

IBM FileNet AWP8 Transition Services

ECM Lab Services provides expert assistance transitioning to IBM FileNet P8 with minimal business disruption and project risk.

IBM FileNet P8 delivers many business benefits to our customers. As you consider transitioning to the new IBM FileNet P8 platform, you must evaluate the time, effort, and cost required.

To successfully transition to IBM FileNet P8, you need a trusted advisor that understands your business needs and can ensure that you leverage the full potential of IBM FileNet P8.

ECM Lab Services serves as the strategic catalyst through which a successful transition can be achieved. ECM Lab Services utilizes its years of experience to bring IBM FileNet P8 technology and your organization's vision together for lasting change.

ECM Lab Services provides a family of services that address your needs during the planning, implementation, and migration stages of your transition process. Regardless of where you are in your IBM FileNet P8 transition, ECM Lab Services has the experience, skill, and methodology to ensure that you achieve your ECM business goals.

IBM FileNet P8 Planning Service

The IBM FileNet P8 Planning Service provides expert resources to assist you in planning the transition from your existing Panagon system architecture to a new IBM FileNet P8 architecture. This service assists you by identifying and guiding you through the many decisions that need to be answered to ensure that your organization fully maximizes the benefits of the IBM FileNet P8 platform.

Specifically, ECM Lab Services will;

- Audit and assess your existing system architecture, applications, and business processes

- Identify your possible IBM FileNet P8 options with associated benefits and risks
- Develop the Transition Plan including requirements, functionality, and design of the recommended IBM FileNet P8 architecture
- Create a Deployment Plan describing implementation of the recommended IBM FileNet P8 architecture including all services (packaged and custom), IBM FileNet P8 products to be implemented, phases of implementation (if applicable), and associated costs

Upon completion of the Planning Service, you will have a detailed action plan that will enable you to successfully implement your IBM FileNet P8 systems.

Implementation Services

Implementation Services are designed to provide you with a technically sound and functional system that will allow for the successful development and deployment of your ECM solution. Using ECM Lab Services allows you to be confident that whether your solution is designed and developed by your staff, ECM Lab Services, or a certified partner, it will be expertly installed, tested, and certified for support by IBM FileNet.

During the implementation process, your ECM Lab Services team will generate a "blueprint" that will help you manage system changes in the future, audit any production issues, and document system procedures. ECM Lab Services provides a complete project timeline and installation checklist to closely track the progress of your installation, and conduct formal training sessions for your staff to ensure a smooth rollout of your deployment strategy.

IBM FileNet P8 Transition Services

IBM's vast experience, best practices methodology, and proven toolset ensure your success and minimize user impact and project risk.

Content Migration & Federation Services

Unifying your content throughout your organization is a critical ECM requirement. ECM Lab Services enables you to unify your content through migration or federation.

Migration brings your content together into a single repository. It allows you to standardize on one platform, replace legacy technology, and reduce operational costs.

Federation brings existing content together into a single, global catalog, enabling your new IBM FileNet P8 platform to manage and actively use that content – while maintaining your existing repositories. Federation also allows you to benefit from your new IBM FileNet P8 solution by keeping existing services, repositories, and processes running while you undertake your long-term migration.

Whether you choose to migrate or federate, ECM Lab Services has the expertise to meet your needs. FileNet has experts and lab resources dedicated to content transition. You can be assured that your content transition will be conducted in the most cost effective, technically reliable, and low risk manner possible.

Experience

ECM Lab Services is uniquely qualified to help you transition to IBM FileNet P8 due to its years of experience transitioning legacy IBM FileNet and competitive systems to new IBM FileNet environments. ECM Lab Services has performed hundreds of transitions for customers in a vast number of industries and technical landscapes. Our consultants are certified and work hand-in-hand with FileNet developers, programmers, and product development experts resulting in unmatched product specific knowledge. This combination of experience and expertise results in successful transition engagements and satisfied customers.

No other company is better suited to helping you transition to the IBM FileNet P8 platform. Our vast experience, best practices methodology, and proven toolset ensure your success with minimal user impact and project risk.
