

A Business Solution for Cross Industry

Index/Update Documents Remotely Across Multiple Repositories

HCL Technologies Ltd.

iSimplify Remote Indexing

Solution Description

iSimplify Remote Indexing (IRI) is a suite of tools that are based on an open architecture and are integrated with the IBM Enterprise Content Management (ECM) suite of products.

Features & Benefits

Features

- Single interface to IBM ECM repositories
- Split, merge, index and compare documents remotely
- Integration with remote scanning, fax, email and file system capture

Benefits

- Enhances productivity by highlighting specific sections of document
- Helps in reducing costs by permitting off-site scan and index at lower cost locations
- Utilizes existing hardware investments to help streamline remote business processes
- Utilizes intelligent capture for centralized processing

Value Proposition

IRI has been developed to cater to the need for remote document processing from multiple IBM ECM repositories. IRI supports web-based indexing, splitting, merging and cropping of electronic content from IBM repositories and provides the unique ability to have a single web-based interface to the IBM repository. The seamless integration of IRI with existing business processes means various geographies can share document metadata through an easy to use and feature rich viewer, thereby increasing communication efficiency and reducing errors/rework.

Company Description

HCL is a \$5 billion leading global Technology enterprise that comprises over 62,000 professionals of diverse nationalities.
