

SESSION ABSTRACT

E85 IMS Connector for Java: Developing Web Applications for Accessing IMS Transactions

Haley Fung

Come to this session to learn about building Java beans and Java applications with the VisualAge for Java development environment. This topic utilizes basic Java concepts to address the creation of Java applications and servlets that use IMS Connector for Java to run IMS transactions. This presentation also explains how to use WebSphere Studio to create Java servlets from your Java beans, and how to execute them in the WebSphere Application Server environment.
