Session Abstract

E02   IMS SYSGEN for First Timers
Charles Ryan, IBM Silicon Valley Laboratory

This session teaches you the basics of defining resources in IMS. It introduces the more common macros and shows how to use them to create input for the IMS SYSGEN process. After attending this session, you may also want to go to session E33, IMS Version 7 Installation and Generation (double session), for more details on how the IMS SYSGEN works and the steps involved in the process.
