ShopFAX Asset Management Software

Business Challenge

Asset management is challenging. Getting an appropriate return on investment for a major capital asset is trying enough. Add the need for reliability to ensure quality service and the managing of the operation cost, and you have a very difficult environment.

Solution Description

Asset management solutions from ShopFAX can help you create a paperless shop, where you can gather your data using portable hand held scanners and create work orders on the fly by scanning the bar code of an asset. No more paper forms needed for work orders, inventory, purchase orders, warranty claims, and the like.

No keying, no writing and no more guessing. Real-time, accurate data. See your operation as it really is, for the first time ever, using workflow, graphs, charts, data drill down. Make smarter buying decisions, operate equipment more safely.

Value Proposition

ShopFAX is a software solution that provides companies the opportunity to analyze data regarding maintenance parameters and make strategic decisions based on that information. Pocket PC's are used for accurate data entry, making analysis timely and valuable. Customers are able to streamline maintenance and run their maintenance departments efficiently; with lowered cost being the ultimate benefit.

Company Description

World Information Systems, Inc., located in downtown Greensboro, North Carolina, was founded in 1993 with the purchase of J.P. Systems, Inc., a company that had been developing asset maintenance software since 1986. World Information Systems, Inc. boasts over 21 years of experience in producing quality fleet-maintenance software to a variety of clients.

Our ShopFAX software is the most technically advanced information system for asset maintenance and management anywhere.
