DB2® Information Management Software

Solution Designer skills roadmap for IBM Content Manager Version 8.0
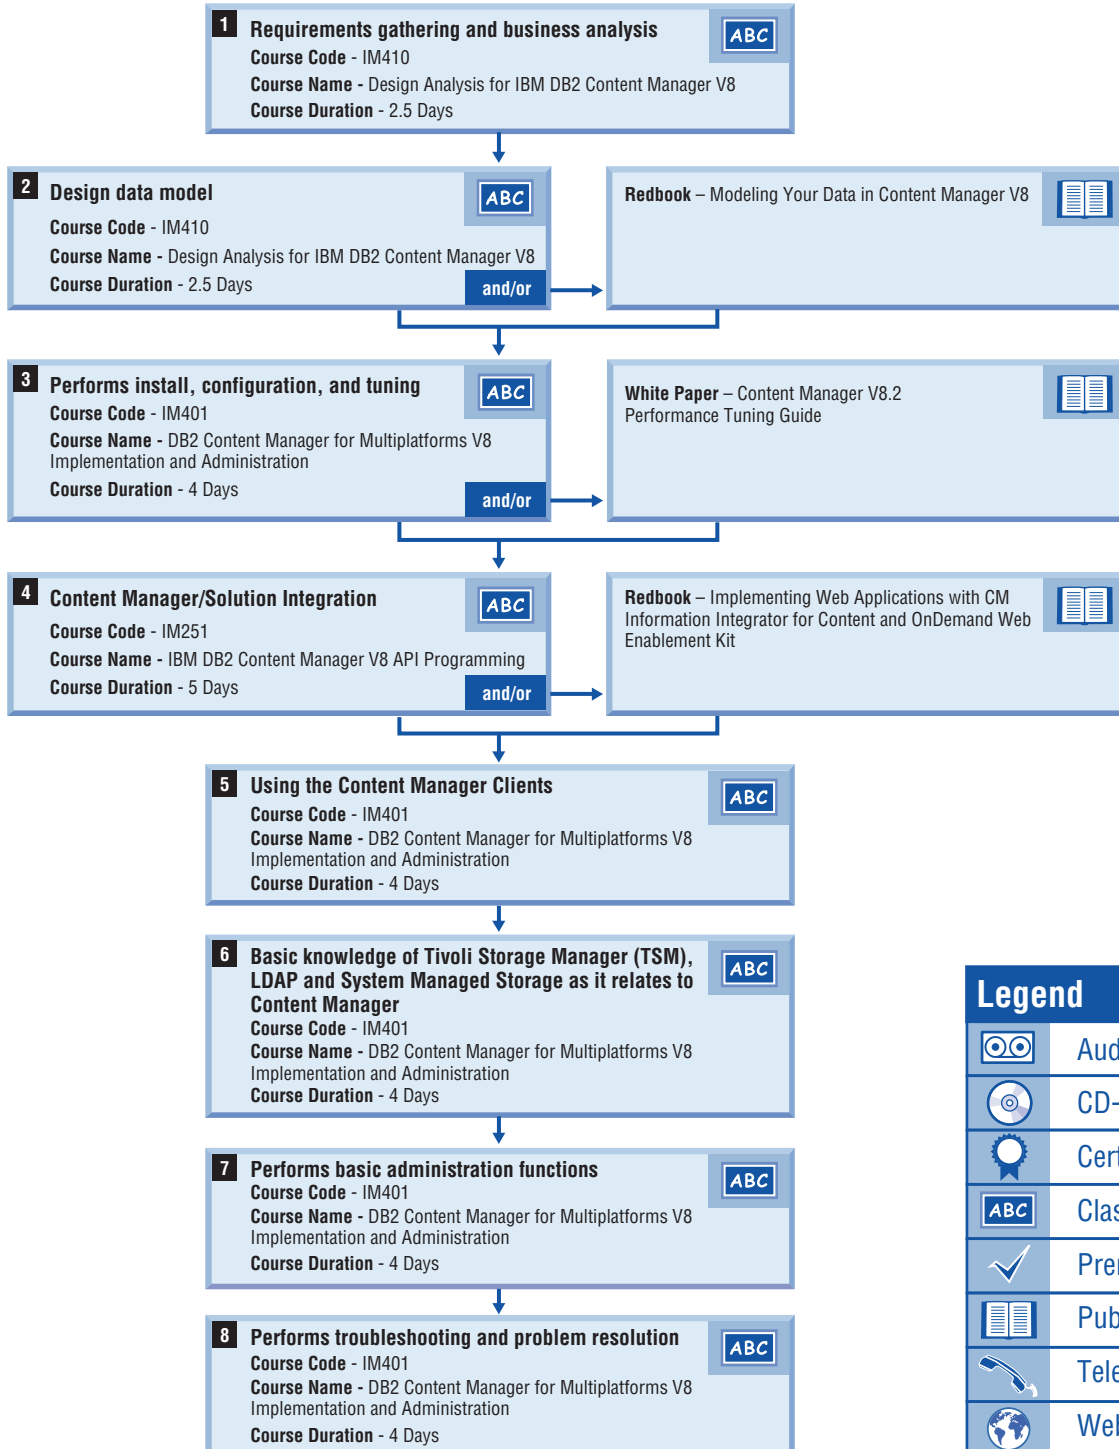

IBM®

Role
This role interprets the customer's requirements, and designs/architects a solution that maps to those requirements.
This role performs business analysis, designs the data model, plans and performs the installation and configuration, and performs basic system administration functions. Most IBM Business Partners and IBM technical services professionals will fall within this role.

Assumptions
- Working knowledge of underlying operating system platforms
- Basic knowledge of WebSphere Application Server and database (DB2, Oracle)–for install and administration
- Working knowledge of Object Oriented Programming (OO) using Java or C++

Objective
Build working knowledge of Content Manager V8

1 Requirements gathering and business analysis `ABC`
Course Code - IM410
Course Name - Design Analysis for IBM DB2 Content Manager V8
Course Duration - 2.5 Days

2 Design data model `ABC`
Course Code - IM410
Course Name - Design Analysis for IBM DB2 Content Manager V8
Course Duration - 2.5 Days
`and/or`

Redbook – Modeling Your Data in Content Manager V8

3 Performs install, configuration, and tuning `ABC`
Course Code - IM401
Course Name - DB2 Content Manager for Multiplatforms V8 Implementation and Administration
Course Duration - 4 Days
`and/or`

White Paper – Content Manager V8.2 Performance Tuning Guide

4 Content Manager/Solution Integration `ABC`
Course Code - IM251
Course Name - IBM DB2 Content Manager V8 API Programming
Course Duration - 5 Days
`and/or`

Redbook – Implementing Web Applications with CM Information Integrator for Content and OnDemand Web Enablement Kit

5 Using the Content Manager Clients `ABC`
Course Code - IM401
Course Name - DB2 Content Manager for Multiplatforms V8 Implementation and Administration
Course Duration - 4 Days

6 Basic knowledge of Tivoli Storage Manager (TSM), LDAP and System Managed Storage as it relates to Content Manager `ABC`
Course Code - IM401
Course Name - DB2 Content Manager for Multiplatforms V8 Implementation and Administration
Course Duration - 4 Days

7 Performs basic administration functions `ABC`
Course Code - IM401
Course Name - DB2 Content Manager for Multiplatforms V8 Implementation and Administration
Course Duration - 4 Days

8 Performs troubleshooting and problem resolution `ABC`
Course Code - IM401
Course Name - DB2 Content Manager for Multiplatforms V8 Implementation and Administration
Course Duration - 4 Days
