Galaxy Hotel Systems
Galaxy LightSpeed

IBM

Business Challenge

Galaxy Hotel Systems is strongly committed to the goal of providing superior products and services to all of our customers and to continue providing a total solution consisting of hardware, software, services and support based on 35 years in the hospitality industry.

Solution Description

Galaxy LightSpeed is our newest solution that is browser-based, intuitive and easy-to-use. It provides the advanced functionality required for solving today's most challenging property requirements. Galaxy LightSpeed is built on the industry's most stable platform and continues to take advantage of Galaxy UX's ability to operate multiple properties on one server referred to as "complexing". This multi-property capability provides the experience and knowledge to operate your properties in an ASP-like environment. Feature-rich, flexible and highly scalable, these solutions are backed by the solid reliability of HP or Intel® based hardware utilizing the IBM Informix Database for maximized data processing.

Value Proposition

Galaxy's long history within the hospitality industry has solidified its position as a provider capable of delivering solutions that mix a rich blend of technological innovation with common sense functionality that the industry requires. Attuned to industry demands for systems that maximize capital investments and reduce operating costs, Galaxy remains focused on developing advanced applications that are uniquely designed to adapt to the ever changing business needs of independent, chain and resort hotel properties.

The power of Linux® now provides LightSpeed installations with a choice of operating systems, providing server platform flexibility for operations from 25 to 5,000 guest rooms. New choices in hardware allow a lower cost of entry for budget conscious customers.

Company Description

Galaxy Hotel Systems has established itself as one of the dominant providers of technologically advanced Property Management Systems for the global hospitality industry. Providing exceptional hotel software solutions and services to the industry for over 35 years, Galaxy has harnessed the intellectual capital of its diverse install base to effectively deliver feature-rich applications that bolster revenues, increase productivity and enhance guest satisfaction.
