## Revision Log

| Date         | Revision                  |
|--------------|---------------------------|
| Aug 11, 2005 | Initial document release. |

This document describes the minimum hardware and software requirements for the FileNet Forms Manager product release. It also defines the minimum supported levels of third-party software components. In general, you can install and run with more current patch releases, service packs or minor releases if they are forward-compatible. The information in this document takes precedence over any requirements stated elsewhere.

This version of FileNet Forms Manager is qualified for FileNet eForms Designer 5.0.0-001 and FileNet Desktop eForms 5.0.0-001.

**NOTE** For hardware and software requirements for eForms Designer and Desktop eForms, retrieve the following documents from the FileNet Worldwide Customer Support web site:

- [eForms Designer 5.0.0x Hardware and Software Requirements](#)
- [Desktop eForms 5.0.0 Hardware and Software Requirements](#)

## Client Requirements

Acrobat Reader 5.0 is required for generating a PDF from a form and for displaying manuals.

All browsers must support HTML 4.0, CSS 2.0, and JavaScript 1.5.

### Windows

| Windows Operating Systems | Browsers   |
|---------------------------|--|
| XP Professional SP2       | <ul style="list-style-type: none"> <li>• Internet Explorer 6.0 SP2</li> <li>• Netscape Navigator 7.1 and 7.2</li> </ul>          |
| 2000 Professional SP4     | <ul style="list-style-type: none"> <li>• Internet Explorer 5.5. and 6.0 SP1</li> <li>• Netscape Navigator 7.1 and 7.2</li> </ul> |

### Macintosh

| Macintosh Operating Systems | Browsers   |
|-----------------------------|--|
| OS 10.3.9                   | <ul style="list-style-type: none"> <li>• Netscape Navigator 7.2</li> </ul> |
| OS 10.2.6                   | <ul style="list-style-type: none"> <li>• Netscape Navigator 7.2</li> </ul> |

## Server Requirements

| Operating Systems  | Other Software  | Hardware   |
|--|---|--|
| <ul style="list-style-type: none"> <li>Microsoft Windows 2000 Server SP2 with Microsoft Internet Information Server (IIS) 5.0</li> <li>Microsoft Windows 2003 Server SP1 with Microsoft Internet Information Server (IIS) 6.0</li> </ul> | <ul style="list-style-type: none"> <li>Microsoft .NET Framework 1.1 SP1</li> <li>SQL Server 2000 SP4</li> </ul>   | <ul style="list-style-type: none"> <li>Recommended minimums: 1 GHz or higher Pentium-compatible processor with 1GB RAM and 2GB of free disk space after installation.</li> </ul> |
| <p>The files listed in the next column are installed if they do not already exist on the machine.</p>  | <ul style="list-style-type: none"> <li>MDAC 2.7 SP1</li> <li>Microsoft XML 4.0</li> <li>CapiCom.dll version 2.0</li> </ul> <p><b>NOTE</b> During the installation of Forms Manager, CapiCom.dll version 2.0 is installed on the server. Client machines that are running Windows XP also have this dll. However, in order to sign forms using the Microsoft CSP signing service, users running other Windows operating systems must install this dll on their workstations. Users should go to <a href="http://www.microsoft.com">www.microsoft.com</a>, search for "capicom.dll", and download the file.</p> |  |

## Other

| Operating Systems   | Third-Party Products   |
|---|--|
| <ul style="list-style-type: none"> <li>All supported operating systems</li> </ul> | <ul style="list-style-type: none"> <li>Entrust® 6.x</li> </ul> |
