

IBM Cognos 8 Business Intelligence v8.4.1
Issues corrected since v8.4FP2
December 8, 2009

Note: Items with a PK or PM reference are APARs and are searchable on IBM.COM. If you have questions about a particular defect, please contact Customer Support.

Number	Description
PK92152	Drag/Drop stand alone filters create them at Detail/Summary level depending on whether a filter was already set
PK88382	Query Studio undo button not working properly
PK99497	RSV-BBP-0037 when clicking Back button in browser
PK88563	Burst Report runs slower in 8.3 vs. 8.2
PK97131	Cant run HTML item report within 8.4ga if no permissions to RS or package
PK90937	Rank calculation output not showing expected result
PK89081	Error when selecting a folder tab which has subfolder in a multipage portlet - Unexpected exception while executing the
PK89737	Search / Pick prompts not populated in Query Studio when data is turned off with multiple connections to the data source
PK90501	Public Folders displayed in Query Studio when paging in large report
PK96220	Memory leak in Series7 provider OS Signon
PK88182	Slow TOPN performance using analysis studio and MSAS
PK88911	QE-DEF-0261 QFWP - Parsing error when modifying existing filter in query studio in 8.4FP1
PK88035	Report fails if left pending longer than passport timeout period
PK88659	Unioned Data source BW and MSSQL, Variables do no run when the report is scheduled
PK91077	Send me the report by email run option fails
PK88795	Combined dimension crosstab includes some incorrect summary values
PK90365	After installation of 1013/1044/1050/1071, Unable to run Query Studio report outputs - CV-0002 The request is not valid
PK90538	Summaries show '--' with secured time partitioned cubes when category does not have data in all cube partitions.
PK90946	Drilling through with Apostrophes fails with QE-DEF-0260 Parsing error
PM00587	Prompt page consisting of optional prompts not displayed if read permission not granted.
PK91172	Prompt in a Layout Component Reference automatically uses thousand separator
PK88603	Model filter does not appear in Combine Filters Dialog
PK97801	Excel 2007 Inserting Illegal XML Characters
PK91908	Concatenation calculation in copy of Oracle DB query subject causes unnecessary CASE statements
PK96343	Passing multiple values as a parameter in a Stored Procedure
PK92185	Performance is slow when multiple users are clicking on metrics
PK92648	Having more than 50 qualifiers prevents users from creating metrics with qualifiers via the UI.
PK91736	Crosstabs overlap if data grows in Go! Office Excel
PK88048	Null suppression shifts values when multiple measures are added into different row level
PK92499	Excel crashes after following sequence of steps within CAFE
PK93372	Bursting not available when scheduling a Report View
PK89301	Prompt value is listed twice in one parameter after selecting Portlets not using a channel Report properties in viewer
PK91076	Get RSV-SRV-0040 when running report with repeater table as PDF
PK91696	Cannot generate SQL or view tabular data for query when measure has aggregation property set to Total or Automatic
PK92852	RSV-ERR-0040 in reports with hierarchy node variable after applying 8.4.28.1081
PK91896	Browser freezes after filter execution cancelled.
PK93480	Parsing Error QE-DEF-0260 When Editing a Filter
PK88810	Following an upgrade to 8.4 execution of reports with tree prompts throws DPR-ERR-2071
PK91724	Crosstab space causes issue with handling of no data container
PK88967	Cannot Print PDF in Landscape format in unix
PK93920	OLE Format (unknown member) : Invalid request. This method only applies to OLE objects.
PK88304	RSV-RND-0017 error in Excel in C8.3 SP1 where CRN worked fine
PK93107	RSS feed results in XSLT transform instruction error when CAF enabled
PK88770	Attempting to assign permission to a scorecard fails with 'java.lang.NullPointerException'
PK92427	Text Prompt with default values throws one or more of the required values is missing. Required values are needed to prod
PK95503	Fails to open stub cube when non English language is selected for non unicode program.
PK90222	Creating union between two query subject craches FM
PK93287	View report output versions - several reports created
PK89271	Transformer .mdl can't open when char '1A' exists in a category label
PK91370	8.2 DMR Sample shows incorrect sub-totals in 8.4
PK92666	QE-DEF-0030 QE-DEF-0359 when combining filters with model filters

IBM Cognos 8 Business Intelligence v8.4.1
Issues corrected since v8.4FP2
December 8, 2009

PK98567	Monitor service throws exception on secondary request wait in C#
PK92301	spacer.gif missing in c8 (install location)\webcontent\skins\corporate\branding
PK94626	CM-REQ-4029 Your request does not contain a required search path - when doing import of deployment
PK91352	Can not cancel popup window if error raised during Tree prompt navigation.
PK94769	Slow Performance when opening Report Tab
PK88381	Slow performance in Metric Studio with Oracle 10G (with metric level permission)
PK94836	Error when using % of base(x,y) in report studio express
PK91482	Select Search Paths in 8.4 Upgrade Manager does not list objects in alphabetical order.
PK91815	HTTP 500 error when selecting any value below the root level in a tree prompt
PK92427	Error message when running report in batch mode with multi-select date&time prompt on 8.3.85.1009
PK91727	Drill through parameter is not maintained in the search and select prompt
PK88200	Incremental Indexing generate CSN-IDS-0002 Cannot delete_document from index with GUID: 0. IndexReader out of date and n
PK92868	Loop warning message in Query studio after removing the query subject to another location.
PK90301	Drill Through Wait Dialogue
PK97396	OLAP to REL PCTime drill through causes truncated characters
PK91441	Two consecutive spaces in a data value interpreted wrong when exported into Excel 2002
PK96842	System function returning unexpected value on success
PK95156	Error doing calculations in Query Studio when using various English versions
PK94977	TR0649 and TR0646 errors when validating an upgraded transformer model from 8.3 to 8.4
PK90322	Re-run of previously failed crosstab report leads to wrong result
PK94746	Expand and Down a Level Issue after Hotsite
PK90316	Crosstab report fails in 8.4 with "PDS-PPE-0104 A record was rejected. An arithmetic overflow occurred
PK93856	Outputting to Excel2007 wraps text into a second row when at least 155 characters. Formatting in Excel 2002 does not create the wrapped rows
PK95292	Javascript error when accessing dashboard via a URL
PK94012	CMM-SYS-5999 String or binary data would be truncated
PK94514	Automatic deletion in transformer delete any ver file which has the cube name as the beginning.
PK94587	User does not display in permissions pane if the user path in Active Directory contains the character &
PK95134	Upgrading report from 8.2 to 8.4 fails with OP-ERR-0115
PK96051	Installing C8.4FP2 causes a runtime error in running Excel report
PK92650	Data types of operands not compatible error when filtering on numeric Query Item with Prompt Type of Edit Box
PK92881	Charts do not Render Properly in the Cognos Viewer When Moving Through Dashboard Tabs
PK91890	Default value not recognized when viewing a generated prompt on top of a bw variable
PK94634	Transformer MDL upgraded from 7.3 causes errors when saving in 8.4GA
PK94560	Total Line Displaying Inflated Values for User
PK94641	CMM-SYS-5999 when using multiple Metric Stores in one DB2 database
PK97284	Selecting a Scorecard (using the Create Extract Wizard), with a DB2 metric store, results in an error
PK93682	Long calculation definition expression causes browser error
PK93755	Attempting to open two instances of the same remote cube with PP Client throws PDS-PCT-0041
PK93755	Attempting to open two instances of the same remote cube with PP Client throws PDS-PCT-0041
PK97266	Substitution Variables are not being picked up on report execution
PK92516	CAFE formats dates in the wrong format (3/8/2009 - MM/DD/YYYY) when set as Mmm YY in the transformer model
PK98690	Get TR0625 and TR1102 error, when create cube on Solaris & TR8.4
PK97080	Validate a query calculation in RS causes error but at runtime query calculation is working fine
PK96540	Extremely poor CAFE performance going against oracle data source
PK89103	Migrating PP7 content within C8 with no specified object owner causes a MGD-msg-0460 Request Error:
PK90221	Drill Through does not pass date range from cube to relational report
PK97355	Initialize Metric Store fails when DB2 Database name has more than 7 characters: CMM-APP-3254, DIS-ERR-3115, SQL0204N, SQLSTATE=42704
PK97870	CM-REQ-4029 error when editing prompt values on report view schedule in hot site 8.4.28.1100
PK92410	A job that contains no steps shows a status of Failed when run. It should show a status of Succeeded.
PK93498	Apex security restriction does not work in Cognos Analysis for Excel report
PK99194	Import flat files error: DIS-ERR-3115 The task failed while having .ccq file
PK99204	g_PS_errURL variable is not JavaScript encoded in ps/portal/IFaultHandler/handleFault.xts
PK90770	tm1odp.dll contains a hardcoded version-dependent reference to the Windows registry key

IBM Cognos 8 Business Intelligence v8.4.1
Issues corrected since v8.4FP2
December 8, 2009

PK95377	RQP-DEF-0177 error when performing a dynamic drill for dates in FP2. This worked in 8.4 FP1.
PK92579	Unable to set a default value when one filter is created in the FM Model and another one in the query studio report Cognos 8.4 FP1
PM00600	Dates not pass dateRange from Cube to Relational
PK90151	Unable to import PowerPlay reports from a 8.4 server to Go Office
PK90913	Cognos 8 BI 8.4 Analysis Studio: Percent values appears as decimal values when using multiple measures in the columns
PK89357	Default email option behaviour has changed after installing IBM Cognos 8.4 FIXPACK 1 which causes an error.
PK93372	Bursting not available when scheduling a Report View
PK91457	cell width different to column width of a report run in portlets
PK93089	CPS-TRS-4107 The ASSEMBLER transform instruction encountered an error while parsing the content.
PK92699	Metric List on SAP are unable to show.
PK96013	javascript error when rerun a report using toolbar on SAP portal's viewer
PK88460	Drill through fail with error PCA-ERR-0012 after upgrade to 8.4 from 8.2
PK90912	Field setting in second page above of Drill-Through definition are being discarded.
PK91727	Drill through parameter is not maintained in the search and select prompt
PK89603	Select and Search - Static choices are no longer displayed.
PK88632	Search & Select prompt values cleared on Prompt page refresh containing two Search & Select prompts
PK87755	Report Server cores on AIX when pivoting on dmr based root member
PK89281	Upgrade - 8.1 to 8.4 Chart with Union(cube) shows different results
PK90327	"RQP-DEF-0114 The user cancelled the request" error when trying to execute any report while executing report in a background
PM00560	Aggregation Rules on a Measure Dimension cause poor performance
PK89253	Aggregate Rule Last uses local processing generating large UDA temp files
PK92779	Repeater in footer does not show in HTML but does in PDF
PM02581	Using IBM Cognos 8 Business Intelligence 8.4.1 with IBM Cognos 8 TM1 portlets or IBM Cognos 8 Planning
PM02578	Using IBM Cognos 8 Business Intelligence 8.4.1 with IBM Cognos 8 TM1 portlets or IBM Cognos 8 Planning
PM02577	Using IBM Cognos 8 Business Intelligence 8.4.1 with IBM Cognos 8 TM1 portlets or IBM Cognos 8 Planning
