

Siemens PLM Software

Teamcenter

Solution Description

Companies face ever-increasing competitive pressures from the evolving business environment to manage and reduce costs at all levels of the organization. Manufacturers are turning to product lifecycle management (PLM) solutions to launch new and innovative products, shorten change cycles and customize products for niche markets.

With its unified architecture and robust set of applications, the Teamcenter solution allows companies to implement end-to-end PLM. The solution delivers a broad and deep portfolio of seamlessly integrated modules to improve efficiency at each stage of a product's lifecycle. It was developed to streamline new product development, improve value chain synchronization, manage enterprise data and regulatory compliance, and improve product engineering systems efficiencies.

Features & Benefits

- Maintain a single source of design data that will result in reduced errors and rework to produce accurate bills of materials and streamline everyday design management tasks and processes
- Reduce errors through more effective collaboration and the elimination of mistake-prone manual handoffs with manufacturing
- Manage software assets as part of the single view of the product structure
- Easy-to-configure service oriented architecture (SOA) reduces the high cost of implementation

Value Proposition

The Teamcenter solution powers innovation and productivity by connecting people and processes with a single source of product and process knowledge. Teamcenter's comprehensive portfolio of proven digital lifecycle management solutions is built on an open PLM foundation to power end-to-end PLM. As a proven PLM solution with unmatched scalability built on open technology, Teamcenter improves productivity by providing a greater return on a company's IT investment.

Company Description

Siemens PLM Software, a business unit of the Siemens Industry Automation Division, is a leading global provider of product lifecycle management (PLM) software and services with nearly six million licensed seats and 56,000 customers worldwide. Headquartered in Plano, Texas, Siemens PLM Software works collaboratively with companies to deliver open solutions that help them turn more ideas into successful products.

IBM Segment

- Data Management
- Informix

Business Function

- Product Lifecycle Management

Target Industry

- Aerospace and Defense
- Chemical and Petroleum
- Industrial Products
