**S60 Fast Path DEDB Performance Considerations**

*Bill Stillwell*

This session identifies DEDB design and processing characteristics that impact performance. Several techniques for monitoring and tuning the DEDB and the IMS system are also addressed. These techniques include the Fast Path Log Analysis Utility and the IMS Performance Analyzer V3.1. This topic builds on information learned in *B08 – Fast Path DEDB Fundamentals* and *A37– Fast Path DEDB Advanced Topics* sessions.
