IBM

OnDemand for i5/OS
International Workshops
October 8 through October 19, 2007

You are invited to workshops to learn about the OnDemand for i5/OS product. The workshops will be held in Mainz, Germany. There is no cost for the workshops. Attendees are responsible for their travel and living expenses. The workshops will consist of presentations and some hands-on lab exercises. We invite all attendees to bring tips and techniques that they would like to share with others. There will be plenty of opportunities for discussion and sharing during the workshops. The following workshops will be taught:

OnDemand Common Server Implementation
October 8 through October 10
OnDemand for i5/OS Certification
October 11 through October 12
OnDemand Marketing and Strategy
October 15 through October 16
OnDemand Advanced Topics
October 17 through October 19

If you are interested in attending, send a note to Peter Seckinger, psecking@de.ibm.com.

More details on each workshop are given below:

IBM

OnDemand Common Server Implementation
OD Workshop Session 1
October 8 through October 10, 2007

<u>Audience</u>
➤Individuals who plan to implement the Common Server feature of OnDemand for i5/OS.
➤IBM Business Partners and IBM employees who work with customers who use OnDemand for i5/OS.
➤This is a technical class for new OD Administrators, can also be used as a refresher class for those who attended a class already but haven't worked a lot with OnDemand so far.

<u>Prerequisites</u>
Experience with the iSeries (AS/400) is required. You should be able to work with spooled files, output queues, job queues, and commands and have basic familiarity with Microsoft Windows and with iSeries Access Express.

Common Server Implementation Agenda

Technical setup of your own workstation
- Ethernet connection to System i
- Install iSeries Access v5r4 and iSeries Navigator

Course outline

- Overview of OnDemand for i5/OS Common Server
- Product structure and terminology
- Exploring the end-user interface
- Users and groups
- Application groups, applications, and folders
- Migration policies
- Output queue monitor definitions
- Archiving and retrieving reports
- Tailoring OnDemand for the end user
- Using the Report wizard
