F01   IMS Tools Talk
Dan Wardman, Director, Data Management Tools

This presentation covers the strategy and direction of IBM IMS Tools and highlights all the new announcements and deliveries since last year's IMS Technical Conference. The focus is on how IBM IMS Tools address the concept of autonomic computing. Attend this session to learn about the benefits you can gain from using the IMS Tools in their on-demand environments. Included in this session, Dan will spotlight to one of the newest members of the IMS Tools family with an overview and demo — be one of the first to see this new tool.
