Visual HealthNet/WEB

Business Challenge

In today's fast changing Public Health sector, technology is needed by agencies to drive efficiencies, responsiveness, and greater productivity. This sector needs new technology that is built from the ground up for Public Health that brings with it opportunities in communications and a better means to gather, analyze, and use data, to carry out surveillance and investigation, policy and program development, and program implementation to provide the local citizens with the best Public Healthcare System.

Solution Description

Visual HealthNet is a solution designed from the ground up for Public Health. Visual HealthNet is a totally integrated system where all the pieces – whether they concern the clinical, financial, or business management of an organization – are tied together in a logical and meaningful way. Visual HealthNet is a national standards based system using codes such as NDC, CPT-4, ANSI X12, ICD-9, ADA, Immunization Algorithms, HL7, with the ability to make required local changes. Visual HealthNet has a broad feature set and a flexible operational parameters, allowing it to easily adapt to different and changing, environments.

Value Proposition

Visual HealthNet is a total solution for Public Health in one package that allows for cooperation and information-sharing across the entire organizational spectrum. Manual data collection and reporting will be significantly reduced resulting in less error and increased time for direct service. Clinician and Nursing productivity will be increased through automated procedures; real-time access and decision-making tools will provide the employees with the data they need to effectively manage the organization. Billing, collections, staff productivity, organizational, state, and federal reporting all will improve because of the integrated design of the Visual HealthNet Product. Visual HealthNet will be a resource used by both management and staff. Visual HealthNet supports all parts of the organization—administrative, clerical, financial, clinical, executive management, state and federal requirements.
