

H01 IMS Connect Workshop: Creating Web Applications Connecting to IMS (double session)
Suzie Wendler/Ken Blackman, IBM Dallas Advanced Technical Support

This double session features hands-on labs using IMS Connect and the new WebSphere Application Developer Integration Edition (WSAD IE) toolkit. In the session you will: configure and work with your own IMS Connect system; get first-hand experience on how it interacts with IMS; and finally create a Web Application to access an IMS transaction using the WSAD IE tool.

Before attending this session, you should understand basic IMS Connect concepts, which can be obtained by attending session E17, IMS Connect, or by prior training or experience.
