

TOC**INDEX****VIEW****E39 Exploiting IMS Tools in a Sysplex Environment**
Raquel Carvalho, IBM Silicon Valley Laboratory

Learn to exploit IBM's IMS tools to their fullest capability in a sysplex environment. This session discusses optimal use of the following tools: IMS Queue Control Facility for z/OS, IMS High Performance System Generation Tools for z/OS, IMS Command Control Facility for z/OS, and IMS Program Restart for OS/390. This session details tool configuration and execution considerations which are pertinent in a sysplex environment. Learn how to ensure /DBR commands are processed successfully in the IMSPLEX, how to coordinate online change for all IMSPLEX systems, restart application programs on any IMS in the sysplex and how to protect and balance your shared queues.
