

# A Business Partner Solution for the Cross Industry Sector

*Remove Sensitive Content and Privacy Information*

---

## Informative Graphics Corporation

*Redact-It®*

---

### Technology Description

Redact-It® from Informative Graphics Corporation (IGC) is a secure way to easily remove privacy and sensitive information from documents. Users can redact individual documents on-demand in an automated workflow process or redact an entire folder hierarchy as a batch process. The Redact-It family consists of:

- Redact-It Desktop – a simple desktop tool.
- Redact-It for Kofax Capture – a zone-based tool providing a redacted and non-redacted version of the document image.
- Redact-It for IBM FileNet Capture – a zone-based tool with enhanced index search, providing a redacted and non-redacted version of the document image.
- Redact-It Enterprise – a server-class solution capable of supporting complex expressions to redact files or hierarchies as a batch process via web services.

All four solutions help users securely remove sensitive content or privacy information, along with any hidden text and metadata. Users can redact virtually any format, including office documents, PDF and TIFF. Redact-It also works with images or OCR text.

Redact-It users can search for and redact by word/phrase, phrase list, text pattern, or zone. The redacted version is saved as PDF, TIFF or Content Sealed Format (CSF), leaving the source file untouched. Redact-It releases both redacted and un-redacted versions of the file to the specified location in the release script: repository, website, network location or workflow process.

### Features & Benefits

- Redact-It supports virtually any format, including Microsoft Word, PDF, TIFF and even CAD formats.
- Use Redact-It's built-in pattern recognition to automatically redact all instances of a phrase, name, social security number, phone number, account number, monetary amount and more.

### IBM Segment

- Enterprise Content Management

### Business Function

- Content Authoring, Viewing, Editing

### Target Industry

- Cross Industry

- Redact-It completely removes redacted content from the output file so your enterprise can confidently move documents through the workflow process knowing that no hidden text, document properties or other metadata is transferred to the redacted file.
- Enterprise version allows users to publish to IGC's proprietary Content Sealed Format for added security options such as password protection, file expiration date, watermark or print banners, and usage restrictions for print, copy, markup/annotate, views.
- Helping to meet compliance needs, Redact-It lets users assign reason codes to identify different redaction reasons, and provides comprehensive audit logs which include extracted text file, redaction mapping, thumbnails and redaction summary.

## Value Proposition

Whether your redaction needs are ad-hoc low volume redaction, redaction at capture, back file redaction, or workflow-enabled web services, the Redact-It solution is the answer. IGC boasts high-quality, modern software and has extensive experience supporting OEMs, integrators, and technical end users, making the Redact-It suite the perfect toolset for demanding IT shops and integrators. With consistent behavior of redaction tools across all use models including text search macros, zone files, and multi-format viewer for review stations, IGC has implemented the most flexible and comprehensive redaction tool available today.
