Fidelity National Information Services, Inc. (FIS)
BancLine

IBM

Business Challenge

Personalized service. Competitive choices. Maximum convenience. Your core processing technology must enable you to respond to your customers' changing needs while equipping you with the capabilities to exceed your strategic business goals.

Solution Description

BancLine's central information file is a relational database forming the heart of the system. This enter-it-once system has a variable-length field structure that creates the basis for data warehousing. Multiple query features simplify relationship lookup and selection.

- BancLine's fully integrated deposit system provides processing, with maximum design flexibility, for all types of transaction accounts, savings, certificates of deposit and individual retirement accounts.

- TellerPlus, a Microsoft® Windows®-based, customizable, full-featured, online teller system, integrates the basic concepts of traditional transaction processing with the power of client/server architecture.

- Loan processing is a single, consolidated process, with multi-event tracking and integrated with the general ledger.

Value Proposition

FIS delivers the industry's most advanced core-processing systems, giving your community bank unprecedented flexibility, scalability and reliability through a single source. Knowing that community banks have diverse business objectives, we have tailored our systems accordingly. Each of our core solutions contains function designed to successfully serve the specific needs of your bank as well as your customers.

Company Description

FIS is a leading provider of financial core processing; card issuer/transaction processing services; mortgage loan processing and mortgage information products; and outsourcing services to financial institutions, retailers, mortgage lenders and real estate professionals. FIS serves financial institutions and retailers in more than 60 countries and has processing and technology relationships with 35 of the top 50 global banks, including nine of the top 10.
