

Currency Technics & Metrics

Money Manager System

Business Challenge

Cash Management and Operations

- Standardize your product presentation across your enterprise
- Enable you to provide cash services to National Customers where you don't have coverage
- Maximize fee capturing
- Measure current state enterprise metrics
- Increase operational throughput without increasing overhead
- Measure teller and account productivity
- Configure a system that best suits your corporate environment
- Maximize processing efficiency and resource utilization
- Provide optimal business-continuation coverage

Solution Description

Money Manager System allows you to have common software and operational functionality across your entire enterprise. You can centralize file maintenance by configuring Money Manager System in the host and using remote or data bank configurations. User and customer profiles are updated from a single point, and distributed network-wide in near real time. This saves data entry time, provides for a controlled environment for the management of the system data and guarantees uniformity, so you avoid unplanned reconciliation exercises, a solid audit environment and redundancy for the ultimate level of disaster recovery capability.

Value Proposition

Money Manager System provides for an event-driven deposit-processing environment, which lets every account have its own unique parameters. When you identify the account, the system only presents those screens that are necessary for processing that specific account, and the capturing activities allowing you to maximize your fee capture. Money Manger System is available with Automated Deposit Processing (A.D.P.) as a part of the Deposit Processing module. The A.D.P utilizes techniques common in Item Processing operations to maximize processing efficiency and resource utilization. With the CTM Third Party Module you can utilize third-party outsourcing services in any geographic region to expand your enterprises services so that you can provide seamless production and service offerings to national customers.

Company Description

CTM specializes in developing enterprise-class solutions for financial services, gaming companies and retailers. Combining in-depth knowledge of the financial services industry and technical capabilities, CTM continues to provide quality products and consulting services to simplify currency management.
