

HCL Technologies Ltd.

iSimplify Search

Solution Description

HCL's iSimplify Search is a full function, software tool that can be used for any type of content/metadata search with trusted quality. It is changing the way users search and explore data across multiple data repositories by its ability to meet the unique needs of each individual. The tool provides a complete, unified view of the critical information located across the organization's knowledge base and finds the required documents regardless of location. This enables robust and quick searches and supports searching content from multiple IBM repositories including: IBM FileNet Content Services, Image Services, IBM FileNet P8, IBM Lotus Notes, IBM Content Manager, etc.

Features & Benefits

Features:

- Metadata and Content Based search across multiple IBM repositories through a single user interface
- Search Templates available through a web interface
- SOA based framework
- Download, view and add documents across multiple IBM repositories
- Out-of-the-Box Reports are provided and audit trails are maintained

Benefits:

- Increased business agility
- No loss of time and increased ability to search
- Easy maintenance (low infrastructure and skills requirement)
- Increased customer and employee satisfaction
- Improves business decisions through the availability of relevant information

Value Proposition

The iSimplify Search simplifies the management of critical information by providing a unified view and single interfaced based access to content from any IBM repository. It helps to reduce the hidden costs of information retrieval by reducing the scenario of missing information. The tool is very easy to maintain because of low infrastructure and skills requirements that enhances employee satisfaction levels.

This tool has been designed to efficiently search content/metadata across IBM repositories and focused attention has been given to attaining high performance levels and the ability to carry out search activities on live data without effecting daily business operations.

This tool provides a fast, easy and accurate way to mitigate the incurrence of high costs relative to not being able to find information or finding it too late; including: faulty decision making, duplication of efforts, lost productivity and missed opportunities.

Company Description

HCL is a \$5 billion leading global Technology enterprise that comprises over 62,000 professionals of diverse nationalities. HCL leverages its extensive global offshore infrastructure and network of offices in 26 countries to provide holistic, multi-service delivery in key industry verticals including: Financial Services, Manufacturing, Consumer Services, Public Services and Healthcare.

IBM Segment

- Enterprise Content Manager

Business Function

- Content Authoring, Viewing, Editing
- Content Federation

Target Industry

- Cross Industry
