

# A Business Partner Solution for the Public Sector

A Financial, Human Resources, Public Services & Community Development Information Management Software Solution

## SunGard PLUS SERIES

### Business Challenge

There are many challenges facing local government administrators: limited resources, decreasing budgets and increasing expectations for services. Elected officials and constituents constantly put pressure on the local government's staff to provide more with less. These pressures increase the need to implement automated solutions to enhance day-to-day workflow processes and the accuracy of the data that government administrators rely upon.

### Solution Description

The PLUS SERIES is an enterprise-wide financial, human resources, public services and community-development management system for municipal and local governments. It is a single system that offers all government stakeholders — department directors, staff, elected officials and constituents — the ability to easily manage or immediately access the summary and detail information they need, when they need it. Most importantly, it is intuitive to use and simple to deploy, making it a very cost-effective information solution for local governments.

### Value Proposition

The PLUS SERIES meets the demands for functional requirements, ease of use and advanced technology. It is an integrated, local-government-specific solution, which provides superior day-to-day administrative features, information tracking capabilities and crucial reporting functions. The products are based on leading technologies, advanced programming languages and Web technologies providing portability across many hardware and operating environments. Multiple deployment options include the Internet, an intranet or a traditional network.

In addition, SunGard's local government expertise and extensive support resources ensure a successful implementation.

### Company Description

SunGard is one of the leaders in the field of information systems for the local government marketplace. Since our first government installation in 1972, the growth and progress of SunGard's government systems over the years have resulted from the development of several generations of quality products for the local government market. The software is currently serving hundreds of local government organizations throughout the United States.

#### IBM Segment

- Data Management
- Informix

#### Business Function

- Local and Municipal Government Administration

#### Target Industry

- Government
