate Of Origin label format for an Enterprise, Seller Organization, and Buyer Organization.

4.3.2 Typical Preferences

Label preferences for the Certificate of Origin are typically determined by the enterprise.

4.3.3 Default Preferences

The default label preferences for the Certificate of Origin are determined by the node and enterprise.

4.3.4 Print Size

A Certificate of Origin is printed on A4 paper.

A Certificate of Origin is printed in portrait layout.

4.3.5 Printer Type

A Certificate of Origin can be printed using any Windows printer.

4.3.6 Print Time

A Certificate of Origin for a shipment is generated when the manifest is closed for parcel shipments. A Certificate of Origin for a load is generated when the load is confirmed for TL and LTL shipments. They are then printed at the Pack Station.

A Certificate of Origin can also be printed upon request.

4.3.7 Print Location

A Certificate of Origin is printed at the printer that is associated with the Pack Station.

4.3.8 Print Documents

The Print Document associated with the Certificate of Origin is CERTIFICATE_OF_ORIGIN.

The Label Format provided with the Sterling nWMS PCA, for the Certificate of Origin, is CERTIFICATE_OF_ORIGIN_LABEL.

Here, <YFS_HOME> points to the <YANTRA_HOME>\Runtime directory.

4.3.10 Print Service

The services provided for printing the Certificate Of Origin are described in this section.

4.3.10.1 Print Service for Shipments

The service provided for printing the Certificate of Origin is the YNW_PrintCertificateOfOriginForShipments_75 service.

When the parcel manifest is closed, the On Success event of the Confirm Shipment transaction is raised, which invokes the YNW_PrintCertificateOfOriginForShipments_75 service.

The YNW_PrintCertificateOfOriginforShipments_75 service then initiates the printing of the Certificate of Origin.

To activate the YNW_PrintCertificateOfOriginForShipments_75 service:

1. Navigate to the Outbound Shipment Repository.
2. Navigate to the Transaction Repository.
3. Associate the On Success event with the YNW Shipment BOL(7.5) action, which invokes the YNW_PrintCertificateOfOriginForShipments_75 service

Note: The YNW_PrintCertificateOfOriginForShipments_75 service is activated by default.

4.3.10.2 Print Service for Load

The service provided for printing the Certificate of Origin for loads is `YNW_PrintCertificateOfOriginForLoads_75`.

When the parcel manifest is closed, the `On Success` event of the `Receive Intransit Updates for Load` transaction is raised, which invokes the `YNW_PrintCertificateOfOriginForLoads_75` service.

The `YNW_PrintCertificateOfOriginForLoads_75` service then initiates the printing of the Certificate Of Origin.

To activate the `YNW_PrintCertificateOfOriginforLoads_75` service:

1. Navigate to the Load Execution Repository.
2. Navigate to the Transaction Repository.
3. Associate the `On Success` event with the `YNW Print Load BOL(75)` action, which invokes the `YNW_PrintCertificateOfOriginForLoads_75` service.

4.3.11 Printing Manually

Certificate of Origin can also be printed manually upon user request.

4.3.11.1 Certificate of Origin for Shipments

You can manually print the Certificate of Origin for shipments from the Outbound Shipment Console.

To print a Certificate of Origin for shipments manually:

1. Navigate to `Outbound > Outbound Shipment Console`. The `Shipment By Status` search screen appears.
2. Enter the appropriate search criteria and click `Search`. The `Shipment List` screen appears.
3. In the `Shipment List` screen do either of the following:
 - Select the check box for the appropriate shipment.
 - Click the appropriate Shipment number.
4. Click `Print`. The `Print` popup window appears.
5. In the `Print` popup window,

- a. From the Print Service Name drop down list, select YNW_PrintCertificateOfOriginForShipments_75.
- b. From the Printer drop-down list, select the appropriate printer.
- c. In the No. of Copies text box, enter the number of copies to print.
- d. Click OK.

4.3.11.2 Certificate of Origin for Loads

You can manually print the Certificate of Origin from the Load Console.

To print a Certificate of Origin for loads manually:

1. Navigate to Outbound > Load Console. The Load By Summary search screen appears.
2. Enter the appropriate search criteria and click Search. The Load Console Summary screen appears.
3. In the Load Console Summary screen, select the check box for the appropriate ship mode. Click view details.
4. In the Load Console Summary screen do either of the following:
 - Select the check-box for the appropriate ship mode.
 - Click the appropriate Shipment number.
5. Click Print. The Print popup window appears.
6. In the Print popup window,
 - a. From the Print Service Name drop-down list, select YNW_PrintCertificateOfOriginforLoads_75.
 - b. From the Printer drop down list, select the appropriate printer
 - c. In the No. of Copies text box, enter the number of copies to print.
 - d. Click OK.

4.3.12 Additional Setup Required

There is no additional setup required to print this document.

4.4 Combined Picking and Packing Slip

The Combined Picking and Packing Slip is used as a combined pick list, packing slip, and invoice. It contains details for the pick location, item, and cost details.

This document is typically used in B2C (Business to Customer) kind of shipments, where an order placed by the customer gets shipped out completely as a single shipment. These shipments are not typically consolidated.

4.4.1 Layout

The Combined Picking and Packing Slip provided with the Sterling nWMS PCA prints is displayed here:

Table 4–3 Combined Picking and Packing Slip, FROM

Field	Description
FROM	The address from where the shipment is shipped.
TO	The address to which the shipment is shipped.
EMAIL	The EMAIL address of the person to which the shipment is shipped.
PHONE NO.	The phone number of the address to which the shipment is shipped.

Table 4–4 Combined Picking and Packing Slip, TO

Field	Description
ORDER NUMBER	The order number of the order associated with the shipment.
CARRIER SERVICE	The carrier service used to ship the containers.
CUSTOMER NAME	The name of the customer to whom the shipment is shipped.
ORDER DATE	The date on which the order is created.
GIFT INSTRUCTIONS	Gift instructions for the shipment or delivery handling, if any, to note when the shipment is being shipped.

Table 4–5 Combined Picking and Packing Slip

Field	Description
PICK LOCATION	The location in the warehouse from where the item is picked.
ITEM	The identifier of the items in the shipment.
DESCRIPTION	The description of the item.
UOM	The unit of measure for the item.
ORDERED QTY	The quantity of items ordered.
SHIPPED QTY	The quantity of items shipped.
UNIT PRICE(USD)	The unit price of the item.

Table 4–5 Combined Picking and Packing Slip

Field	Description
PRICE(USD)	The cost of the item shipped.
SUBTOTAL	The total cost of all the items shipped.
SHIPPING	The shipping cost of the shipment.
TAX	The tax involved in the shipment of the item.
DISCOUNT	The discount availed for the shipment.
TOTAL	The net cost (gross cost - discount) of the shipment.

You can use the Sterling nWMS PCA to configure the Combined Picking and Packing Slip label format for an Enterprise, Seller Organization, and Buyer Organization.

4.4.2 Typical Preferences

Label preferences for the Combined Picking and Packing Slip are typically determined by the enterprise.

4.4.3 Default Preferences

The default label preferences for the Combined Picking and Packing Slip are determined by the node and enterprise.

4.4.4 Print Size

Combined Picking and Packing Slip are printed on A4 paper.

Combined Picking and Packing Slip are printed in portrait layout.

4.4.5 Printer Type

Combined Picking and Packing Slip can be printed using any Windows printer.

4.4.6 Print Time

The Combined Picking and Packing Slips are pre-generated and staged At Wave Release. They can also be printed at the Pack Station when the carton of the shipment is scanned.

Combined Picking and Packing Slip can also be printed on request.

4.4.7 Print Location

The Combined Picking and Packing Slips are printed at the printer that is associated with the Pack Station.

4.4.8 Print Document

The default print document name associated with the Combined Picking and Packing Slip is YNW_PICK_PACKLIST.

The Label Format provided along with the Sterling nWMS PCA, for the Combined Picking and Packing Slip, are

YNW_PICK_PACKLIST_SINGLEPAGE and YNW_PICK_PACKLIST.

Note:

- If you want the Packing Slip for Single Page with Combined Picking and Packing Slip Details to be the default Packing Slip printed, select YNW_PICK_PACKLIST_SINGLEPAGE as your Default Label Format.
 - If you want the Packing Slip for Multi Page with Combined Picking and Packing Slip Details to be the default Packing Slip printed, select YNW_PICK_PACKLIST.

YFS_HOME>\template\prints\label\ynw

<YFS_HOME> points to the <YANTRA_HOME>\Runtime directory.

4.4.10 Print Service

The service provided for printing the Combined Picking and Packing Slip is `YNW_PrintCombinedPickingPackingSlip_75`.

When a shipment pack is completed, the On Shipment Pack Complete event of the Pack Container transaction is raised, which invokes the `YNW_PrintCombinedPickingPackingSlip_75` service.

The `YNW_PrintCombinedPickingPackingSlip_75` service then initiates the printing of the Packing Slip.

To activate the `YNW_PrintCombinedPickingPackingSlip_75` service:

1. Navigate to the Pack Process Repository.
2. Navigate to the Transaction Repository.
3. Associate the On Shipment Pack Complete event with the `PrintPackList` action, which invokes the `YNW_PrintCombinedPickingPackingSlip_75` service.

Note1: The `YNW_PrintCombinedPickingPackingSlip_75` service is activated by default.

Note2: In situations where a single order is not completely shipped (that is, if it has shortages), you may need to modify the pricing information. The Sterling nWMS PCA provides the `ModifyPackListInfoUE` user exit. You can implement this user exit to provide modified pricing information, if needed. This pricing information is printed in the Combined Picking and Packing Slip.

4.4.11 Printing Manually

The Combined Picking and Packing Slips can also be printed manually upon user request. You can print the Packing Slip from the Outbound Shipment Console.

To print a Packing Slip manually:

1. Navigate to Outbound > Outbound Shipment Console. The Shipment By Status search screen appears.
2. Enter the appropriate search criteria and click Search. The Shipment List screen appears.

3. In the Shipment List screen do either of the following:
 - Select the check box against the appropriate shipment.
 - Click the appropriate shipment number.
4. Click Print. The Print popup window appears.
5. In the Print popup window,
 - a. From the Print Service Name drop down list, select YNW_PrintCombinedPickingPackingSlip_75 for Combined Picking and Packing Slip shipments.
 - b. From the Printer drop down list, select the appropriate printer.
 - c. In the No. of Copies text box, enter the number of copies to print.
 - d. Click OK.

4.4.12 Additional Setup Required

There is no additional setup required to print this document.

4.5 Commercial Invoice

The Commercial Invoice is a document must accompany all International Shipments in order to be cleared by customs in the receiving country.

4.5.1 Layout

The multi-page Commercial Invoice for loads and shipments provided with the Sterling nWMS PCA prints is displayed here:

Table 4–6 Commercial Invoice for Shipments

Field	Description				
COMMERCIAL INVOICE NO.	The invoice number of the commercial invoice.				
DATE OF EXPORTATION	The date on which the goods are shipped from the warehouse.				
EXPORT REFERENCES	<table border="1"> <tr> <td>ORDER NO(S)</td><td>The identifying number for the order.</td></tr> <tr> <td>CUSTOMER ID</td><td>The identifier of the customer.</td></tr> </table>	ORDER NO(S)	The identifying number for the order.	CUSTOMER ID	The identifier of the customer.
ORDER NO(S)	The identifying number for the order.				
CUSTOMER ID	The identifier of the customer.				
SHIPPER/EXPORTER	The address from which the shipment is shipped.				
TAX IDENTIFICATION NUMBER	The taxpayer identifier for the ship node if the shipment is meant for export.				
COUNTRY OF EXPORT	The country from which the shipment is shipped.				
COUNTRY OF ORIGIN OF GOODS	The name of the country where the goods are manufactured.				
COUNTRY OF ULTIMATE DESTINATION	The country of ultimate destination, as shown on the export license.				
TYPE OF PACKAGING	<p>The type of Packaging of the Shipment or Load.</p> <p>The packaging is PARCEL for Commercial Invoice for Shipment and CARTON for Commercial Invoice for Load.</p>				
CONSIGNEE	The address of the consignee to whom the shipment is shipped.				
IMPORTER IF OTHER THAN CONSIGNEE	<p>If the shipment is shipped to a different address other than the address of the consignee, the importer's address displays.</p> <p>This displays only upon consignee's request.</p>				
EXPORTING CARRIER	The name of the carrier transporting the merchandise out of the country.				
INTERNATIONAL AIR WAYBILL NO.	The airway bill number for the air shipments.				
MARKS/NOS	The container SCM for the shipment.				

Table 4–6 Commercial Invoice for Shipments

Field	Description
NO. OF PKGS	The total number of packages in the shipment.
FULL DESCRIPTION OF GOODS	The complete description of the items in the shipment.
QUANTITY	The number of units of the item.
UNIT OF MEASURE	The unit of measure of the item.
WEIGHT ()	The weight of the shipment in pounds.
UNIT VALUE (USD)	The unit value of the item (specified in US Dollars).
TOTAL VALUE (USD)	The total value of the shipment (specified in US Dollars).
Totals	Displays the invoice totals for NO.OF PKGS, QUANTITY, WEIGHT, and TOTAL VALUE. This information appears only on the last page of the Commercial Invoice.
Circle One	Circle one of the following freight terms: F.O.B: Free On Board C&F: Cost and Freight C.I.F: Cost Insurance and Freight If the freight terms are other than those listed, circle OTHERS and enter the appropriate freight term. This information appears only on the last page of the Commercial Invoice.
Signature of shipper/exporter	The signature of the shipping supervisor. This information appears only on the last page of the Commercial Invoice.
Date	The date on which the invoice is signed. This information appears only on the last page of the Commercial Invoice.

You can use the Sterling nWMS PCA to configure the Commercial Invoice label format for an Enterprise, Seller Organization, and Buyer Organization.

4.5.2 Typical Preferences

Label preferences for the Commercial Invoice are typically determined by the enterprise.

4.5.3 Default Preferences

The default label preferences for the Commercial Invoice are determined by the node and enterprise.

4.5.4 Print Size

Commercial Invoices are printed on A4 paper.

Commercial Invoices are printed in portrait layout.

4.5.5 Printer Type

Commercial Invoices can be printed using any Windows printer.

4.5.6 Print Time

A Commercial Invoice for shipments is generated when the manifest is closed for parcel shipments. A Commercial Invoice for loads is generated when load is confirmed for TL and LTL shipments. They are then printed at the Pack Station.

Commercial Invoices can also be printed upon request.

4.5.7 Print Location

Commercial Invoices are printed at the printer that is associated with the Pack Station.

4.5.8 Print Documents

The Print Document associated with the Commercial Invoice is `COMMERCIAL_INVOICE_DOCUMENT`.

The Label Format provided with the Sterling nWMS PCA, for the Commercial Invoice, is `COMMERCIAL_INVOICE_DOCUMENT`.

The YNW_CommercialInvoice_SinglePage.lwl and YNW_CommercialInvoice_SinglePage_Map.xml files are stored:

<YFS_HOME>\template\prints\label\ynw

Here, <YFS_HOME> points to the <YANTRA_HOME>\Runtime directory.

4.5.9.2 Commercial Invoice for Multiple Page

The Label Format Name for the Commercial Invoice for Multiple Page is YNW_Commercial_Invoice_Multi_Page.

The Default Label Format File Name for the Commercial Invoice for Multiple Page is YNW_Commercial_Invoice_Multi_Page.lwl.

The Mapping XML File Name for the Commercial Invoice for Multiple Page is YNW_Commercial_Invoice_Multi_Page_Map.xml.

4.5.10 Print Service

The services provided for printing Commercial Invoice are

4.5.10.1 Commercial Invoice for Shipments

The service provided for printing Commercial Invoices for shipments is YNW_PrintCommercialInvoiceForShipments_75.

When the parcel manifest is closed, the On Success event of the Confirm Shipment transaction is raised, which invokes the YNW_PrintCommercialInvoiceForShipments_75 service.

The YNW_PrintCommercialInvoiceForShipments_75 service then initiates the printing of the Commercial Invoice.

To activate the YNW_PrintCommercialInvoiceForShipments_75 service:

1. Navigate to the Outbound Shipment Repository.
2. Navigate to the Transaction Repository.
3. Associate the On Success event with the YNW Shipment BOL(75) action, which invokes the YNW_PrintCommercialInvoiceForShipments_75 service.

Note: The YNW_PrintCommercialInvoiceForShipments_75 service is activated by default.

4.5.10.2 Commercial Invoice for Load

The service provided for printing Commercial Invoices for loads is `YNW_PrintCommercialInvoiceForLoads_75`.

When the parcel manifest is closed, the `On Success` event of the `Receive Intransit Updates for Load` transaction is raised, which invokes the `YNW_PrintCommercialInvoiceForLoads_75` service.

The `YNW_PrintCommercialInvoiceForLoads_75` service then initiates the printing of the Commercial Invoice.

To activate the `YNW_PrintCommercialInvoiceForLoads_75` service:

1. Navigate to the Load Execution Repository.
2. Navigate to the Transaction Repository.
3. Associate the `On Success` event with the `YNW Print Load BOL(75)` action, which invokes the `YNW_PrintCommercialInvoiceForLoads_75` service.

4.5.11 Printing Manually

Commercial Invoice can also be printed manually on user request.

4.5.11.1 Commercial Invoice for Shipments

You can manually print Commercial Invoices for shipments from the Outbound Shipment Console.

To print a Commercial Invoice for shipments manually:

1. Navigate to `Outbound > Outbound Shipment Console`. The `Shipment By Status` search screen appears.
2. Enter the appropriate search criteria and click `Search`. The `Shipment List` screen appears.
3. In the `Shipment List` screen do either of the following:
 - Select the check-box for the appropriate shipment
 - Click the appropriate Shipment number.
4. Click `Print`. The `Print` popup window appears.
5. In the `Print` popup window,

- a. From the Print Service Name drop-down list, select `YNW_PrintCommercialInvoiceForShipments_75`.
- b. From the Printer drop-down list, select the appropriate printer.
- c. In the No. of Copies text box, enter the number of copies to print.
- d. Click OK.

4.5.11.2 Commercial Invoice for Loads

You can manually print Commercial Invoices for loads from the Load Console.

To print a Commercial Invoice for loads manually:

1. Navigate to Outbound > Load Console. The Load By Summary search screen appears.
2. Enter the appropriate search criteria and click Search. The Load Console Summary screen appears.
3. In the Load Console Summary screen, select the check-box for the appropriate ship mode. Click view details.
4. In the Load Console Summary screen do either of the following:
 - Select the check-box for the appropriate ship mode.
 - Click the appropriate Shipment number.
5. Click Print. The Print popup window appears.
6. In the Print popup window,
 - a. From the Print Service Name drop-down list, select `YNW_PrintCommercialInvoiceForLoads_75`.
 - b. From the Printer drop-down list, select the appropriate printer.
 - c. In the No. of Copies text box, enter the number of copies to print.
 - d. Click OK.

4.5.12 Additional Setup Required

There is no additional setup required to print this document.

4.6 Item Pick Task List

The Item Pick Task List provides task details for a batch to enable the operators to execute picking. The task list contains details of Item, From Location, To Location, and Quantity.

The task list can be printed automatically at Wave Release.

4.6.1 Layout

The Item Pick Task List provided the Sterling nWMS PCA prints is displayed here:

Figure 4–16 Item Pick Task List

Table 4–7 Item Pick Task List

Field	Description
WHSE	The warehouse where the tasks are executed.
BATCH #	The batch number associated with the task.

Table 4–7 Item Pick Task List

Field	Description
Wave #	The wave number associated with the task. The wave number is printed if the batch is associated with a wave.
Shipment #	The shipment number associated with the task. The shipment number is printed if the batch belongs to a single shipment.
From Location/ From LPN	The location or LPN from where the item is picked.
Item/Serial No.	The identifier of the item or serial number.
UOM	The unit of measure for the item.
Item Description	The description of the item.
Qty	The number of units of the item to pick.
To Location	The location where the items should be deposited.
Tag Details	The tag details for the item, such as lot number, batch number, and revision number.
Picked By	The user who executed the tasks.
Checked By	The user who inspected the items.
Confirmed By	The user who confirmed the tasks.

You can use the Sterling nWMS PCA to configure the Item Pick Task List custom label format for an Enterprise, Seller Organization, and Buyer Organization.

4.6.2 Typical Preferences

Label preferences for the Item Pick Task List are typically determined by the node.

4.6.3 Default Preferences

The default label preferences for the Item Pick Task List are determined by the node and the equipment type.

4.6.4 Print Size

Item Pick Task Lists are printed on A4 paper.

Item Pick Task Lists are printed in landscape layout.

4.6.5 Printer Type

Item Pick Task Lists can be printed using any Windows printer.

4.6.6 Print Time

Item Pick Task Lists are printed when putaway tasks are generated after the receipt is closed.

Item Pick Task Lists can also be printed upon request.

4.6.7 Print Location

The Item Pick Task Lists are printed at the printer specified while setting the printer preferences.

Note: Sterling Commerce recommends that you set the printer preferences to print the lists at the printer that is closest to the work area.

4.6.8 Print Document

The Print Document associated with the Item Pick Task List is TASKLIST.

The Label Format provided with the Sterling nWMS PCA, for the Item Pick Task List, is ITEM_PICK_BATCHSHEET.

The Item_Pick_BatchSheet.lwl and ItemPickBatchSheetMap.xml files are stored at:

<YFS_HOME>\template\prints\label

Here, <YFS_HOME> points to the <YANTRA_HOME>\Runtime directory.

4.6.10 Print Service

The service provided for printing the Putaway Task List is `PrintMoveTickets`.

When a shipment pack is completed, the `On Success` event of the `Release Move Request` transaction is raised, which invokes the `PrintMoveTickets` service.

The `PrintMoveTickets` service then initiates the printing of the Item Pick Task List is:

To activate the `PrintMoveTickets` service:

1. Navigate to the Move Request Execution Repository
2. Navigate to the Transaction Repository
3. Associate the `On Success` event with the `Print Move Tickets` action, which invokes the `PrintMoveTickets` service.

4.6.11 Printing Manually

Item Pick Task Lists can also be printed manually upon user request. You can print the Item Pick Task List from the Task Console.

To print an Item Pick Task List manually:

1. Navigate to Task > Task Console. The Task By Task Type search screen appears.
2. From the entities menu choose the Batch option. The Batch By All Attributes search screen appears.
3. Enter the appropriate search criteria and click Search. The Batch List screen appears.
4. In the Batch List screen do either of the following:
 - Select the check-box for the appropriate batch.
 - Click the appropriate Batch number.
5. Click Print. The Print popup window appears.
6. In the Print popup window,
 - a. From the Print Service Name drop down list, select `PrintTaskkList`.
 - b. From the Printer drop-down list, select the appropriate printer.

- c. In the No. of Copies text box, enter the number of copies to print.
- d. Click OK.

4.6.12 Additional Setup Required

There is no additional setup required to print this document.

4.7 LTL Manifest

The LTL Manifest is generated by the shipper for shipments that are shipped through Less than Truck Load (LTL) carriers to an intermediate location, such as a distribution center or consolidator. Some Parcel Carriers also provide LTL services.

The LTL Manifest is printed upon confirmation of the load.

If the shipment contains hazardous materials. The [Hazmat Manifest](#) print is generated automatically.

4.7.1 Layout

The LTL Manifest provided with the Sterling nWMS PCA prints is displayed here:

Figure 4–19 LTL Manifest

LTL MANIFEST				PAGE 1 OF 2 10/21/05		
Manifest # : 100000450 Manifest Date : 10/21/2005 Shipping Warehouse : TF-ADDRESS-LINE TF-ADDRESS-LINE AUBURN WASHINGTON 01001 US				Carrier : FEDX Trailer # :

Table 4–8 LTL Manifest

Field	Description
Manifest#	The manifest number.
Manifest Date	The date on which the item is manifested.
Shipping Warehouse	The address of the shipping warehouse.
Carrier	The carrier used to ship the containers.
Trailer#	The number on the trailer.

Table 4–9 LTL Manifest

Field	Description
BOL#	The BOL number.
PRO#	The PRO number.
Customer	The name of the customer.
Address	The address of the ship node.
Total Weight LBS	The total weight of the cartons in pounds.
No. of Cartons	The number of cartons within the shipment.
No. of Pallets	The number of pallets within the shipment.

You can use the Sterling nWMS PCA to configure the LTL Manifest label format for an Enterprise, Seller Organization, and Buyer Organization.

4.7.2 Typical Preferences

Label preferences for the LTL Manifest are typically determined by the node and the carrier.

4.7.3 Default Preferences

The default label preferences for the LTL Manifest are determined by the node and the carrier.

4.7.4 Print Size

LTL Manifests are printed on A4 paper.

LTL Manifests are printed in landscape layout.

4.7.5 Printer Type

LTL Manifests can be printed using any Windows printer.

4.7.6 Print Time

LTL Manifests are generated and staged at close manifest.

LTL Manifests can also be printed upon request.

4.7.7 Print Location

LTL Manifest are printed at the printer configured.

4.7.8 Print Documents

The Print Document associated with the LTL Manifest is `LTL_MANIFEST`.

The Label Format shipped along with the Sterling nWMS PCA, for the LTL Manifest, is `LTL_MANIFEST`.

The `LTL_Manifest.lwl` and `LTLManifestMap.xml` files are stored at the location:

`<YFS_HOME>\template\prints\label`

Here, `<YFS_HOME>` points to the `<YANTRA_HOME>\Runtime` directory.

4.7.10 Print Service

The service provided for printing the LTL Manifest is `Print LTLManifest`.

When a shipment pack is completed, the `On Success` event of the `Close Manifest` transaction is raised, which invokes the `PrintLTLManifest` service.

The `PrintLTLManifest` service then initiates the printing of the LTL Manifest.

To activate the `PrintLTLManifest` service:

1. Navigate to the Manifesting Repository
2. Navigate to the Transaction Repository
3. Associate the `On Success` event with the `Print LTL Manifest` action, which invokes the `PrintLTLManifest` service.

4.7.11 Printing Manually

LTL Manifest can also be printed manually on user request. You can print the LTL Manifest from the Outbound Shipment Console.

To print a LTL Manifest manually:

1. Navigate to `Outbound > Outbound Shipment Console`. The `Shipment By Status Type` search screen appears.
2. Enter the appropriate search criteria and click `Search`. The `Shipment List` screen appears.
3. In the `Shipment List` screen do either of the following:
 - Select the check box against the appropriate Shipment
 - Click the appropriate Shipment#.
4. Click `Print`. The `Print` popup window appears.
5. In the `Print` popup window,

- a. From the Print Service Name drop-down list, select Print LTLManifest.
- b. From the Printer drop-down list, select the appropriate printer.
- c. In the No. of Copies text box, enter the number of copies to print.
- d. Click OK.

Note: The label is always printed in two pages.

4.7.12 Additional Setup Required

There is no additional setup required to print this document.

4.7.13 Hazmat Manifest

A Shipper's Declaration is auto generated when a shipment manifest contains hazardous materials.

4.7.13.1 Layout

The Hazmat Manifest that the Sterling nWMS PCA prints is displayed here:

Table 4–10 Shipper’s Declaration.

Field	Description
EMERGENCY CONTACT PHONE NUMBER	The phone number for the person to contact in the event of emergency. This is manually entered by the shipping supervisor.
FROM	The address from where the shipment originates.
DESCRIPTION OF MATERIAL	The description of the material being shipped.
HAZARD CLASS	The classification to which the hazardous material belongs.
PACKING GROUP	The packing group to which the material belongs.
I.D. NO.	The UN number of the shipment.

Table 4–10 Shipper’s Declaration.

Field	Description
DOT LABEL CODE	The label code of the shipment as registered with the department of transportation.
WT./VOL	The weight per volume.
PRO #	The PRO number assigned to identify freight bills.
RECEIVER’S NAME DESTINATION-CITY	The name and the address of the receiver.
STATE	The state to which the shipment is shipped.
Shipper’s Signature	The signature of the shipping supervisor.
Date	The date on which the shipper’s declaration is signed by the shipping supervisor.

4.8 Multi-SKU UCC-128 Container Shipping Label

Multi-SKU UCC-128 Container Shipping Labels have Serial Shipping Container Code (SSCC) bar codes to track the container and its contents.

This label is printed when there is more than one SKU in the container. The label can be printed during Packing or at Wave Release. The label can also be printed upon request.

4.8.1 Layout

The Multi-SKU UCC-128 Container Shipping Label provided with the Sterling nWMS PCA prints is displayed here:

Figure 4–23 Multi-SKU UCC-128 Container Shipping Label

Table 4–11 Multi-SKU UCC-128 Container Shipping Label

Field	Description
FROM	The address from where the shipment originates.
TO	The address to where the shipment is shipped.
SHIP TO POST	The carrier routing bar code.
CARRIER	The carrier used to ship the container.
SHIPMENT #	The shipment number to which the container belongs.

Field	Description
BATCH	The batch number to which the container belong.
Slot No.	The slot in which the container is placed.
PO	The purchase order number to which the shipment belongs.
DEPT	The department code associated with the shipment, if any.
ITEM	The identifier of the item.
CUST SKU	The customer's identifier for the item.
QTY	The item quantity contained in the container.
FOR	The bar code associated with any sorting done at or for the destination address. Typically, this has the store number when the ship-to address is a merge point for the customer.
MARK FOR	This is in human readable format indicating the sort performed for or at the destination address. Typically, the store number, or name of the person, or department is printed.
SSCC	<p>The Serial Shipping Container Code (SSCC) bar code used to track the container and its contents.</p> <p>The SSCC is a 20 digit code comprised of the sellers EAN/UCC number and a sequence number. It is a mandatory field for UCC/EAN compliance.</p>

You can use the Sterling nWMS PCA to configure the Multi-SKU UCC-128 Container Shipping Label format for an Enterprise, Seller Organization, and Buyer Organization.

4.8.2 Typical Preferences

Label preferences for the Multi-SKU UCC-128 Container Shipping Label are typically determined by the enterprise.

4.8.3 Default Preferences

The default label preferences for the Multi-SKU UCC-128 Container Shipping Labels are determined by the node and enterprise.

4.8.4 Print Size

Multi-SKU UCC-128 Container Shipping Labels are printed on a 4" X 6" label sheet paper.

4.8.5 Printer Type

Multi-SKU UCC-128 Container Shipping Labels can be printed using a Zebra printer.

4.8.6 Print Time

For pre-pick containerization, Multi-SKU UCC-128 Container Shipping Labels are printed at Wave Release.

For post-pick containerization, Multi-SKU UCC-128 Container Shipping Labels are printed at the Pack Station when the last carton of the shipment is scanned.

Multi-SKU UCC-128 Container Shipping Labels can also be printed upon request.

4.8.7 Print Location

Multi-SKU UCC-128 Container Shipping Labels are printed at the printer that is associated with the Pack Station.

4.8.8 Print Document

The Print Document associated with the Multi-SKU UCC-128 Container Shipping Label is CONTAINER_LABEL.

The Label Format provided with the Sterling nWMS PCA, for the Multi-SKU UCC-128 Container Shipping Label, is CONTAINER_LABEL_MULTI_SKU.

Figure 4–24 Print Document for Multi-SKU UCC-128 Container Shipping Label

The `UCC128_MultiSKU_ShippingLabel.lwl` and `UCC128MultiSKUShippingLabelMap.xml` files are stored at:

`<YFS_HOME>\template\prints\label`

Here, `<YFS_HOME>` points to the `<YANTRA_HOME>\Runtime` directory.

4.8.10 Print Service

4.8.10.1 Print Service for Shipments

The service provided for printing Multi-SKU UCC-128 Container Shipping Labels for shipments is `PrintShipmentContainerLabels`.

When a shipment is completely packed, the `On Success` event of the `Pack Shipment Complete` transaction is raised, which invokes the `PrintShipmentContainerLabels` service.

The `PrintShipmentContainerLabels` service then initiates the printing of the Multi-SKU UCC-128 Container Shipping Label.

To activate the `PrintShipmentContainerLabels` service:

1. Navigate to the Outbound Shipment Repository.
2. Navigate to the Transaction Repository.
3. Create an action.
4. Associate the `On Success` event with the action created in step-3, which invokes the `PrintShipmentContainerLabels` service.

4.8.10.2 Print Service for Container

The service provided for printing Multi-SKU UCC-128 Container Shipping Labels for containers is `PrintShippingLabel`.

When a shipment pack is completed, the `On Container Pack Complete` event of the `Pack Container` transaction is raised, which invokes the `PrintShippingLabel` service.

The `PrintShippingLabel` service then initiates the printing of the Multi-SKU UCC-128 Container Shipping Label.

To activate the `PrintShippingLabel` service:

1. Navigate to the Pack Process Repository.

2. Navigate to the Transaction Repository.
3. Associate the On Container Pack Complete event with the `PrintShippingLabel` action, which invokes the `PrintShippingLabel` service.

Note: The `PrintShippingLabel` service is activated by default.

4.8.11 Printing Manually

Multi-SKU UCC-128 Container Shipping Labels can also be printed manually upon user request.

4.8.11.1 Multi-SKU UCC-128 Container Shipping Labels for Shipments

You can print the Multi-SKU UCC-128 Container Shipping Labels from the Outbound Shipment Console.

To print a Multi-SKU UCC-128 Container Shipping Labels manually:

1. Navigate to Outbound > Outbound Shipment Console. The Shipment By Status search screen appears.
2. Enter the appropriate search criteria and click Search. The Shipment List screen appears.
3. In the Shipment List screen do either of the following:
 - Select the check box against the appropriate shipment
 - Click the appropriate Shipment number.
4. Click Print. The Print popup window appears.
5. In the Print popup window,
 - a. From the Print Service Name drop-down list, select `PrintShipmentContainerLabels`
 - b. From the Printer drop-down list, select the appropriate printer
 - c. In the No. of Copies text box, enter the number of copies to print
 - d. Click OK.

4.8.11.2 Multi-SKU UCC-128 Container Shipping Labels for Container

You can print the Multi-SKU UCC-128 Container Shipping Labels from the Outbound Shipment Console.

To print a Multi-SKU UCC-128 Container Shipping Labels manually:

1. Navigate to Outbound > Outbound Shipment Console. The Shipment By Status search screen appears.
2. Enter the appropriate search criteria and click Search. The Shipment List screen appears.
3. In the Shipment List screen do either of the following:
 - Select the check-box for the appropriate shipment
 - Click the appropriate shipment number.
4. Click Print. The Print popup window appears.
5. In the Print popup window,
 - a. From the Print Service Name drop down list, select `PrintShippingLabel`
 - b. From the Printer drop-down list, select the appropriate printer.
 - c. In the No. of Copies text box, enter the number of copies to print.
 - d. Click OK.

4.8.12 Additional Setup Required

There is no additional setup required to print this document.

4.9 North American Free Trade Agreement Certificate of Origin

The North American Free Trade Agreement (NAFTA) Certificate of Origin document is used within the NAFTA countries (Canada, USA, and Mexico) to indicate the country where the product is made.

In other countries, the Certificate of Origin document is used.

The NAFTA Certificate of Origin document can be printed when a load or shipment is confirmed.

This document is printed on A4 paper.

4.9.1 Layout

The NAFTA Certificate of Origin for loads and shipments provided with the Sterling nWMS PCA prints is displayed here:

Table 4–12 North American Free Trade Agreement Certificate of Origin

Field	Description
PREFERENCE CRITERION	<p>The typical preference criteria is A,B,C,D,E,F.</p> <p>A-The good is "wholly obtained or produced entirely" in one or more of the NAFTA countries.</p> <p>B-The good is produced entirely in the territory of one or more of the NAFTA countries and satisfies the specific rule of origin.</p> <p>C-The good is produced entirely in the territory of one or more of the NAFTA countries exclusively from originating materials.</p> <p>D-The good is produced entirely in the territory of one or more of the NAFTA countries, but does not meet the applicable rule of origin.</p> <p>E-Certain goods and their parts that do not originate in the territory are considered originating upon importation into the territory of a NAFTA country and the most-favored-nation tariff rate of is applicable to the good.</p> <p>F-The good is an originating agricultural good under A, B or C above and is not subject to quantitative restriction in the importing NAFTA country.</p>
PRODUCER	<p>Yes-if the good is produced in the country.</p> <p>No- If the good is not produced in the country followed by 1, 2 or 3.</p> <p>1-The exporter's knowledge of whether the good qualifies as an originating good.</p> <p>2-Exporter's reliance on the producer's written representation that the good qualifies as an originating good.</p> <p>3-Completed and signed certificate for the good.</p>
NET COST	<p>The net cost of the good. Valid values are NC if the RVC is calculated according to the net cost method. Otherwise, indicate NO. If the RVC is calculated over a period of time, enter the beginning and ending dates for that period.</p>

Table 4–12 North American Free Trade Agreement Certificate of Origin

Field	Description
COUNTRY OF ORIGIN	The name of the country where the goods are manufactured.
AUTHORIZED SIGNATURE	The signature of the shipping supervisor. This information appears only on the first page of the North American Free Trade Agreement Certificate of Origin.
COMPANY	The name of the enterprise. This information appears only on the first page of the North American Free Trade Agreement Certificate of Origin.
NAME	The name of the shipping supervisor signing the certificate of origin. This information appears only on the first page of the North American Free Trade Agreement Certificate of Origin.
TITLE	The title of the shipping supervisor. This information appears only on the first page of the North American Free Trade Agreement Certificate of Origin.
DATE(MM/DD/YYYY)	The date when the certificate is signed. This information appears only on the first page of the North American Free Trade Agreement Certificate of Origin.
TELEPHONE NUMBER	The telephone number of the exporter. This information appears only on the first page of the North American Free Trade Agreement Certificate of Origin.

You can use the Sterling nWMS PCA to configure the North American Free Trade Agreement Certificate Of Origin label format for an Enterprise, Seller Organization, and Buyer Organization.

4.9.2 Typical Preferences

Label preferences for the NAFTA Certificate of Origin are typically determined by the enterprise.

4.9.3 Default Preferences

The default label preference for the NAFTA Certificate of Origin is determined by the node and enterprise.

4.9.4 Print Size

A NAFTA Certificate of Origin is printed on an A4 sheet paper.

A NAFTA Certificate of Origin is printed in portrait layout.

4.9.5 Printer Type

A NAFTA Certificate of Origin can be printed using any Windows printer.

4.9.6 Print Time

A NAFTA Certificate of Origin for shipment is generated when the manifest is closed for parcel shipments. A NAFTA Certificate of Origin for load is generated when load is confirmed for TL and LTL shipments. They are then printed at the Pack Station.

A NAFTA Certificate of Origin can also be printed upon request.

4.9.7 Print Location

A NAFTA Certificate of Origin is printed at the printer that is associated with the Pack Station.

4.9.8 Print Documents

The Print Document associated with the NAFTA Certificate of Origin is NAFTA_CERTIFICATE_OF_ORIGIN.

The Label Format shipped along with the Sterling nWMS PCA, for the Certificate of Origin, is NAFTA_CERTIFICATE_OF_ORIGIN.

The YNW_NAFTA_CertificateOfOrigin.lwl and YNW_NAFTA_CertificateOfOrigin_Map.xml files are stored at the location:

<YFS_HOME>\template\prints\label\ynw

Here, <YFS_HOME> points to the <YANTRA_HOME>\Runtime directory.

4.9.10 Print Service

4.9.10.1 Print Service for Shipments

The service provided for printing the Certificate of Origin for shipments is YNW_PrintCertificateOfOriginForShipments_75.

When the parcel manifest is closed, the On Success event of the Confirm Shipment transaction is raised, which invokes the YNW_PrintCertificateOfOriginForShipments_75 service.

The YNW_PrintCertificateOfOriginForShipments_75 service then initiates the printing of the NAFTA Certificate of Origin.

To activate the YNW_PrintCertificateOfOriginForShipments_75 service:

1. Navigate to the Outbound Shipment Repository.
2. Navigate to the Transaction Repository.
3. Associate the On Success event with the YNW Shipment BOL(75) action, which invokes the YNW_PrintCertificateOfOriginForShipments_75 service.

Note: The YNW_PrintCertificateOfOriginForShipments_75 service is activated by default.

4.9.10.2 Print Service for Load

The service provided for printing the Certificate of Origin for loads is YNW_PrintCertificateOfOriginForLoads_75.

When the parcel manifest is closed, the On Success event of the Receive Intransit Updates for Load transaction is raised, which invokes the YNW_PrintCertificateOfOriginForLoads_75 service.

The YNW_PrintCertificateOfOriginForLoads_75 service then initiates the printing of the NAFTA Certificate of Origin.

To activate the YNW_PrintCertificateOfOriginForLoads_75 service:

1. Navigate to the Load Execution Repository.
2. Navigate to the Transaction Repository.
3. Associate the On Success event with the YNW Print Load BOL(75) action, which invokes the YNW_PrintCertificateOfOriginForLoads_75 service.

Note: The YNW_PrintCertificateOfOriginForLoads_75 service is activated by default.

4.9.11 Printing Manually

The NAFTA Certificate of Origin can also be printed manually on user request.

4.9.11.1 NAFTA Certification of Origin For Shipments

You can print the NAFTA Certificate of Origin from the Outbound Shipment Console.

To print a Certificate of Origin for Shipments manually:

1. Navigate to Outbound > Outbound Shipment Console. The Shipment By Status search screen appears.
2. Enter the appropriate search criteria and click Search. The Shipment List screen appears.
3. In the Shipment List screen do either of the following:
 - Select the check box against the appropriate shipment
 - Click the appropriate Shipment #.
4. Click Print. The Print popup window appears.
5. In the Print popup window,
 - a. From the Print Service Name drop down list, select YNW_PrintCertificateOfOriginforShipments_75
 - b. From the Printer drop down list, select the appropriate printer

- c. In the No. of Copies text box, enter the number of copies to print
- d. Click OK.

4.9.11.2 NAFTA Certificate of Origin for Loads

You can print the NAFTA Certificate of Origin for loads from the Load Console.

To print a Certificate of Origin for loads manually:

1. Navigate to Outbound > Load Console. The Load By Summary search screen appears.
2. Enter the appropriate search criteria and click Search. The Load Console Summary screen appears.
3. In the Load Console Summary screen, Select the check box against the appropriate ship mode. Click view details.
4. In the Load Console Summary screen do either of the following:
 - Select the check box against the appropriate ship mode
 - Click the appropriate shipment number.
5. Click Print. The Print popup window appears.
6. In the Print popup window,
 - a. From the Print Service Name drop-down list, select `YNW_PrintCertificateOfOriginforLoads_75`
 - b. From the Printer drop down list, select the appropriate printer.
 - c. In the No. of Copies text box, enter the number of copies to print.
 - d. Click OK.

4.9.12 Additional Setup Required

There is no additional setup required to print this document.

4.10 Packing Slip

A Packing Slip is a document that is sent out from the warehouse to the customer, indicating the contents of the shipment.

The Packing Slip displays shipment lines that are ready to be shipped. It also contains the Ship From and Ship To addresses, freight terms, carrier information, and other information. The Packing Slip accompanies the shipment.

4.10.1 Layout

The Packing Slip provided by the Sterling nWMS PCA prints is displayed here:

Figure 4-30 Packing Slip

Batch No	The batch number to which the shipment belongs.				

Table 4–14 Packing Slip, SHIPPING INFORMATION

Field	Description
Line	The order line number for the item.
Cust PO#	The customer's purchase order number.
Product No.	The identifier of the item.
Cust Item No.	The identifier for the item of the customer.
Description	The description of the item.
UOM	The unit of measure for the item.
Qty Ord	The number of line items ordered.
Qty Ship	The shipped quantity.
Qty B/O	The backordered quantity.

You can use the Sterling nWMS PCA to configure the Packing Slip label format for an Enterprise, Seller Organization, and Buyer Organization.

4.10.2 Typical Preferences

Label preferences for the Packing Slip are typically determined by the enterprise.

4.10.3 Default Preferences

The default label preferences for the Packing Slip are determined by the node and enterprise.

4.10.4 Print Size

Packing Slips are printed on A4 paper.

Packing Slips are printed in portrait layout.

4.10.5 Printer Type

Packing Slips can be printed using any Windows printer.

4.10.6 Print Time

Packing Slips are pre-generated and staged at Wave Release. They are then printed at the Pack Station when the last carton of the shipment is scanned.

Packing Slips can also be printed on request.

Note: If you do not follow system-suggested containerization and if you require the Packing Slip to display container information, ensure that packing slips are not pre-generated and staged at Wave Release. This will enable the correct container details to be printed in the Packing Slip.

To ensure that packing slips are not pre-generated and staged at Wave Release, customize the YNW_PrintWave_7.5 service such that it does not pre-generate and stage the Packing Slip at Wave Release. For more information about customizing the YNW_PrintWave_7.5 service, see the *Sterling Supply Chain Applications Integration Guide*.

4.10.7 Print Location

Packing Slips are printed at the printer that is associated with the Pack Station.

4.10.8 Print Documents

The Print Document associated with the Packing Slip is `PACKLIST`.

The Label Format provided with the Sterling nWMS PCA, for the Packing Slip, is `PACKLIST`.

The `PackList.lwl` and `PackListMap.xml` files are stored:

`<YFS_HOME>\template\prints\label`

Here, `<YFS_HOME>` points to the `<YANTRA_HOME>\Runtime` directory

4.10.10 Print Service

The service provided for printing the Packing Slip is `Print PackList`.

When a shipment pack is completed, the `On Shipment Pack Complete` event of the `Pack Container` transaction is raised, which invokes the `Print PackList` service.

The `Print PackList` service then initiates the printing of the Packing Slip.

To activate the `Print PackList` service:

1. Navigate to the `Pack Process Repository`
2. Navigate to the `Transaction Repository`
3. Associate the `On Shipment Pack Complete` event with the `Print PackList` action, which invokes the `Print PackList` service

Note: The `Print PackList` service is activated by default.

4.10.11 Printing Manually

Packing slips can also be printed manually on user request. You can print the Packing Slip from the Outbound Shipment Console.

To print a Packing Slip manually:

1. Navigate to `Outbound > Outbound Shipment Console`. The `Shipment By Status` search screen appears.
2. Enter the appropriate search criteria and click `Search`. The `Shipment List` screen appears.
3. In the `Shipment List` screen do either of the following:
 - Select the check box against the appropriate shipment.
 - Click the appropriate Shipment number.

4. Click Print. The Print popup window appears.
5. In the Print popup window,
 - a. From the Print Service Name drop-down list, select `Print PackList`.
 - b. From the Printer drop down list, select the appropriate printer.
 - c. In the No. of Copies text box, enter the number of copies to print.
 - d. Click OK.

4.10.12 Additional Setup Required

There is no additional setup required to print this document.

4.11 Packing Slip with Lot- and Serial-Tracked Items

A Packing Slip with lot- and serial-tracked items is a document that is sent out from the warehouse to the customer, indicating the contents of the shipment.

The Packing Slip with lot- and serial-tracked items displays shipment lines that are ready to be shipped. It contains the Ship From and Ship To addresses, freight terms, carrier details, and other information. This document also displays the lot and serial information for lot- and serial-tracked items. For time-sensitive items, the Ship by Date is also printed. The Packing Slip with lot- and serial-tracked items accompanies the shipment.

Note: If the tag- and serial-tracked items, lot-tracked items, and serial-tracked items are time sensitive, the Ship by Date is also printed.

4.11.1 Layout

Figure 4–33 illustrates the Packing Slip with lot- and serial-tracked items.

Field	Description
Line	The order line number for the item.
Cust PO#	The customer's purchase order number.
Product No.	The identifier of the item.
Cust Item No.	The identifier for the item of the customer.
Description	<p>The description of the item, along with the following information:</p> <p>For lot-tracked items—The lot numbers of the item is printed, followed by the number of item units in the lots.</p> <p>For serial-tracked items—The serial numbers of the serial-tracked item units are printed.</p> <p>If the item is also lot-tracked, the serial numbers of all serial-tracked item units in the lot are printed in individual rows, after the lot number.</p> <p>For time-sensitive items—The expiration date of the item units are printed, followed by the number of item units with that expiration date.</p> <p>If the item is also lot-tracked, the expiration date of all time-sensitive item units in the lot are printed in individual rows, followed by the number of item units with that expiration date. The expiration dates are preceded by the lot number in each row.</p> <p>If any of the item units are also serial-tracked, the expiration date of the time-sensitive item unit is printed after the serial number.</p>
UOM	The unit of measure for the item.
Qty Ord	The number of line items ordered.
Qty Ship	The shipped quantity.
Qty B/O	The backordered quantity.

You can use the Sterling nWMS PCA to configure the Packing Slip with lot- and serial-tracked items label format for an Enterprise, Seller Organization, and Buyer Organization.

4.11.2 Typical Preferences

Label preferences for the Packing Slip with lot- and serial-tracked items are typically determined by the enterprise.

4.11.3 Default Preferences

The default label preferences for the Packing Slip with lot- and serial-tracked items are determined by the node and enterprise.

4.11.4 Print Size

Packing Slips with lot- and serial-tracked items are printed on A4 paper.

Packing Slips with lot- and serial-tracked items are printed in portrait layout.

4.11.5 Printer Type

Packing Slips with lot- and serial-tracked items can be printed using any Windows printer.

4.11.6 Print Time

Packing Slips with lot- and serial-tracked items are pre-generated and staged at Wave Release. They are then printed at the Pack Station when the last carton of the shipment is scanned.

Packing Slips with lot- and serial-tracked items can also be printed on request.

Note: If you do not follow system-suggested containerization and if you require the Packing Slip to display container information, ensure that packing slips are not pre-generated and staged at Wave Release. This will enable the correct container details to be printed in the Packing Slip.

To ensure that packing slips are not pre-generated and staged at Wave Release, customize the `YNW_PrintWave_75` service so that it does not pre-generate and stage the Packing Slip at Wave Release. For more information about customizing the `YNW_PrintWave_75` service, see the *Sterling Supply Chain Applications Integration Guide*.

4.11.7 Print Location

Packing Slips with lot- and serial-tracked items are printed at the printer that is associated with the Pack Station.

4.11.8 Print Documents

The Print Document associated with the Packing Slip with lot- and serial-tracked items is `PACKLIST`.

The Label Format provided with the Sterling nWMS PCA, for the Packing Slip with lot- and serial-tracked items, is `PACKLIST_TAGSERIAL`.

The `PackList.lwl` and `ynw/ynw_PackListMapTagSerial.xml` files are stored at:

```
<YFS_HOME>\template\prints\label
```

Here, `<YFS_HOME>` points to the `<YANTRA_HOME>\Runtime` directory.

4.11.10 Print Service

The service provided for printing the Packing Slip with lot- and serial-tracked items is `Print PackList`.

When the packing of a shipment is completed, the `On Shipment Pack Complete` event of the `Pack Container` transaction is raised, which invokes the `Print PackList` service.

The `Print PackList` service then initiates the printing of the Packing Slip with lot- and serial-tracked items.

To activate the `Print PackList` service:

1. Navigate to the `Pack Process Repository`.
2. Navigate to the `Transaction Repository`.
3. Associate the `On Shipment Pack Complete` event with the `Print PackList` action, which invokes the `Print PackList` service.

Note: The `Print PackList` service is activated by default.

4.11.11 Printing Manually

Packing slips with Lot- and Serial-Tracked item can also be printed manually on user request. You can print the Packing Slip from the Outbound Shipment Console.

To print a Packing Slip with lot- and serial-tracked items manually:

1. Navigate to `Outbound > Outbound Shipment Console`. The `Shipment By Status` search screen appears.
2. Enter the appropriate search criteria and click `Search`. The `Shipment List` screen appears.
3. In the `Shipment List` screen do either of the following:
 - Select the check box against the appropriate shipment.
 - Click the appropriate Shipment number.
4. Click `Print`. The `Print` pop-up window appears.

5. In the Print pop-up window:
 - a. From the Print Service Name drop-down list, select `YNW_PrintPackList_75`.
 - b. From the Printer drop-down list, select the appropriate printer.
 - c. In the No. of Copies text box, enter the number of copies to print.
 - d. Click OK.

4.11.12 Additional Setup Required

There is no additional setup required to print this document.

4.12 Packing Slip With Package Level Details

This label is similar to the Packing Slip, but has additional details for the contents in each container associated with the shipment.

The Packing Slip can be printed when the last carton is packed. It can also be printed upon request.

4.12.1 Layout

The Packing Slip with Package Level Details provided with the Sterling nWMS PCA prints is displayed here:

Figure 4-36 *Packing Slip with Package Level Details*

[illegible]

Table 4–17 Packing Slip for Package Level Details

Field	Description
SHIP FROM	The address from which the shipment is shipped.
DATE	The date by which the shipment needs to be shipped.
SHIPMENT NO.	The shipment number.
MARK FOR	This is in human readable format indicating the sort performed for or at the destination address. Typically, the store number, or name of the person, or department is printed.
SHIP TO	The address to which the shipment is to be shipped.
BILL TO	The address to which the shipment is to be billed.
CARRIER/SERVICE	The carrier used to ship the containers.
FREIGHT TERMS	The freight terms used for the shipment. Valid values include TPB-Third Party Billing, COL-Collect, and PRE-Prepaid.
NO. OF CARTONS	The number of cartons in the shipment.
NO. OF PALLETS	The number of pallets in the shipment.
SPECIAL INSTRUCTIONS	Special instructions for the shipment or delivery handling, if any, to note when the shipment is being shipped.

Table 4–18 Packing Slip for Package Level Details, SHIPPING INFORMATION

Field	Description
CONTAINER SCM	The unique identifier of the container.
ITEM ID	The identifier of the item being shipped.
ITEM DESCRIPTION	The description of the item.
UOM	The unit of measure for the item.
QUANTITY	The number of units of the item.

You can use the Sterling nWMS PCA to configure the Packing Slip with Package Level Details custom label format for an Enterprise, Seller Organization, and Buyer Organization.

4.12.2 Typical Preferences

Label preferences for the Packing Slip with Package Level Details are typically determined by the enterprise.

4.12.3 Default Preferences

The default label preferences for the Packing Slip with Package Level Details are determined by the node and enterprise.

4.12.4 Print Size

Packing Slips are either printed as an 4" x 6" label or on A4 paper.

Packing Slips with Package Level Details are printed in portrait layout.

4.12.5 Printer Type

Packing Slips with Package Level Details can be printed using any Windows printer.

4.12.6 Print Time

Packing Slip with Package Level Details are pre-generated and staged at Wave Release. They are then printed at the Pack Station when the last carton of the shipment is scanned.

Packing Slip with Package Level Details can also be printed upon request.

4.12.7 Print Location

Packing Slip with Package Level Details are printed at the printer that is associated with the Pack Station.

4.12.8 Print Documents

The Print Document associated with the Packing Slip with Package Level Details is `PACKLIST`.

The Label Format provided with the Sterling nWMS PCA, for the Packing Slip with Package Level Details, is `PACKLIST_PLD_TAGSERIAL`.

Note: If you want the Packing Slip with Package Level Details to be the default Packing Slip printed, select `PACKLIST_PLD` as your Default Label Format.

The YNW_PackList_PLD.lwl and YNW_PackList_PLD_Map.xml files are stored at:

<YFS_HOME>\template\prints\label\ynw

Here, <YFS_HOME> points to the <YANTRA_HOME>\Runtime directory.

4.12.10 Print Service

The service provided for printing the Packing Slip with Package Level Details is YNW_PrintPackListPLD_75.

When a shipment pack is completed, the On Shipment Pack Complete event of the Pack Container transaction is raised, which invokes the YNW_PrintPackListPLD_75 service.

The YNW_PrintPackListPLD_75 service then initiates the printing of the Packing Slip with Package Level Details.

To activate the YNW_PrintPackListPLD_75 service:

1. Navigate to the Pack Process Repository.
2. Navigate to the Transaction Repository.
3. Associate the On Shipment Pack Complete event with the PrintPackList action, which invokes the YNW_PrintPackListPLD_75 service.

Note: The YNW_PrintPackListPLD_75 service is activated by default.

4.12.11 Printing Manually

Packing Slips with Package Level Details can also be printed manually upon user request. You can print the Packing Slip with Package Level Details from the Outbound Shipment Console.

To print a Packing Slip with Package Level Details manually:

1. Navigate to Outbound > Outbound Shipment Console. The Shipment By Status search screen appears.
2. Enter the appropriate search criteria and click Search. The Shipment List screen appears.

3. In the Shipment List screen do either of the following:
 - Select the check-box against the appropriate shipment.
 - Click the appropriate shipment number.
4. Click Print. The Print popup window appears.
5. In the Print popup window,
 - a. From the Print Service Name drop down list, select YNW_PrintPackList_PLD_75.
 - b. From the Printer drop-down list, select the appropriate printer.
 - c. In the No. of Copies text box, enter the number of copies to print.
 - d. Click OK.

4.12.12 Additional Setup Required

There is no additional setup required to print this document.

4.13 Packing Slip with Lot- and Serial-Tracked Package Level Details

This label is similar to the Packing Slip with lot- and serial-tracked items, but has additional details for the contents in each container associated with the shipment and also details of lot- and serial-tracked items. For time-sensitive items, the Ship by Date is also printed.

The Packing Slip with lot- and serial-tracked package level details can be printed when the last carton is packed or at Wave Release. It can also be printed upon request.

Note: If the tag- and serial-tracked items, lot-tracked items, and serial-tracked items are time sensitive, the Ship by Date is also printed.

4.13.1 Layout

Figure 4–39 illustrates the Packing Slip with lot- and serial-tracked package level details.

The ynw/YNW_PackList_PLD.lwl and
 ynw/YNW_PackList_PLD_TagSerial_Map.xml files are stored at:

<YFS_HOME>\template\prints\label\ynw

Here, <YFS_HOME> points to the <YANTRA_HOME>\Runtime directory.

4.13.10 Print Service

The service provided for printing the Packing Slip with lot- and serial-tracked package level details is YNW_PrintPackListPLD_75.

When a shipment pack is completed, the On Shipment Pack Complete event of the Pack Container transaction is raised, which invokes the YNW_PrintPackListPLD_75 service.

The YNW_PrintPackListPLD_75 service then initiates the printing of the Packing Slip with lot- and serial-tracked package level details.

To activate the YNW_PrintPackListPLD_75 service:

1. Navigate to the Pack Process Repository.
2. Navigate to the Transaction Repository.
3. Associate the On Shipment Pack Complete event with the PrintPackList action, which invokes the YNW_PrintPackListPLD_75 service.

Note: The YNW_PrintPackListPLD_75 service is activated by default.

4.13.11 Printing Manually

Packing Slips with lot- and serial-tracked package level details can also be printed manually upon user request. You can print the Packing Slip with lot- and serial-tracked package level details from the Outbound Shipment Console.

To print a Packing Slip with lot- and serial-tracked package level details manually:

1. Navigate to Outbound > Outbound Shipment Console. The Shipment By Status search screen appears.
2. Enter the appropriate search criteria and click Search. The Shipment List screen appears.
3. In the Shipment List screen do either of the following:
 - Select the check-box against the appropriate shipment.

- Click the appropriate shipment number.
- 4. Click Print. The Print pop-up window appears.
- 5. In the Print pop-up window:
 - a. From the Print Service Name drop-down list, select YNW_PrintPackList_PLD_75.
 - b. From the Printer drop-down list, select the appropriate printer.
 - c. In the No. of Copies text box, enter the number of copies to print.
 - d. Click OK.

4.13.12 Additional Setup Required

There is no additional setup required to print this document.

4.14 RFID Slap and Slip Label

Radio Frequency Identification (RFID) is an automatic identification method, that relies on storing and remotely retrieving data using devices called RFID tags.

An RFID Slap and Ship Label has an RFID tag incorporated into the label. This enables it to receive information and respond to radio frequency queries from an RFID transceiver, which expedites the scanning and tracking of items. RFID Slap and Ship Labels are printed for the outermost cartons and pallets. They are applied as a part of the standard Pick or Pack process.

The RFID tag contains information about the GTIN (Global Trade Identification) number and UPC number.

Two types of RFID Slap and Ship Labels can be printed:

- [Single-SKU](#)

Single-SKU RFID Slap and Ship Labels are printed when there is only one SKU in the container.

The Sterling nWMS PCA provides the following variations in the Single-SKU RFID Slap and Ship Labels:

- Single-SKU Case GTIN Label With shipment information
- Single-SKU Pallet GTIN Label With shipment information

- [Multi-SKU](#)

Multi-SKU Slap and Ship Labels are printed when there are more than one SKU in the container.

The Sterling nWMS PCA provides the following variations in the Multi-SKU RFID Slap and Ship Labels:

- Multi-SKU Case SSCC Label
- Multi-SKU Pallet SSCC Label

4.14.1 Layout

This section illustrates the layout of the RFID Slap and Ship Label for Single-SKU and Multi-SKU.

4.14.1.1 Single-SKU

Figure 4–42 displays the Single-SKU RFID Slap and Ship Label provided with the Sterling nWMS PCA.

CUST SKU	The identifier of the customer for the item.
QTY	The item quantity contained in the container.
SSCC	The Serial Shipping Container Code (SSCC) bar code used to track the container and its contents. The SSCC is a 20 digit code comprising of the sellers EAN/UCC number and a sequence number. It is a mandatory field for UCC/EAN compliance.
RFID Tag	The RFID tag contains the GTIN (Global Trade Identification Number) number and the UPC (Universal Product Code) number.

4.14.2 Typical Preferences

Label preferences for the RFID Slap and Ship Labels are typically determined by the enterprise.

4.14.3 Default Preferences

The default label preferences for the RFID Slap and Ship Labels are determined by the node and enterprise.

4.14.4 Print Size

RFID Slap and Ship Labels are printed on 4" x 6" label paper.

4.14.5 Printer Type

RFID Slap and Ship Labels can be printed using any printer supported by LOFTWARE.

4.14.6 Print Time

The RFID Slap and Ship labels are printed during Packing.

The label print can also be printed upon request.

4.14.7 Print Location

RFID Slap and Ship Labels are printed at the printer that is associated with the Pack Station.

4.14.8 Print Document

The Print Document associated with the RFID Slap and Ship Label is `YNW_RFID_CONTAINER_LABEL`.

4.14.9 Label Formats

This section illustrates the Label Formats for the RFID Slap and Ship Label for Single-SKU and Multi-SKU.

4.14.9.1 Single-SKU

The Label Format Names for the Single-SKU-RFID Slap and Ship Label are RFID_LABEL_SINGLE_SKU_GTIN_CASE, RFID_LABEL_SINGLE_SKU_GTIN_PALLET, RFID_LABEL_SINGLE_SKU_CASE, and RFID_LABEL_SINGLE_SKU_PALLET.

The Label Format File Names for the Single-SKU RFID Slap and Ship Label are YNW_RFIDlabel_SingleSKU_GTIN_Case.lwl, YNW_RFIDlabel_SingleSKU_GTIN_Pallet.lwl, YNW_RFIDlabel_SingleSKU_Case.lwl, and YNW_RFIDlabel_SingleSKU_Pallet.lwl.

The Mapping XML File Names for the Single-SKU RFID Slap and Ship Label is RFIDSingleSKULabelMap.xml.

Figure 4–45 Label Formats for Single-SKU RFID Slap and Ship Label

The `YNW_RFIDlabel_MultiSKU_Case.lwl`,
`YNW_RFIDlabel_MultiSKU_Pallet.lwl`, and
`RFIDMultiSKULabelMap.xml` files are stored at:

`<YFS_HOME>\template\prints\label\ynw` directory

Here, `<YFS_HOME>` points to the `<YANTRA_HOME>\Runtime` directory.

4.14.10 Print Service

This section highlights the print service used to print the RFID Slap and Ship labels for containers.

4.14.10.1 Print Service for Containers

The action provided for printing the RFID Slap and Ship Label for containers is `PrintRFIDLabel`.

When a container is packed, the following events are raised, which invoke the `PrintRFIDLabel` action:

- On Success event of the Pack Container transaction
- On Success event of the Confirm Carton Pack transaction
- On Container Pack Process Complete event of the Pack Container transaction

The `PrintRFIDLabel` action then initiates the printing of the RFID Slap and Ship Label.

To activate the `PrintRFIDLabel` action:

1. Navigate to the Pack Process Repository.
2. Navigate to the Transaction Repository.
3. Associate the above events with the `PrintRFIDLabel` action, which invokes the `YNW_ConditionForPrintingRFIDLabel_75` service.

Note: The `PrintRFIDLabel` action is activated by default.

4.14.11 Printing Manually

RFID Slap and Ship Labels can also be printed manually upon user request. You can print the RFID Slap and Ship Label for shipments from the Outbound Shipment Console.

To print a RFID slap and Ship Label manually:

1. Navigate to Outbound > Outbound Shipment Console. The Shipment By Status search screen appears.
2. Enter the appropriate search criteria and click Search. The Shipment List screen appears.
3. In the Shipment List screen do either of the following:
 - Select the checkbox preceding the appropriate shipment.
 - Click the appropriate shipment number.
4. Click Print. The Print pop-up window appears.
5. In the Print pop-up window:
 - a. From the Print Service Name drop-down list, select YNW_PrintShipmentRFIDLabels_75.
 - b. From the Printer drop-down list, select the appropriate printer.
 - c. In the No. of Copies text box, enter the number of copies to print.
 - d. Click OK.

4.14.12 Additional Setup Required

The following additional setup is required to print RFID Slap and Ship Labels:

1. Create a service item. For more information about creating a service item, see the *Sterling Warehouse Management System Configuration Guide*.
2. Associate the created service item with the Print RFID Labels service activity.
3. For buyers that need to print RFID Slap and Ship Label, associate the appropriate Item Classification with the service item created in [Step 1](#).

4.15 Shipper's Export Declaration

A Shipper's Export Declaration is a document that must accompany International Shipments from the USA. This document serves as a record of US exports and is used to compile trade statistics.

For loads, if the shipments are shipped to multiple destinations, each shipment requires a Shipper's Export Declaration.

For parcel shipments, each shipment requires a Shipper's Export Declaration.

Note: The Shipper's Export Declaration is printed for shipments that have atleast one Schedule B Code costing more than USD 2500.

The Shipper's Export Declaration is printed for items that have Schedule B Code configured in the catalog.

For more information about Schedule B Code, refer to the *Sterling Product Management Configuration Guide*.

4.15.1 Layout

The Shipper's Export Declaration provided with the Sterling nWMS PCA prints is displayed here:

Table 4–23 Shipper’s Export Declaration

Field	Description
U.S. PRINCIPAL PARTY IN INTEREST (USPPI)	<div>Enter the name and address of the USPPI. The USPPI is the person in the United States that receives the primary benefit of the export transaction.</div> <div><div>ZIP CODE</div><div>Enter the zip code of the country, where the company is located.</div></div>
USPPI EIN OR ID NO.	Enter the USPPI’s Internal Revenue Service Employer Identification Number (EIN) or Social Security Number (SSN) if no EIN has been assigned.
PARTIES TO TRANSACTION	Check if this is a related or non-related party transaction. A related party transaction is a transaction between a USPPI and a foreign consignee.
DATE OF EXPORTATION	Enter the date on which the goods leave the country, for all methods of transportation.
TRANSPORTATION REFERENCE NO.	Enter the airway bill number for air shipments. For other methods of transportation leave blank.
ULTIMATE CONSIGNEE	Enter the name and address of the foreign party actually receiving the merchandise.
INTERMEDIATE CONSIGNEE	Enter the name and address of the party in a foreign country who delivers the goods to the ultimate consignee.

Table 4–23 Shipper's Export Declaration

Field	Description
FORWARDING AGENT	Enter the name and address of the forwarding agent.
FORWARDING AGENT'S EIN (IRS) NO.	Enter the forwarding agent's Internal Revenue Service (IRS) Employer Identification Number (EIN).
POINT (STATE) OF ORIGIN OR FTZ NO.	<p>If from a Foreign Trade Zone (FTZ), enter the FTZ number for exports leaving the FTZ. Otherwise enter one of the following:</p> <p>(a) The two digit U.S. Postal Service abbreviation of the state in which the merchandise starts its journey to the port of export.</p> <p>(b) The state of the commodity with greatest value.</p> <p>(c) The state of consolidation.</p>
COUNTRY OF ULTIMATE DESTINATION	Enter the country of ultimate destination as shown on the export license.
LOADING PIER (Vessel only)	Enter the number or name of the pier at which the merchandise is laden aboard the exporting vessel.
METHOD OF TRANSPORTATION (Specify)	Enter the method of transportation by which the merchandise is exported.
EXPORTING CARRIER	Enter the name of the carrier transporting the merchandise out of the country.
PORT OF EXPORT	<p>For overland shipments, enter the name of the U.S customs port at which the carrier crosses the board.</p> <p>For Vessel and Air Shipment, enter the name of the U.S Customs port at which the merchandise is loaded on the carrier.</p> <p>For Postal Shipment, enter the U.S. Post Office from which the merchandise is mailed.</p>

Table 4–23 Shipper's Export Declaration

Field	Description
PORT OF UNLOADING (Vessel and air only)	Enter the foreign port and country at which the merchandise is unloaded from the exporting carrier.
CONTAINERIZED (Vessel only)	'No' is checked, indicating that the cargo is not placed in container.
CARRIER IDENTIFICATION CODE	Enter the identification code of the carrier of the shipment.
SHIPMENT REFERENCE NO.	Enter the unique reference number of the shipment.
ENTRY NUMBER	Enter the import entry number for the export transaction. This number is used as proof of export for the import transaction.
HAZARDOUS MATERIALS	Check 'Yes' when the shipment is identified as hazardous and 'No' if the shipment is not hazardous, as defined by the Department of Transportation.
IN BOND CODE	Check whether the shipment is being transported under bond.
ROUTED EXPORT TRANSACTION	Check the appropriate 'YES' or 'NO' that identifies the transaction as a routed export transaction.
D/F or M	Domestic (F): indicates goods that are grown, produced, or manufactured in the United States. Foreign (F): indicates goods that are imported to United States and are being re-exported in the same condition. Military (M): indicates goods that are sold and exported under the foreign military sales program.

Table 4–23 Shipper's Export Declaration

Field	Description						
SCHEDULE B DESCRIPTION OF COMMODITIES	<table> <tr> <td>SCHEDULE B NUMBER</td><td>Enter the ten digits commodity number as provided in Schedule B (Statistical Classification of Domestic and Foreign Commodities Exported from the United States).</td></tr> <tr> <td>QUANTITY SCHEDULE B UNITS</td><td>Enter the whole units as specified in the Schedule B commodity classification code.</td></tr> <tr> <td>SHIPPING WEIGHT (Kilograms)</td><td>Enter the gross shipping weight in kilograms for each Schedule B number.</td></tr> </table>	SCHEDULE B NUMBER	Enter the ten digits commodity number as provided in Schedule B (Statistical Classification of Domestic and Foreign Commodities Exported from the United States).	QUANTITY SCHEDULE B UNITS	Enter the whole units as specified in the Schedule B commodity classification code.	SHIPPING WEIGHT (Kilograms)	Enter the gross shipping weight in kilograms for each Schedule B number.
SCHEDULE B NUMBER	Enter the ten digits commodity number as provided in Schedule B (Statistical Classification of Domestic and Foreign Commodities Exported from the United States).						
QUANTITY SCHEDULE B UNITS	Enter the whole units as specified in the Schedule B commodity classification code.						
SHIPPING WEIGHT (Kilograms)	Enter the gross shipping weight in kilograms for each Schedule B number.						
VIN PRODUCT NUMBER/VEHICLE TITLE NUMBER	Enter the Vehicle Identification Number (VIN), this is used for self-propelled vehicles only.						
VALUE (US dollars, omit cents)	Enter the selling price or cost if not sold.						
LICENCE NO./LICENCE EXCEPTION SYMBOL/ AUTHORIZATION	Indicates the export licence number of the ship node.						
ECCN (When required)	Enter the correct Export Control Classification Number (ECCN) to record all the exports, that are authorized under a licence exception.						
Duly authorized officer or employee	<p>Enter the signature of the supervisor authorizing the export.</p> <p>This information appears only on the first page of the Shipper's Export Declaration.</p>						

Table 4–23 Shipper’s Export Declaration

Field	Description
Signature	Enter the signature of the shipping supervisor. This information appears only on the first page of the Shipper’s Export Declaration.
Title	Enter the title of the shipping supervisor. This information appears only on the first page of the Shipper’s Export Declaration.
Date	Enter the date on which the shipper certificate is signed by the supervisor. This information appears only on the first page of the Shipper’s Export Declaration.
Telephone No.	Enter the telephone number of the exporter. This information appears only on the first page of the Shipper’s Export Declaration.
AUTHENTICATION (When required)	For customs use only. This information appears only on the first page of the Shipper’s Export Declaration. <div><div>E-mail address</div><div>Enter the exporter’s e-mail address.</div></div>

You can use the Sterling nWMS PCA to configure the Shipper’s Export Declaration label format for an Enterprise, Seller Organization, and Buyer Organization.

4.15.2 Typical Preferences

Label preferences for the Shipper’s Export Declaration are typically determined by the enterprise.

4.15.3 Default Preferences

The default label preferences for the Shipper's Export Declaration are determined by the node and enterprise.

4.15.4 Print Size

Shipper's Export Declarations are printed on A4 paper.

Shipper's Export Declarations are printed in portrait layout.

4.15.5 Printer Type

Shipper's Export Declarations can be printed using any Windows printer.

4.15.6 Print Time

The Shipper's Export Declaration is generated when the load is confirmed for TL or LTL shipments.

The Shipper's Export Declaration is generated when the Manifest is closed for Parcel Shipments.

They are then printed at the Pack Station when the last carton of the shipment is scanned. Shipper's Export Declarations can also be printed upon request.

4.15.7 Print Location

Shipper's Export Declarations are printed at the printer that is associated with the Pack Station.

4.15.8 Print Documents

The Print Document associated with the Shipper's Export Declaration is SHIPPERS_EXPORT_DECLARATION.

The Label Format provided along with the Sterling nWMS PCA, for the Shipper's Export Declaration, is SHIPPERS_EXPORT_DECLARATION_LABEL.

The YNW_ShippersExportDeclaration.lwl and YNW_ShippersExportDeclaration_Map.xml files are stored at the location:

<YFS_HOME>\template\prints\label\ynw

Here, <YFS_HOME> points to the <YANTRA_HOME>\Runtime directory.

4.15.10 Print Service

4.15.10.1 Print Service for Parcel Shipments

The service provided for printing the Shipper's Export Declaration for shipments is

YNW_PrintShippersExportDeclarationForShipments(75).

When the parcel manifest is closed, the On Success event of the Confirm Shipment transaction is raised, which invokes the YNW_PrintShippersExportDeclarationForShipments(75) service.

The YNW_PrintShippersExportDeclarationForShipments(75) service then initiates the printing of the Shipper's Export Declaration.

To activate the

YNW_PrintShippersExportDeclarationForShipments(75) service:

1. Navigate to the Outbound Shipment Repository.
2. Navigate to the Transaction Repository.
3. Associate the On Success event with the YNW Shipment BOL(75) action, which invokes the YNW_PrintShippersExportDeclarationForShipments(75) service.

Note: The YNW_PrintShippersExportDeclarationForShipments(75) service is activated by default.

4.15.10.2 Print Service for Load

The service provided for printing the Shipper's Export Declarations for loads is `YNW_PrintShippersExportDeclarationForLoads_75`.

When the load is confirmed, the `On Success` event of the `Receive Intransit Updates for Load` transaction is raised, which invokes the `YNW_PrintShippersExportDeclarationForLoads_75` service.

The `YNW_PrintShippersExportDeclarationForLoads_75` service then initiates the printing of the Shipper's Export Declarations.

If the shipments are shipped to multiple destinations, the `YNW_PrintShippersExportDeclarationForLoads_75` service prints a Shipper's Export Declaration for each shipment.

To activate the `YNW_PrintShippersExportDeclarationForLoads_75` service:

1. Navigate to the Load Execution Repository.
2. Navigate to the Transaction Repository.
3. Associate the `On Success` event with the `YNW Print Load BOL(75)` action, which invokes the `YNW_PrintShippersExportDeclarationForLoads_75`.

Note: The `YNW_PrintShippersExportDeclarationForLoads_75` service is activated by default.

4.15.11 Printing Manually

Shipper's Export Declarations can also be printed manually upon user request.

4.15.11.1 Shipper's Export Declarations for Shipments

You can manually print the Shipper's Export Declaration for shipments from the Outbound Shipment Console.

To print a Shipper's Export Declaration for shipments manually:

1. Navigate to `Outbound > Outbound Shipment Console`. The `Shipment By Status` search screen appears.

2. Enter the appropriate search criteria and click Search. The Shipment List screen appears.
3. In the Shipment List screen do either of the following:
 - Select the check box against the appropriate shipment.
 - Click the appropriate shipment number.
4. Click Print. The Print popup window appears.
5. In the Print popup window,
 - a. From the Print Service Name drop-down list, select `YNW_PrintShippersExportDeclarationforshipments_75`.
 - b. From the Printer drop-down list, select the appropriate printer.
 - c. In the No. of Copies text box, enter the number of copies to print.
 - d. Click OK.

4.15.11.2 Shipper's Export Declaration for Loads

You can manually print the Shipper's Export Declaration for loads from the Load Console.

To print a Shipper's Export Declaration for loads manually:

1. Navigate to Outbound > Load Console. The Load By Summary search screen appears.
2. Enter the appropriate search criteria and click Search. The Load Console Summary screen appears.
3. In the Load Console Summary screen, Select the check box against the appropriate ship mode. Click view details.
4. In the Load Console Summary screen do either of the following:
 - Select the check box against the appropriate ship mode.
 - Click the appropriate shipment number.
5. Click Print. The Print popup window appears.
6. In the Print popup window,
 - a. From the Print Service Name drop down list, select `YNW_PrintShippersExportDeclarationforLoads_75`.

- b. From the Printer drop-down list, select the appropriate printer.
- c. In the No. of Copies text box, enter the number of copies to print.
- d. Click OK.

4.15.12 Additional Setup Required

There is no additional setup required to print this document.

4.16 Single-SKU UCC-128 Container Shipping Label

The Single-SKU Uniform Commercial Code (UCC) -128 Container Shipping Label has the Serial Shipping Container Code (SSCC) bar code to track the container and its contents.

This label is printed when there is only one SKU in the container. The label can be printed during Packing or at Wave Release. The label print can also be printed upon request.

4.16.1 Layout

The Single-SKU UCC-128 Container Shipping Label provided with the Sterling nWMS PCA prints is displayed here:

Figure 4–50 Single-SKU UCC-128 Container Shipping Label

Table 4–24 Single-SKU UCC-128 Container Shipping Label

Field	Description
FROM	The address from where the shipment is shipped.
TO	The address to which the shipment is shipped.
SHIP TO POST	The carrier routing bar code.
CARRIER	The carrier used to ship the container.

Field	Description
SHIPMENT #	The shipment number to which the container belongs.
BATCH	The batch number to which the container belongs.
Slot No.	The slot in which the container is placed.
PO	The purchase order number to which the shipment belongs.
DEPT	The department code associated with the shipment, if any.
ITEM	The identifier of the item.
CUST SKU	The identifier of the customer for the item.
QTY	The item quantity contained in the container.
FOR	The FOR - Barcode associated with any sorting done at the destination address or for the destination address. Typically, this has the store number when the ship-to address is a merge point for the customer.
MARK FOR	This is in human readable format indicating the sort performed for or at the destination address. Typically, store number, or name of the person, or department is printed.
SSCC	<p>The Serial Shipping Container Code (SSCC) bar code used to track the container and its contents.</p> <p>The SSCC is a 20 digit code comprising of the sellers EAN/UCC number and a sequence number. It is a mandatory field for UCC/EAN compliance.</p>

You can use the Sterling nWMS PCA to configure the Single-SKU UCC-128 Container Shipping Label custom label format for an Enterprise, Seller Organization, and Buyer Organization.

4.16.2 Typical Preferences

Label preferences for the Single-SKU UCC-128 Container Shipping Label are typically determined by the enterprise.

4.16.3 Default Preferences

The default label preferences for the Single-SKU UCC-128 Container Shipping Label are determined by the node and enterprise.

4.16.4 Print Size

Single-SKU UCC-128 Container Shipping Labels are printed on 4" x 6" label paper.

4.16.5 Printer Type

Single-SKU UCC-128 Container Shipping Labels can be printed using a Zebra printer.

4.16.6 Print Time

For pre-pick containerization, Single-SKU UCC-128 Container Shipping Labels are printed at Wave Release.

For post-pick containerization, Single-SKU UCC-128 Container Shipping Labels are printed at the Pack Station, when the last carton of the shipment is scanned.

Single-SKU UCC-128 Container Shipping Labels can also be printed upon request.

4.16.7 Print Location

For pre-pick containerization, Single-SKU UCC-128 Container Shipping Labels are printed at the nearest printer.

For post-pick containerization, Single-SKU UCC-128 Container Shipping Labels are printed at the printer that is associated with the Pack Station.

4.16.8 Print Documents

The Print Document associated with the Single-SKU UCC-128 Container Shipping Label is `CONTAINER_LABEL`.

The Label Format shipped along with the Sterling nWMS PCA, for the Single-SKU UCC-128 Container Shipping Label, is `CONTAINER_LABEL_MULTI_SKU`.

The `UCC128_SingleSKU_ShippingLabel.lwl` and `UCC128SingleSKUShippingLabelMap.xml` files are stored at:

`<YFS_HOME>\template\prints\label`

Here, `<YFS_HOME>` points to the `<YANTRA_HOME>\Runtime` directory.

4.16.10 Print Service

4.16.10.1 Print Service for Shipments

The service provided for printing the Single-SKU UCC-128 Container Shipping Label for shipments is `PrintShipmentContainerLabels`.

When a shipment pack is completed, the `On Container Pack Complete` event of the `Pack Container` transaction is raised, which invokes the `PrintShipmentContainerLabels` service.

The `PrintShipmentContainerLabels` service then initiates the printing of the Single-SKU UCC-128 Container Shipping Label.

To activate the `PrintShipmentContainerLabels` service:

1. Navigate to the Outbound Shipment Repository.
2. Navigate to the Transaction Repository.
3. Create an action.
4. Associate the `On Container Pack Complete` event with the action created action, which invokes the `PrintShipmentContainerLabels` service.

4.16.10.2 Print Service for Containers

The service provided for printing the Single-SKU UCC-128 Container Shipping Label for containers is `PrintShippingLabel`.

When a shipment pack is completed, the `On Container Pack Complete` event of the `Pack Container` transaction is raised, which invokes the `PrintShippingLabel` service.

The `PrintShippingLabel` service then initiates the printing of the Single-SKU UCC-128 Container Shipping Label.

To activate the `PrintShippingLabel` service:

1. Navigate to the Pack Process Repository.

2. Navigate to the Transaction Repository.
3. Associate the On Container Pack Complete event with the PrintShippingLabel action, which invokes the PrintShippingLabel service.

Note: The PrintShippingLabel service is activated by default.

4.16.11 Printing Manually

Single-SKU UCC-128 Container Shipping Labels can also be printed manually upon user request.

4.16.11.1 Single-SKU UCC-128 Container Shipping Label for Shipments

You can print the Single-SKU UCC-128 Container Shipping Label for shipments from the Outbound Shipment Console.

To print a Single-SKU UCC-128 Container Shipping Label manually:

1. Navigate to Outbound > Outbound Shipment Console. The Shipment By Status search screen appears.
2. Enter the appropriate search criteria and click Search. The Shipment List screen appears.
3. In the Shipment List screen do either of the following:
 - Select the check-box against the appropriate shipment.
 - Click the appropriate shipment number.
4. Click Print. The Print popup window appears.
5. In the Print popup window,
 - a. From the Print Service Name drop-down list, select PrintShipmentContainerLabels.
 - b. From the Printer drop-down list, select the appropriate printer.
 - c. In the No. of Copies text box, enter the number of copies to print.
 - d. Click OK.

4.16.11.2 Single SKU UCC-128 Container Shipping Label for Containers

You can print the Single SKU UCC-128 Container Shipping Label for containers from the Outbound Shipment Console.

To print a Single SKU UCC-128 Container Shipping Label manually:

1. Navigate to Outbound > Outbound Shipment Console. The Shipment By Status search screen appears.
2. Enter the appropriate search criteria and click Search. The Shipment List screen appears.
3. In the Shipment List screen do either of the following:
 - Select the check-box against the appropriate shipment.
 - Click the appropriate shipment number.
4. Click Print. The Print popup window appears.
5. In the Print popup window,
 - a. From the Print Service Name drop-down list, select `PrintShippingLabel`.
 - b. From the Printer drop-down list, select the appropriate printer.
 - c. In the No. of Copies text box, enter the number of copies to print.
 - d. Click OK.

4.16.12 Additional Setup Required

There is no additional setup required to print this document.

4.17 Special Ticket Label

Special Ticket Labels can be printed as part of Value Added Services (VAS) for specific customers. The special ticket label identifies the Customer's Item ID, in addition to the Node's Item ID.

This label is printed at the Pack Station for the scanned cartons that requires the special ticketing.

4.17.1 Layout

The default Special Ticket Labels that the Sterling nWMS PCA prints is displayed here:

Figure 4–53 Special Ticket Label

Table 4–25 Special Ticket Label

Field	Description
Customer Item ID	The identifier of the item of the customer.
Description	The description of the item.
Item ID	The identifier or serial number of the item.
Unit Price	The unit price of the item.

You can use the Sterling nWMS PCA to configure the Special Ticket Labels label format for an Enterprise, Seller Organization, and Buyer Organization.

4.17.2 Typical Preferences

Label preferences for the Special Ticket Labels are typically determined by the enterprise.

4.17.3 Default Preferences

The default label preferences for the Special Ticket Labels are determined by the node and enterprise.

4.17.4 Print Size

Special Ticket Labels are printed on 4" x 2" paper.

Special Ticket Labels are printed in portrait layout.

4.17.5 Printer Type

Special Ticket Labels can be printed using zebra printer.

4.17.6 Print Time

This Label is printed at the Pack Station for the scanned cartons that requires the special ticketing.

Special Ticket Labels can also be printed upon request.

4.17.7 Print Location

Special Ticket Labels are printed at the printer that is associated with the Pack Station.

4.17.8 Print Documents

The Print Document associated with the Special Ticket Labels is `Special_Ticket_Label`.

The default Label Format provided with the Sterling nWMS PCA, for the Special Ticket Labels, is `SPECIAL_TICKET`.

The YNW_SpecialTicketLabel.lwl and YNW_SpecialTicketLabelMap.xml files are stored at:

<YFS_HOME>\template\prints\label\ynw

Here, <YFS_HOME> points to the <YANTRA_HOME>\Runtime directory.

4.17.10 Print Service

The service provided for printing the Special Ticket Labels is YNW_PrintSpecialTicketLabels_75.

When the container pack is complete, the On Container Pack Complete event of the Pack Container transaction is raised, which invokes the YNW_PrintSpecialTicketLabels_75 service.

The YNW_PrintSpecialTicketLabels_75 service then initiates the printing of the Special Ticket Labels.

To activate the YNW_PrintSpecialTicketLabels_75 service:

1. Navigate to the Pack Process Repository.
2. Navigate to Pack Container.
3. Associate the On Container Pack Complete event with the YNW Print Special Ticket Label (75) action, which invokes the YNW_PrintSpecialTicketLabels_75 service.

Note: The YNW_PrintSpecialTicketLabels_75 service is activated by default.

4.17.11 Printing Manually

Special Ticket Labels can also be printed manually upon user request. You can print the Special Ticket Labels from the Outbound Shipment Console.

To print a Special Ticket Label manually:

1. Navigate to Outbound > Outbound Shipment Console. The Shipment By Status search screen appears.
2. Click on the Shipment drop-down. The Container Search Screen appears.

3. Enter the appropriate search criteria and click Search. The Container List Screen appears.
4. In the Container List screen do either of the following:
 - Select the check box against the appropriate container.
 - Click the appropriate container number.
5. Click Print. The Print popup window appears.
6. In the Print popup window,
 - a. From the Print Service Name drop-down list, select YNW_SpecialTicketLabel.
 - b. From the Printer drop-down list, select the zebra printer.
 - c. In the No. of Copies text box, enter the number of copies to print.
 - d. Click OK.

4.17.12 Additional Setup Required

The following additional setup is required to print Special Ticket Labels:

1. Create a service item. For more information about creating a service item, see the *Sterling Warehouse Management System Configuration Guide*.
2. Associate this service item with the Special_Ticket_Label service activity.
3. For buyers that need to print Special Ticket Labels, associate the appropriate Item Classification with the service item created above.

4.18 VICS Bill Of Lading

The VICS (Voluntary Interindustry Commerce Standards) Bill Of Lading (BOL) provides inventory-processing information through supply chain to a shipper, carrier, and customer. The VICS BOL is a document issued by the transportation carrier to the shipper, acknowledging that they have received the shipment of goods.

Two types of VICS Bill of Ladings can be printed:

- [VICS Bill Of Lading for Shipment](#)
- [VICS Bill Of Lading for Load](#)

The VICS BOL for Load is printed for the entire load. The VICS BOL for Shipment is printed for the shipments in the load.

If all the shipments in the load are being delivered to a single destination, only the VICS BOL for Load is printed.

If the shipments in the load are being delivered to multiple destinations, one VICS BOL for Shipment is printed for each shipment in the load, and one VICS BOL for Load is printed for the entire load. The VICS BOL for the entire load is known as the Master BOL. The Master BOL contains information about the underlying Shipment BOLs.

The VICS BOL is printed on a single page if the number of lines in the CUSTOMER ORDER INFORMATION area and the CARRIER INFORMATION area are less than or equal to five. If the number of lines in the CUSTOMER ORDER INFORMATION area or the CARRIER INFORMATION area are greater than five, additional pages are printed for the VICS BOL.

The user can print the Bill of Lading on request. If the Shipment or the Load BOL contains any hazardous material then the [Hazmat Bill Of Lading](#) print is generated automatically.

4.18.1 Layout

The VICS Bill of Lading provided with the Sterling nWMS PCA prints are explained in the following sections:

4.18.1.1 VICS Bill Of Lading for Shipment

Table 4–26 VICS Bill Of Lading for Shipment, SHIP FROM

Field	Description
Name	The company that is shipping the product.
Address	The street address of the shipper.
City/State/Zip	The city, state, and zip code of the shipper.
SID#	The shipment identifier number applied by the shipper to this shipment.
FOB	Indicates the FOB freight term used for the shipment.
Bill of Lading Number	The bill of lading number created by the shipper to identify the shipment.

Table 4–27 VICS Bill Of Lading for Shipment, SHIP TO

Field	Description
Location #	The location number assigned to the consignee's ship to address.
Name	The company to which the product has to be shipped.
Address	The address of the company.
City/State/Zip	The city, state, and zip code of the company.
CID#	The identifying number applied by the consignee to this shipment.
FOB	Indicates the FOB freight term used for the shipment.
CARRIER NAME	The carrier picking up the shipment.
Trailer number	The shipment trailer number. The trailer number is used if a truckload carrier hauls the shipment.
Seal numbers	The shipment seal number. The seal number is used if the shipment is a full truckload from the origin to destination.

Table 4–27 VICS Bill Of Lading for Shipment, SHIP TO

Field	Description
SCAC	The Standard Carrier Alpha Code (SCAC) assigned to identify the carrier.
Pro number	The Pro number assigned by the carrier to track the shipment. The Pro number is used if a LTL carrier hauls the shipment.

Table 4–28 VICS Bill Of Lading for Shipment, THIRD PARTY FREIGHT CHARGES BILL TO

Field	Description
Name	The third party to whom the charges are billed, if applicable.
Address	The address of the third party.
City/State/Zip	The city, state, and zip code of the third party.
SPECIAL INSTRUCTIONS	Special instructions associated with the carrier. For example, protected services and delivery instructions. Note: Only four underlying BOL numbers are printed.
Freight Charge Terms	Indicates which third party is invoiced and is responsible for payment of the freight invoice.
Prepaid	The prepaid charges for the freight paid by the shipper (from origin to the consignee's dock).
Collect	The charges collected for the freight from the consignee from origin to the consignee's dock.
3rd Party	The freight charges paid by the third party from origin to the consignee's dock.
Master Bill of Lading	Indicates if BOL is attached.

Table 4–29 VICS Bill Of Lading for Shipment, CUSTOMER ORDER INFORMATION

Field	Description
CUSTOMER ORDER NUMBER	The number generated by the customer to identify the order.
CUST# PKGS	The number of individual packages or cartons in the shipment that have quantity associated with the customer order.
WEIGHT	The weight associated with the CUST# PKGS.
PALLET	Indicates if the product is palletized for the customer order.
ADDITIONAL SHIPPER INFO	Any additional information, if any, associated with the customer order.
GRAND TOTAL	The grand total and weight across all customer orders.

Table 4–30 VICs Bill Of Lading for Shipments, CARRIER INFORMATION

Field	Description	
HANDLING UNIT	QTY	The quantity associated with the type of package being handled. This refers to the pallet or carton being shipped.
	TYPE	The type of handling unit. For example, pallets or cartons.
PACKAGE	QTY	The number of packages in the handling unit. This refers to number of cartons in a pallet (handling unit) or number of units in a carton (handling unit).
	TYPE	The unit type associated with the package. For example, cartons in a pallet or units (EACH) in a carton.
WEIGHT	The weight associated with the package quantity.	
H.M (X)	Indicates if there is any hazardous material (HM) in the package.	
COMMODITY DESCRIPTION	The description associated with type of products being shipped.	

Table 4–30 VICS Bill Of Lading for Shipments, CARRIER INFORMATION

It is subject to the terms and conditions of the carrier's tariff and is not a receipt for the goods described herein.

BOL and SCAC/Pro Bar Code Number

Batch Number

Table 4–31 VICS Bill Of Lading for Loads, SHIP FROM

Field	Description
Name	The company that is shipping the product.
Address	The street address of the shipper.
City/State/Zip	The city, state, and zip code of the shipper.
SID#	The shipment identifier number applied by the shipper to this load.
FOB	Indicates the FOB freight term used for the shipment.
Bill of Lading Number	The bill of lading number created by the shipper to identify the load.

Table 4–32 VICS Bill Of Lading for Loads, SHIP TO

Field	Description
Location #	The location number assigned to the consignee's ship to address.
Name	The company to which product has to be shipped.
Address	The address of the company.
City/State/Zip	The city, state, and zip code of the company.
CID#	The consignee identifier number applied by the consignee to this load.
FOB	Indicates the FOB freight term used for the load.
CARRIER NAME	The carrier picking up the load.
Trailer number	The trailer number for the load. The trailer number is used if the truckload carrier hauls the load.
Seal numbers	The seal number for the load. The seal number is used if the load is a full truckload from the origin to destination.

Table 4–32 VICS Bill Of Lading for Loads, SHIP TO

Field	Description
SCAC	The Standard Carrier Alpha Code (SCAC) assigned to identify the carrier.
Pro number	The Pro number assigned by the carrier to track the shipment. The Pro number is used if an LTL carrier hauls the load.

Table 4–33 VICS Bill Of Lading for Loads, THIRD PARTY FREIGHT CHARGES BILL TO

Field	Description
Name	The third party to whom the charges are billed, if applicable.
Address	The address of the third party.
City/State/Zip	The city, state, and zip code of the third party.
SPECIAL INSTRUCTIONS	Special instructions associated with the carrier. For example, protected services and delivery instructions. Note: Only four underlying BOL numbers are printed.
Freight Charge Terms	Indicates which third party is invoiced and is responsible for payment of the freight invoice.
Prepaid	The prepaid charges for the freight paid by the shipper from origin to the consignee's dock.
Collect	The charges collected for the freight from the consignee (from origin to the consignee's dock).
3rd Party	The freight charges paid by the third party from origin to the consignee's dock.
Master Bill of Lading	Indicates if BOL is attached.

Table 4–34 VICS Bill Of Lading for Loads, CUSTOMER ORDER INFORMATION

Field	Description
CUSTOMER ORDER NUMBER	The number generated by the customer to identify the order.
CUST# PKGS	The number of individual packages or cartons in the shipment that has quantity associated with the customer order.
WEIGHT	The weight associated with the CUST# PKGS.
PALLET	Indicates if the product is palletized for the customer order.
ADDITIONAL SHIPPER INFO	Any additional information, if any, associated with the customer order.
GRAND TOTAL	The grand total and weight across all customer orders.

Table 4–35 VICS Bill Of Lading for Loads, CARRIER INFORMATION

Field	Description				
HANDLING UNIT	<table> <tr> <td>QTY</td><td>The quantity associated with the type of package being handled. This refers to the pallet or carton being shipped.</td></tr> <tr> <td>TYPE</td><td>The type of handling unit. For example, pallets or cartons.</td></tr> </table>	QTY	The quantity associated with the type of package being handled. This refers to the pallet or carton being shipped.	TYPE	The type of handling unit. For example, pallets or cartons.
QTY	The quantity associated with the type of package being handled. This refers to the pallet or carton being shipped.				
TYPE	The type of handling unit. For example, pallets or cartons.				
PACKAGE	<table> <tr> <td>QTY</td><td>The number of packages in the handling unit. This refers to number of cartons in a pallet (handling unit) or number of units in a carton (handling unit).</td></tr> <tr> <td>TYPE</td><td>The unit type associated with the package. For example, cartons in a pallet or units (EACH) in a carton.</td></tr> </table>	QTY	The number of packages in the handling unit. This refers to number of cartons in a pallet (handling unit) or number of units in a carton (handling unit).	TYPE	The unit type associated with the package. For example, cartons in a pallet or units (EACH) in a carton.
QTY	The number of packages in the handling unit. This refers to number of cartons in a pallet (handling unit) or number of units in a carton (handling unit).				
TYPE	The unit type associated with the package. For example, cartons in a pallet or units (EACH) in a carton.				
WEIGHT	The weight associated with the package quantity.				
H.M (X)	Indicates if there is any hazardous material (HM) in the package.				
COMMODITY DESCRIPTION	The description associated with the type of products being shipped.				

Table 4–35 VICS Bill Of Lading for Loads, CARRIER INFORMATION

Field	Description										
GRAND TOTAL	The grand total weight of the carrier.										
LTL ONLY	<table> <tr> <td>NMFC #</td><td>The National Motor Freight Classification (NMFC) number associated with the commodity classification.</td></tr> <tr> <td>CLASS</td><td>The freight class associated with the commodity classification.</td></tr> <tr> <td>COD Amount</td><td>The amount to be collected when shipment is delivered, referred to as COD - Collect (Cash) on Delivery.</td></tr> <tr> <td>Fee Terms</td><td>The fee terms associated with the shipment. For example, collect or prepaid.</td></tr> <tr> <td>Customer check acceptable</td><td>Indicates if checks are accepted for collect or COD shipments.</td></tr> </table>	NMFC #	The National Motor Freight Classification (NMFC) number associated with the commodity classification.	CLASS	The freight class associated with the commodity classification.	COD Amount	The amount to be collected when shipment is delivered, referred to as COD - Collect (Cash) on Delivery.	Fee Terms	The fee terms associated with the shipment. For example, collect or prepaid.	Customer check acceptable	Indicates if checks are accepted for collect or COD shipments.
NMFC #	The National Motor Freight Classification (NMFC) number associated with the commodity classification.										
CLASS	The freight class associated with the commodity classification.										
COD Amount	The amount to be collected when shipment is delivered, referred to as COD - Collect (Cash) on Delivery.										
Fee Terms	The fee terms associated with the shipment. For example, collect or prepaid.										
Customer check acceptable	Indicates if checks are accepted for collect or COD shipments.										

You can use the Sterling nWMS PCA to configure the VICS Bill Of Lading label format for an Enterprise, Seller Organization, and Buyer Organization.

4.18.2 Typical Preferences

Label preferences for the VICS Bill Of Lading for Shipment and Load is typically determined by the carriers.

4.18.3 Default Preferences

The default label preference for the VICS Bill Of Lading for Shipments and Loads are determined by the carriers.

4.18.4 Print Size

VICS Bill Of Ladings for Shipments and Loads are printed on A4 paper.

VICS Bill Of Ladings for Shipments and Loads are printed in portrait layout.

4.18.5 Printer Type

VICS Bill Of Ladings for Shipments and Load can be printed using any Windows printer.

4.18.6 Print Time

VICS Bill Of Lading for Shipment is generated when the shipment is confirmed.

VICS Bill Of Lading for Load is generated when the Receive Intransit Updates are performed.

VICS Bill Of Lading for Shipment and Load can also be printed upon request.

4.18.7 Print Location

VICS Bill Of Lading for Shipments and Loads are printed at the printer available first.

4.18.8 Print Documents

The Print Document associated with the VICS Bill Of Ladings for Shipment and Load is `VICS_BOL`.

The default Label Format provided with the Sterling nWMS PCA, for the VICS Bill Of Ladings for Shipment and Load, is `VICSBOL_SHIPMENT`.

<YFS_HOME>\template\prints\label

Here, <YFS_HOME> points to the <YANTRA_HOME>\Runtime directory.

4.18.10 Print Service

The service provided for printing the VICS Bill Of Lading for Shipments and Loads are:

4.18.10.1 VICS Bill Of Lading for Shipment:

When a shipment pack is completed, the On Success event of the Confirm Shipment transaction is raised, which invokes the PrintShipmentBOL service.

The PrintShipmentBOL service then initiates the printing of the VICS BOL.

To activate the PrintShipmentBOL service:

1. Navigate to the Outbound Shipment Repository.
2. Navigate to the Transaction Repository.
3. Associate the On Success event with the YNW Shipment BOL(75) action, which invokes the PrintShipmentBOL service.

4.18.10.2 VICS Bill Of Lading for Loads:

When a shipment pack is completed, the On Success event of the Receive Intransit Updates for Load transaction is raised, which invokes the PrintLoadBOL service.

The PrintLoadBOL service then initiates the printing of the VICS BOL.

To activate the PrintLoadBOL service:

1. Navigate to the Load Execution Repository.
2. Navigate to the Transaction Repository.
3. Associate the On Success event with the YNW Print Load BOL(75) action, which invokes the PrintLoadBOL service.

4.18.11 Printing Manually

VICS BOL can also be printed manually. The VICS BOL for both Shipments and Loads are presented in the following sections:

4.18.11.1 VICS Bill Of Lading for Shipment

VICS BOL for Shipments can also be printed manually on user request. You can print the VICS BOL for Shipment from the Outbound Shipment Console.

To print the VICS BOL for Shipment manually:

1. Navigate to Outbound > Outbound Shipment Console. The Shipment By Status search screen appears.
2. Enter the appropriate search criteria and click Search. The Shipment List screen appears.
3. In the Shipment List screen do either of the following:
 - Select the check-box against the appropriate shipment.
 - Click the appropriate shipment number.
4. Click Print. The Print popup window appears.
5. In the Print popup window,
 - a. From the Print Service Name drop-down list, select `PrintShipmentBOL`.
 - b. From the Printer drop-down list, select the appropriate printer.
 - c. In the No. of Copies text box, enter the number of copies to print.
 - d. Click OK.

4.18.11.2 VICS Bill Of Lading for Load

VICS BOL for Load can also be printed manually upon user request. You can print the VICS BOL for loads from the Outbound Shipment Console.

To print VICS BOL for Loads manually:

1. Navigate to Outbound > Load Console. The Load By Summary search screen appears.
2. Enter the appropriate search criteria and click Search. The Load Console Summary screen appears.

3. In the Load Console Summary screen do the following:
 - Select the check-box against the appropriate Ship mode and click on View Details. The Load List Screen appears.
 - Select the appropriate Load number.
4. Click Print. The Print popup window appears.
5. In the Print popup window,
 - a. From the Print Service Name drop down list, select PrintLoadBOL.
 - b. From the Printer drop down list, select the appropriate printer.
 - c. In the No. of Copies text box, enter the number of copies to print.
 - d. Click OK.

4.18.12 Additional Setup Required

There is no additional setup required to print this document.

4.18.13 Hazmat Bill Of Lading

The Hazmat Bill Of Lading is a print which is generated only when the Shipment or the Load BOL contains any hazardous materials. This is generated automatically as an attachment with the Shipment or the Load BOL.

The Hazmat BOL provided with the Sterling nWMS PCA prints is displayed here:

This is to certify that the above-named materials are properly classified, described, packaged, marked and labeled, and are in proper condition for transportation, according to the applicable regulations of the Department of Transportation.

Table 4–36 Hazmat Bill Of Lading

Field	Description
Carrier	The Standard Carrier Alpha Code (SCAC) assigned to identify the carrier that is used to ship the hazardous material.
Trailer	The trailer number associated with the carrier.

Table 4–36 Hazmat Bill Of Lading

Field	Description
Shipped	The date on which the shipment is shipped.
BOL No.	The bill of lading number created by the shipper to identify the shipment or load.
PRO No.	The PRO number assigned by the carrier to track the load. The PRO number is used if an LTL carrier hauls the load.
From	The address from which the shipment or load is shipped.
Ship To	The address to which the shipment or load is shipped.
Pcs	The total number of containers that contains the hazardous material.
Pkg	Indicates the carton type.
HM	Indicates that the material packaged into the container is a hazardous material (HM).
Description	A brief description of the hazardous material information, such as the proper shipping name, hazard class, identification number, packing group, and label code.
Qty and UnitVol	The unit of measure for the item.
Class	The hazardous material class for the item.
Weight (LBS)	The total weight of the containers that contain the hazardous material.
Total Pieces	The total number of containers.
Total Weight	The total weight of all containers.
For Emergency Contact	
The shipper's contact details for you to contact in case of any emergency.	
Shipper Signature	The shipper's signature.

Table 4–36 Hazmat Bill Of Lading

Field	Description
Date	The date on which the shipper signed the document.
Driver Signature	The driver's signature.
Date	The date on which the driver signed the document.

4.19 Wave Start Label and Wave End Label

When labels are printed during wave release this label acts as an identifier that indicates the first and last labels for the wave. This label also provides information about the number of shipments, cartons, batches, and so forth.

The Wave Start Label is the first label printed on wave release and the Wave End label is the last label printed for the wave.

4.19.1 Layout

The Wave Start Label and the Wave End Label provided with the Sterling nWMS PCA prints are explained in this section:

Figure 4–61 Wave Start Label

<u>WAVE START LABEL</u>	
Print Started At:10/25/2005 14:45	
Wave No.:	3
Total No. Of Cartons:	6
No. Of Cartons (Full Cases):	1
No. Of Cartons (Loose Cases):	5
Total No. Of Batches:	5
Total No. Of Shipments:	5

Table 4–37 Wave Start Label

Field	Description						
Wave No.	The wave number of the wave created.						
<table> <tr> <td>Total No. Of Cartons</td><td>The total number of cartons to be shipped in the wave.</td></tr> <tr> <td>No. Of Cartons (Full Cases)</td><td>The total number of cartons with full cases.</td></tr> <tr> <td>No. Of Cartons (Loose Cases)</td><td>The total number of loose cartons.</td></tr> </table>		Total No. Of Cartons	The total number of cartons to be shipped in the wave.	No. Of Cartons (Full Cases)	The total number of cartons with full cases.	No. Of Cartons (Loose Cases)	The total number of loose cartons.
Total No. Of Cartons	The total number of cartons to be shipped in the wave.						
No. Of Cartons (Full Cases)	The total number of cartons with full cases.						
No. Of Cartons (Loose Cases)	The total number of loose cartons.						
Total No. Of Batches	The total number of batches in the wave.						
Total No. Of Shipments	The total number of shipments assigned to that particular wave.						

Figure 4–62 Wave End Label

<u>WAVE END LABEL</u>	
Print Ended At: 10/25/2005 14:45	
Wave No.:	3
Total No. Of Cartons:	6
No. Of Cartons (Full Cases):	1
No. Of Cartons (Loose Cases):	5
Total No. Of Batches:	5
Total No. Of Shipments:	5

Table 4–38 Wave End Label

Field	Description
Wave No.	The wave number of the wave created.
Total No. Of Cartons	The total number of cartons to be shipped in the wave.
No. Of Cartons (Full Cases)	The total number of cartons with full cases.
No. Of Cartons (Loose Cases)	The total number of loose cartons.
Total No. Of Batches	The total number of batches in the wave.
Total No. Of Shipments	The total number of shipments assigned to that particular wave.

You can use the Sterling nWMS PCA to configure the Packing Slip format for an Enterprise, Seller Organization, and Buyer Organization.

4.19.2 Typical Preferences

Label preferences for the Wave Start Label and the Wave End Label are typically determined by the enterprise.

4.19.3 Default Preferences

The default label preferences for the Wave Start Label and the Wave End Label are determined by the node and enterprise.

4.19.4 Print Size

Wave Start Labels and Wave End Labels are printed on 4"x 6" label.

Wave Start Labels and Wave End Labels are printed in portrait layout.

4.19.5 Printer Type

Wave Start Labels and Wave End Labels can be printed using zebra printer.

4.19.6 Print Time

Wave Start Label and the Wave End Label are pre-generated and staged at Wave Release. They are then printed at the appropriate printer configured.

Wave Start Label and the Wave End Label can also be printed upon request.

4.19.7 Print Location

Wave Start Label and the Wave End Label are printed at the appropriately configured printer.

4.19.8 Print Documents

The Print Document associated with the Wave Start Label and the Wave End Label is `WAVELABEL`.

The Label Format shipped along with the Sterling nWMS PCA, for the Wave Start Label and the Wave End Label, are `STARTWAVEFORMAT` and `ENDWAVEFORMAT`.

The `YNW_LabelForStartWave.lwl`, `YNW_LabelForEndWave.lwl`, and `YNW_WaveSummaryLabel_Map.xml` files are stored at:

`<YFS_HOME>\template\prints\label\ynw`

Here, `<YFS_HOME>` points to the `<YANTRA_HOME>\Runtime` directory.

4.19.10 Print Service

The service provided for printing the Wave Start Label and the Wave End Label is `YNW_PrintWave_75`.

When a wave is completed, the `On success` event of the `Print Wave` transaction is raised, which invokes the `YNW_PrintWave_75` service.

The `YNW_PrintWave_75` service then initiates the printing of the Wave Start Label and the Wave End Label.

To activate the `YNW_PrintWave_75` service:

1. Navigate to the Outbound Picking Repository.
2. Navigate to the Transaction Repository.
3. Associate the `On Success` event with the `YNW Print Wave(75)` action, which invokes the `YNW_PrintWave_75` service.

Note: The `YNW_PrintWave_75` is activated by default.

4.19.11 Printing Manually

The Wave Start Label and the Wave End Label can also be printed manually upon user request. You can print the labels from the Wave Console.

To print a Wave Start Label and Wave End Label manually:

1. Navigate to `Outbound > Wave Console`. The `Wave By Status` search screen appears.
2. Enter the appropriate search criteria and click `Search`. The `Wave List` screen appears.
3. In the `Wave List` screen do either of the following:
 - Select the check-box against the appropriate wave.

- Click the appropriate wave number.
- 4. Click Print Wave. The Print popup window appears.
- 5. In the Print popup window,
 - a. From the Print Service Name drop-down list, select YNW_PrintWave_75.
 - b. Click OK.

4.19.12 Additional Setup Required

There is no additional setup required to print this document.

A

Configuring Prints

The operation of a warehouse requires numerous documents to be printed daily. The printing of the documents is either initiated by the occurrence of specific events or is requested ad hoc by a user.

For example, carrier labels are printed at a manifest station after the carton is scanned, while a truck manifest (MBOL) is requested when trailer loading is complete and the truck is ready to close.

Documents are printed either individually or in a set or group. A document set consists of multiple documents that are related to individual activity that is performed.

For example, the release of a wave triggers the print of the wave summary report, carton content labels, batch sheets, and packing slips.

Examples of documents printed in a warehouse include Packing Lists, Bill of Lading (BOL), Carrier Labels, Stock Keeping Unit (SKU) Labels, and UCC128 SCM labels.

The Sterling Supply Chain Applications provide standard documents that include:

- Batch Sheet for picking
- Cart Manifest for picking
- Packing Slip
- VICS Bill Of Lading (BOL)
- UCC-128 compliant 4x6 Shipping Labels
- Wave release prints document set consisting of one or more of the above prints

A specific document has a label format and printer sub type associated to it.

The association of a print document to the printer sub type (for example, packing slips on HP LaserJet printers) is done by setting up a printer sub type. For more information about setting up a printer sub type, see [Section B.1, "Defining a Printer Sub Type"](#).

This section explains how to associate a document to a label format and name.

A.1 Defining a Print Document

A document is assigned a name and a corresponding label format. The Sterling nWMS PCA provides a standard list of documents for the prints supported.

For example, the VICS BOL is associated with the VICS BOL label format.

Print documents and label formats created are at the HUB level.

To create a print document:

1. Launch the Sterling Supply Chain Applications Configurator.
2. Navigate to Applications > Platform.
3. From the tree in the application rules side panel, select Prints > Print Documents. The Print Documents screen displays, which lists the Sterling nWMS PCA default print documents.
4. Enter information in the applicable fields.
5. Click .

Note: Sterling Commerce recommends that you do not modify or delete the standard print documents provided.

A.2 Defining Label Formats

This section explains how to define label formats corresponding to documents. Defining label formats enables the association of a label format to the Software™ label format and the mapping XML file.

The Loftware™ label format associated here is created using Loftware™ tools. The mapping XML file is created using the Sterling Supply Chain Applications supplied toolkit. The field binding between the fields in the label and the field in the standard XML published are specified in the mapping XML.

The Sterling nWMS PCA provides standard label formats and mapping files for all standard documents supported. A print is executed through a service flow defined in the Service Definition Framework (SDF). The Sterling nWMS PCA provides data flow for the standard documents provided.

To create a label format:

1. Launch the Sterling Supply Chain Applications Configurator.
2. Navigate to Applications > Platform.
3. From the tree in the application rules side panel, select Prints > Label Formats. The Label Formats screen displays, which lists the Sterling nWMS PCA default label formats.
4. Enter information in the applicable fields.
5. Click .

Note: Sterling Commerce, Inc. recommends that you do not modify or delete the standard label formats provided.

B

Configuring the Printer

All devices in the Sterling nWMS PCA are associated with a device type. For example, a printer is predefined as a device type. You can also define the attributes of the printer.

This appendix explains how to define a printer sub type, a printer device, and the attributes of the printer.

B.1 Defining a Printer Sub Type

A device sub type further categorizes a device type. For example, a device type of Printers can be further categorized or sub-typed into HP LaserJet 5P and Zebra 170. Each individual sub-type enables for device configuration and its respective parameters.

To define a printer sub type:

1. Launch the Sterling Supply Chain Applications Configurator.
2. Navigate to Applications > Platform.
3. From the tree in the application rules side panel, select Device. The Device Setup screen displays.
4. In the Device Setup screen, select Printer.
5. Click . The Device Sub Type pop-up window displays.
6. Enter information in the applicable fields.
7. Click .

B.2 Defining a Printer Device

A device represents an actual device existing on the network, or directly connected to a station or equipment. All instances of a device type and sub-type combination require to be defined as devices. For example, a warehouse that has five HP LaserJet 5P printers and four Zebra R140 printers has all the nine printers configured as devices.

To define a printer device:

1. Follow [Step 1](#) to [Step 4](#) in [Section B.1, "Defining a Printer Sub Type"](#).
2. Select the relevant Printer Sub Type whose printer is to be created.
3. Click . The Device pop-up window displays.
4. Enter information in the applicable fields.
5. Click .

B.3 Defining Printer Attributes

The Sterling Supply Chain Applications supply a list of standard device type, sub type, and individual devices that are supported. The definition of a new device type, sub type and resultant device requires the creation of the appropriate attributes that define the communication with the device.

The list of attributes that control communication to a printer are:

- DropDirectory - The directory where the print files are 'dropped' by the Sterling Supply Chain Applications Application Server. The Software Print Server keeps polling this directory to pick up print requests.

When mentioning the directory structure, you can use the full path name or replace the path name with a variable.

Note: The DropDirectory attribute displays in the Sterling Supply Chain Applications Configurator only if the property `yfs.software.tcpip.sockets` defined in `yfs.properties` is set to 'N'.

- **PrinterAlias** - The printer alias as configured in the Software printer setup.

Note: While setting up a Printer device in the Sterling Supply Chain Applications, please ensure that the Printer Alias is exactly the same as specified in the Software printer set-up.

In instances where a network printer is used, please ensure that the Printer Alias on the Sterling Supply Chain Applications does NOT contain the prefix "\\". However, Software may require the printer to be defined by prefixing "\\".

- **PrinterServerHostName** - The host name for the Software Print Server. While IP Address may be sufficient, the use of host name is recommended for ease of maintenance.
- **PrintServerPort** - The port on which Software Print Server listens for print requests. By default, the print server port for Software Print Server is 2723.

Note: The **PrinterServerHostName** and **PrintServerPort** attributes appear in the Sterling Supply Chain Applications Configurator only if the property `yfs.software.tcpip.sockets` defined in `yfs.properties` is set to 'Y'.

B.3.1 Setting Up a Printer Attribute

Printer attributes define the method of communication with the appropriate device. Each individual brand of printer also has its own unique set of parameters and values. An HP LaserJet printer has a different parameter list in comparison to a Zebra printer.

To set up a device attribute:

1. In Device Attributes panel of the Device pop-up window, click  .
2. The Criteria Parameter Details pop-up window displays.
3. Enter information in the applicable fields.

4. Click .

B.3.2 Defining Printer Preferences

You can set up User Printer Preferences to determine the printer to use when a specific user or user group prints a document.

You can set up Equipment Printer Preferences to determine the printer to use when a specific equipment is used.

You can set up Station Printer Preferences to determine the printer to use for a specific station.

The hierarchy that determines the printer used for printing the document is as follows:

1. The Printer configured for the station or equipment
2. The Printer configured for the user
3. The Printer configured for the user group

B.3.2.1 Defining User Printer Preferences

User Printer Preferences configure printers that are associated with a group of users or a specific user. This preference is used to determine the printer to use when a specific user or user group prints a document.

For example, the receiving office may associate all its users to the HP LaserJet 5P located in the office.

It is recommended that User Printer Preferences be configured at the group level for easier administration.

B.3.2.1.1 For a Group

To set up printer preferences for a group:

1. From the menu, select Applications > Platform. The Platform tree displays in the side panel.
2. From the tree in the application rules side panel, select Security > Groups. The Groups screen displays with a list of groups.
3. In the Groups screen, select the Group whose Printer Preferences are to be set up.
4. Click . The Group Details screen displays.

5. In the Group Details screen, select the Printer Preferences tab. The Printer Association screen displays.
6. Enter the information in the applicable fields.
For field value descriptions, see the *Sterling Warehouse Management System Configuration Guide*.
7. Click .

For more information about Setting Up a User Group, see the *Sterling Supply Chain Applications Platform Configuration Guide*.

The printer at the packing station is associated to the station and not to the packing group or the individual packer. This is also recommended for warehouses that have only a single pack station.

B.3.2.1.2 For a User

Note: It is recommended that User Printer Preferences be configured at a group level for easier administration.

To set up printer preferences for a user:

1. From the menu, select Applications > Platform. The Platform tree displays in the side panel.
2. From the tree in the application rules side panel, select Security > Users. The User Search screen displays.
3. In the User Search screen, enter the applicable search criteria.
4. Click . The list of users displays in the Search Results panel of the User Search window.
5. In the Search Results panel of the User Search screen, select the User whose Printer Preferences are to be set up.
6. Click . The User Details screen displays.
7. In the User Details screen, select the Printer Preferences tab. The Printer Association screen displays.
8. Enter the information in the applicable fields.

For field value descriptions, see the *Sterling Warehouse Management System Configuration Guide*.

9. Click .

For more information about Setting Up a User, see the *Sterling Supply Chain Applications Platform Configuration Guide*.

B.3.2.2 Defining Equipment Printer Preferences

Equipments in the warehouse may have devices attached to them. An Equipment Printer Association defines the association between an equipment and the printer that prints the documents associated with this equipment.

This section explains how to set up an equipment printer association.

To set up an equipment printer association:

1. From the menu, select Applications > Warehouse Management. The Warehouse Management tree displays in the side panel.
1. From the tree in the application rules side panel, select Warehouse Layout > Equipment. The Equipment screen displays with the list of Equipment Types.
2. From the Equipment Types tree, select the relevant Equipment to be associated with a printer.
3. Click . The Equipment Device Association pop-up window displays.
4. In the Equipment Device Association pop-up window:
 - a. In Device Type, select Printer.
 - b. In Device ID, select the appropriate printer.

For more information about the field value descriptions, see the *Sterling Warehouse Management System Configuration Guide*.

5. Click .

Note: Click  in the Equipment Device Association pop-up window to delete a device association (Device Type and Device ID).

B.3.2.3 Defining Station Printer Preferences

A Station may have one or more devices associated with it. A Station Printer Association defines the association between a station and the printer that prints the documents printed at this station.

The association of a printer to a station overrides the group preference of the specified user. The station is a static location where devices may be directly attached to a station.

For example, a packing station can have a printer associated with it.

To set up a station printer association:

1. From the tree in the application rules side panel, select Warehouse Layout > Stations. The Stations window displays with the list of Station Types.
2. From the Station Types tree, select the relevant Station to be associated with a Device.
3. Click . The Station Device Association pop-up window displays.
4. In the Station Device Association pop-up window:
 - a. In Device Type, select Printer.
 - b. In Device ID, select the appropriate printer.

For more information about the field value descriptions, see the *Sterling Warehouse Management System Configuration Guide* click

Note: Click  in the Station Device Association pop-up window to delete a printer association (Printer Type and Printer ID).

Sterling nWMS PCA Prints Samples

This appendix contains samples of the prints that can be generated using the Sterling nWMS PCA.

The prints provided with the Sterling nWMS PCA are grouped into the following classifications:

- [Inbound Prints](#)
- [Inventory Prints](#)
- [Outbound Prints](#)

C.1 Inbound Prints

The inbound prints provided with the Sterling nWMS PCA are:

- [Licence Plate Label](#)
- [Putaway Task List](#)
- [Receiving Worksheet](#)

For more information about inbound prints, see [Chapter 2, "Inbound Prints"](#).
