

# What's New in IMS Tools ?

## **E08**

Elmer Rohde

**Las Vegas, NV**

**September 15 - September 18, 2003**

# AGENDA

- INTRODUCTION
- IMS TOOLS Sessions
- New Products / Ver / Rel since last IMS Tech Conf
- IMS Tools for IMS V9
- Requirements Answered
- What could be next

# INTRODUCTION

- Elmer C.Rohde
  - ▶ IBM from 1967 - 1996
    - CE, PSR, IMS
  - ▶ ICING 1997 - 1999
    - Contract Employee
  - ▶ IMS Tools 2000 - 2003
    - Marketing/Requirements

# IMS Tools Sessions

<u>Session</u>	<u>Day</u>	<u>Time</u>	<u>Subject</u>
F01	Mon	10:15	DB2 IMS Tools
H01	Mon	12:45	HPCA Workshop
C01	Mon	12:45	Customer (Connect)
E08	Mon	2:15	What's New in Tools
H03	Mon	2:15	Connect Wrkshp P1
E55	Mon	4:00	HALDB Conv Aid
H03	Mon	4:00	Connect Wrkshp P2
E87	Tue	8:30	IMS PI & PA

# IMS Tools

## Database Administration

- ▶ **IMS High Performance Unload 5655-E06**
- ▶ **IMS High Performance Load 5655-E07**
- ▶ **IMS High Performance Prefix Resolution V2 5655-I15**
- ▶ **IMS Index Builder V2.R3 5655-E24**
- ▶ **IMS Parallel Reorganization V2 5655-F74**
- ▶ **IMS High Performance Pointer Checker V2 5655-K53**
- ▶ **IMS Data Base Repair Facility 5655-E03**
- ▶ **IMS High Performance Sysgen Tool 5655-F43**
- ▶ **IMS Command Control Facility 5655-F40**
- ▶ **IMS ETO Support 5655-E12**
- ▶ **IMS Library Integrity Utilities 5655-I42**
- ▶ **IMS Sequential Randomizer Generator 5655-E11**
- ▶ **IMS Compression - Extended 5655-E02**
- ▶ **IMS Data Base Control Suite V2R2 5655-F76**
- ▶ **IMS Fast Path Basic Tools 5655-E30**
  - **DEDB Unload/Reload**
  - **DEDB Pointer Checker**
  - **DEDB Tuning Aid**
- ▶ **IMS Fast Path Online Tools V2 5655-F78**
  - **Online Pointer Checker**
  - **Online Data Extract**
  - **Online Area Extend**
- ▶ **IMS HALDB Conversion and Maintenance Aid V2 5655-K47**
- ▶ **Batch Backout Manager 5697-H75**
- ▶ **Data Encryption V1 5799-GWD**
- ▶ **IMS Online Reorg Facility 5655H97 ESP ONLY**

## Performance Management

- ▶ **IMS Performance Analyzer V3R2 5655-E15**
- ▶ **IMS Network Compression Facility 5655-E41**
- ▶ **IMS Queue Control Facility V1.2 5697-E99**
- ▶ **IMS Workload Router V2.3 5697-B87**
- ▶ **IMS Buffer Pool Analyzer 5697-H77**
- ▶ **IMS Problem Investigator 5655-K50**
- ▶ **IMS Performance Monitor 5655-G50**  
**ESP ONLY**

## Recovery / Replication

- ▶ **IMS Image Copy Extensions V2R1 5655-J56**
- ▶ **IMS DEDB Fast Recovery V2R2 5655-E32**
- ▶ **Application Rec Tool for IMS & DB2 V1R2 5697-F56**
- ▶ **Online Recovery Service (ORS) 5655-E50**
- ▶ **IMS Data Propagation V3R1 5655-E52**
- ▶ **IMS High Perf Change Accumulation 5655-F59**
- ▶ **IMS Database Recovery Facility 5655-I44**

## Application Management

- ▶ **IMS Connect V2R1 5655-E52**
- ▶ **IMS M FS Reversal Utilities 5655-F45**
- ▶ **IMS Program Restart Facility 5655-E14**
- ▶ **Batch Terminal Simulator V3 5655-J57**
- ▶ **IMS Multi-Dialog Manager 5697-H91**

# Encryption for IMS and DB2 Databases 1.1 Overview

- **Easy panel driven data entry function helps build the appropriate JCL jobstream to create an encryption exit**
- **Implementation using the standard IMS Segment/Edit Compression and DB2 EDITPROC exits.**
- **Requires Security Analyst/System Programmer expertise to set up an encryption key token or tokens using z/OS Integrated Cryptographic Services Facility (ICSF) before this product can be utilized**

# Encryption for IMS and DB2 Databases

## Data Entry Panel Populated for an IMS Exit

```
DATA ENCRYPTION FOR IMS AND DB2 DATABAS "DOWN" is not active

Command ==> _____

Press ENTER to continue or END to exit

Specify encryption key to be implemented.
Key token . . ABCDEF

Specify encryption JCL parameters.
Jobcard . . //BILDDECX JOB (GGJ),
          . . //          'GEOF',REGION=OM,TIME=5,MSGCLASS=H,CLASS=A,
          . . //          NOTIFY=GGJ
          . . _____
          . . _____

CSF lib . . SYS1.LINKLIB
ZAP lib . . SYS1.MIGLIB
SMP lib . . IMSTOOL.DEC.ADECMOD0
Exit lib . . HCO.DEC.SDECLMD0
Exit name . . ENCREXIT
DBMS . . IMS (IMS or DB2)
```

### Need help?

- Press F1 if you need guidance setting up JCL parameters

# Encryption for IMS and DB2 Databases

## Data Entry Help Panel

```
Help panel  DATA ENCRYPTION FOR IMS AND DB2 DATABASES - BASE
COMMAND ===> _

Specify encryption key to be implemented
Key token - Enter a key token identifier that encryption will use to b
            encrypted data. Key tokens are defined by the installer of
            Integrated Cryptographic Service Facility (ICSF) .

Specify encryption JCL parameters.
Jobcard   - Enter up to 5 lines of job card data.
CSF lib   - The library where the Integrated Cryptographic Service Fac
            (ICSF) modules CSNBENC and CSNBDEC reside.
ZAP lib   - The library where the AMASPZAP (load module zap program) r
IBM lib   - The SMP library where the encryption routines have been in
Exit lib  - The exit library where the encryption exit will be placed.
Exit name - The name of the encryption exit.
DBMS     - Enter IMS or DB2 to indicate the database management syste
            that will use the encryption exit.
```

### More help?

- Further information is available in the Users Guide and the ICSF publications

# Encryption for IMS and DB2 Databases

## ISPF Edit Job Submission Panel - First Step of IMS Job

```
File Edit Edit_Settings Menu Utilities Compilers Test Help
EDIT      GGJ.JCLOUT                      Columns 00001 00072
Command ==> _                          Scroll ==> PAGE
***** ***** Top of Data *****

# Encryption for IMS and DB2 Databases 1.1 Summary

- **Easy panel driven data entry function helps build the appropriate JCL jobstream to create an encryption exit**
- **Easy to read documentation**
- **Implementation using the standard IMS Segment/Edit Compression and DB2 EDITPROC exits.**
- **Questions: [m2saint@us.ibm.com](mailto:m2saint@us.ibm.com)**

# Highlights of IMS HP Pointer Checker Version 2

This new version improves performance and needs less DASD space!

## ■ Main New enhancements

- ▶ Performance is improved by:
  - Parallel Scans of Databases
  - Introducing Smaller Sort Records
  - Eliminating the Merge Step
  - Optimizing Work Buffers and Providing VSCR relief
- ▶ Usability is improved with simplified setup and operation
- ▶ Reporting is improved
  - Decoding DBD source
  - Creating DBD map
- ▶ Performance Evaluation

# Performance Improved by Parallel Scans of Databases

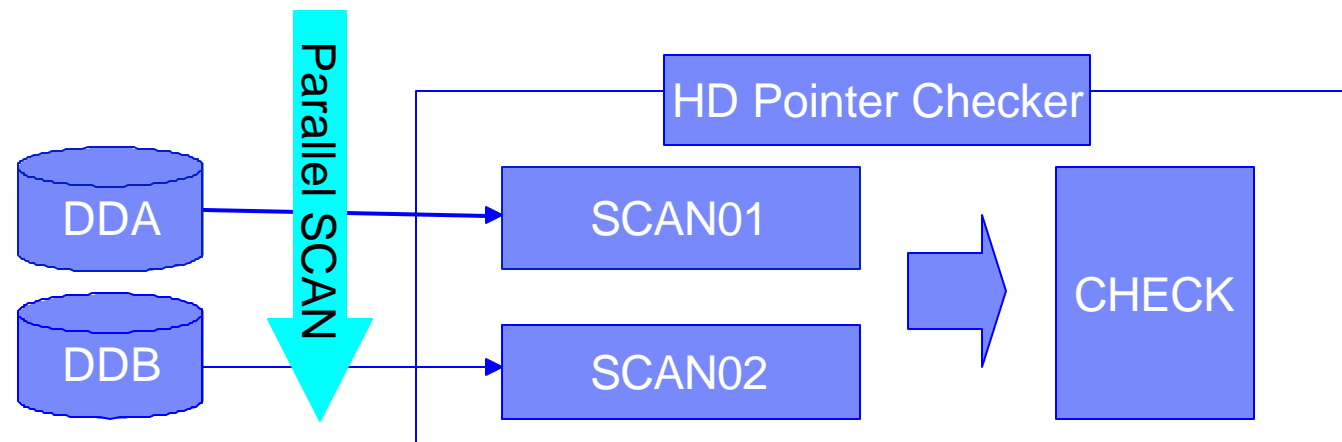

- New option SCANGROUP= is introduced.
- Database data sets and Image Copy data sets are read in parallel between different scan groups.
- Example: DDA and DDB are scanned in parallel

```
//PROCCTL DD
```

```
TYPE=ALL
```

```
DATABASE DB=DB1,DD=DDA,SCANGROUP=01
```

```
DATABASE DB=DB1,DD=DDB,SCANGROUP=02
```

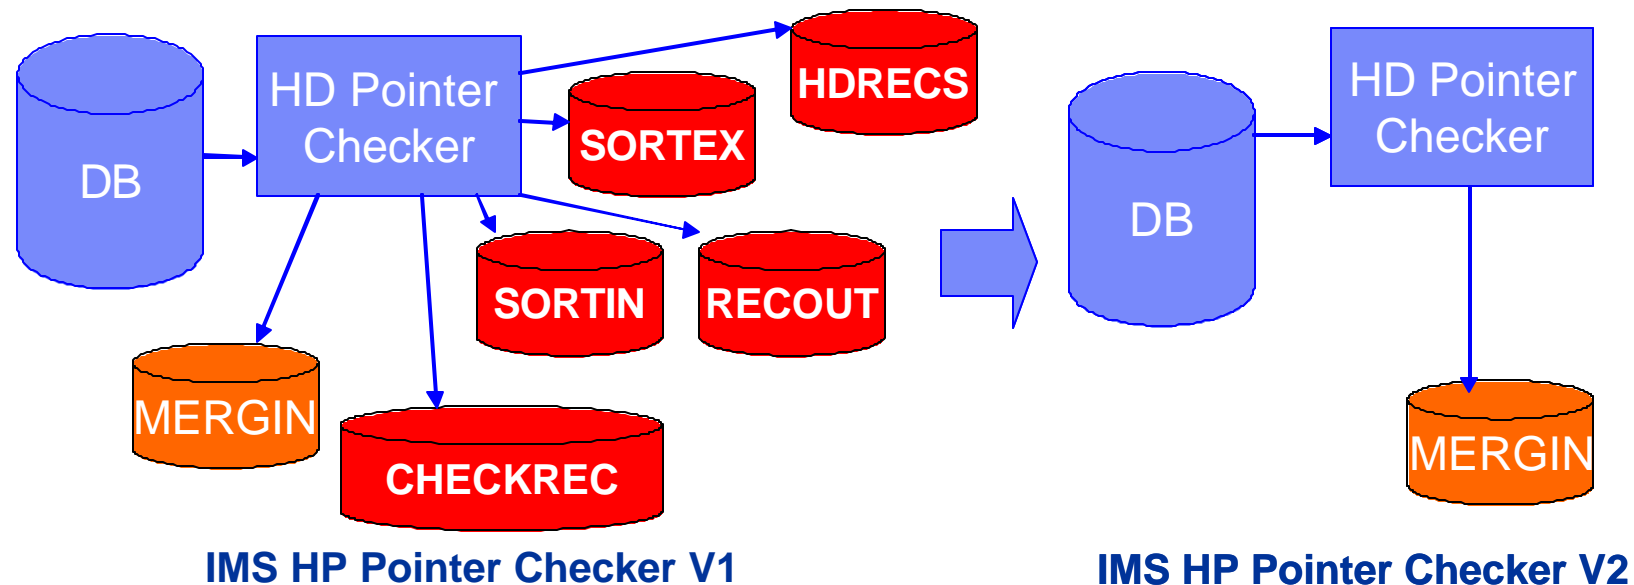

# Performance Improved by Smaller Sort Records

- Both quantity and record length of sort record are reduced.

## *Smaller DASD space*

- Only MERGIN work data set remains\*.

\*: When PROC TYPE=ALL,IXKEYCHK=NO,EPSCCHK=NO is specified in the PROCCTL data set

# Performance Improved by:

- Eliminating the Merge Step
  - ▶ Eliminating the merge step of segment and pointer records.
  - ▶ Reading sequentially segment and pointer records instead of the Merge step.
- Optimizing Work Buffers
  - ▶ Optimizing work buffers of work data sets.
- Providing VSCR relief
  - ▶ Work buffers and some internal control blocks are moved to above 16M.

# Usability improved with simplified Setup and operation

- **Installation**

- ▶ **Simple IVP job that generates a short report is provided.**

- **JCL**

- ▶ **The number of work data sets is reduced. Estimation of DASD space becomes simpler.**
- ▶ **Need not separate SCAN jobs from CHECK job to scan the databases in parallel. All you need to do is specify SCANGROUP option in one job.**

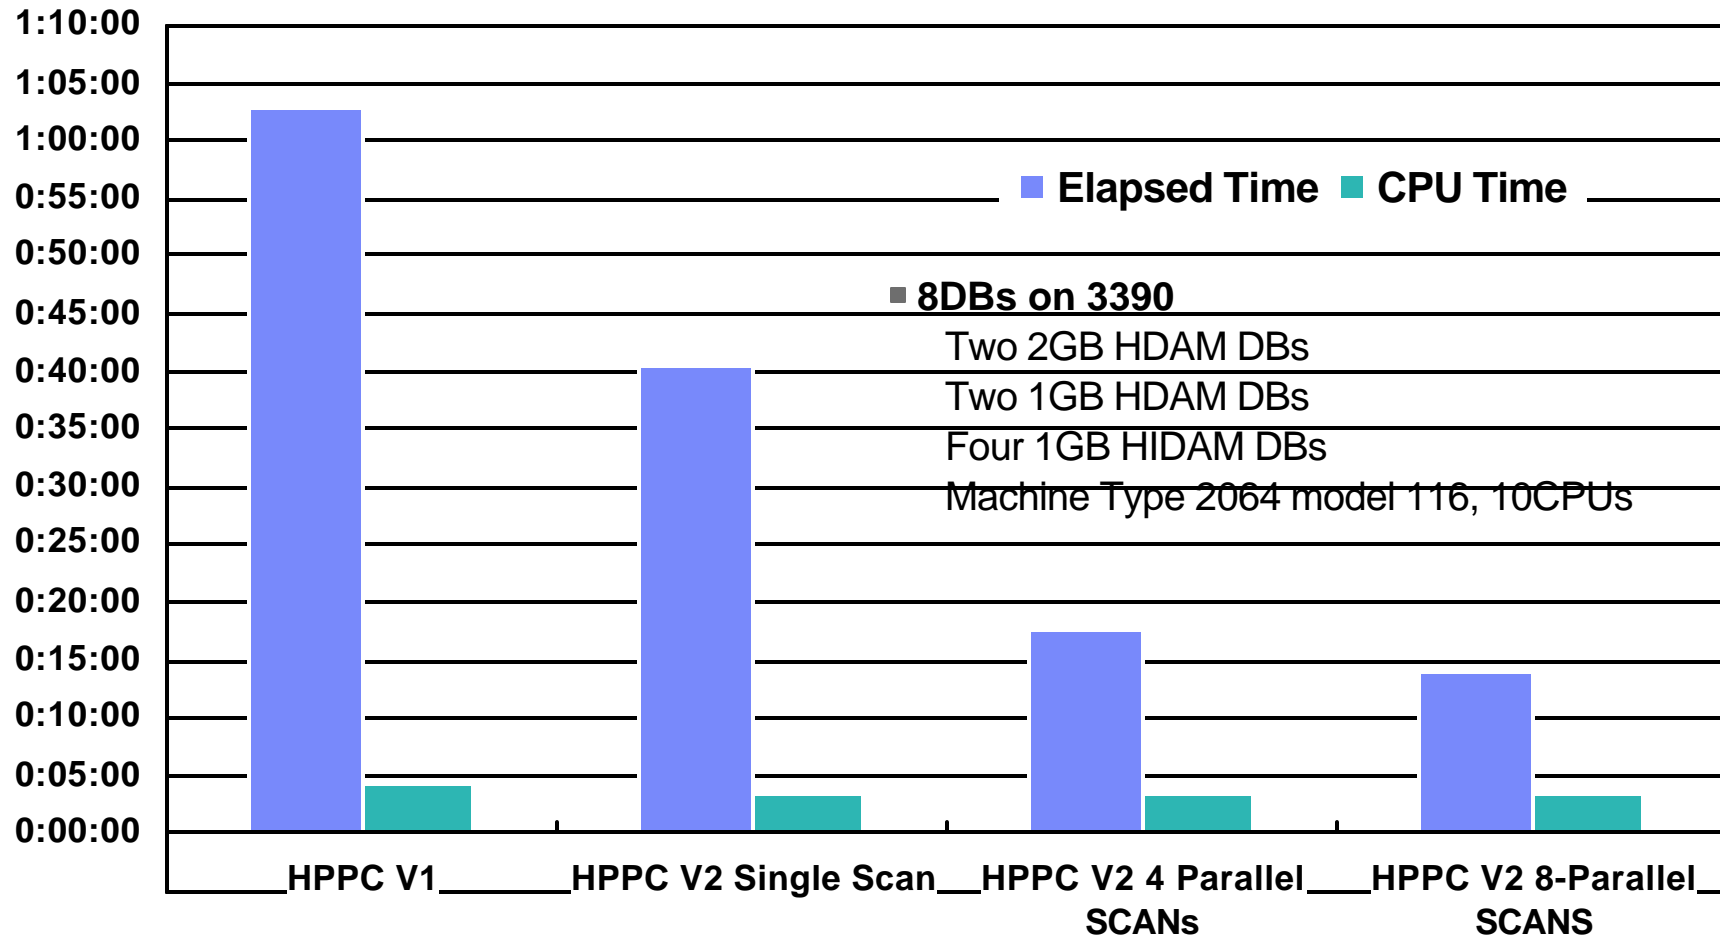

- **Report only option**

- ▶ **New option PTRCHK=NO is introduced. The option avoids pointer checking and generates only statistics reports.**

# Reporting Improved

- New Reports
  - ▶ DBD Source and DBD Map by new options, DECODEDBD and MAPDBD
  - ▶ These functions are provided in conjunction with IMS Library Integrity Utilities for z/OS Version 1 Release 1 (5655-I42)

# Performance Evaluation

The total elapsed time is reduced to 22% of Version 1 by parallel scanning.

The size of work data sets is a third less than Version 1.

*Note: This material has not been submitted to any formal IBM test and is published AS IS.*

*Since this test result is an example, this may not always be the case.*
