Lexmark International

Distributed Capture Solution for IBM FileNet P8

Technology Description

Incorporating Lexmark multifunction printers (MFP) and Lexmark Document Distributor (LDD) software with IBM FileNet Capture Professional creates a workflow solution that is faster, more secure and closer to the original knowledge worker than traditional scanning methods. Authorized workers can easily scan and index time-sensitive hardcopy documents to quickly deliver critical business information to your IBM FileNet P8 system.

Features & Benefits

- Lexmark's capture solution for FileNet P8 is a lower cost solution than traditional document imaging solutions that require specialized equipment and are non-intuitive. With the Lexmark solution, the user-friendly e-Task simplicity of a Lexmark MFP is integrated with the robust functionality of LDD and FileNet Capture Professional.
- LDD boosts productivity by minimizing the need for end-user training and reducing the amount of time end users spend on repetitive tasks, as it combines multi-step scanning processes in single workflows.
- Lexmark's MFP easy to use intuitive e-Task touchscreen optimizes your company's FileNet P8 system with reliable hardcopy document capture hardware to scan, index and release paper documents into your system.
- Lexmark's family of network multifunction printers have integrated print, scan, copy and fax capabilities to merge paper and digital workflow for easy and efficient capture, indexing and secure access to your company's critical information.

Value Proposition

Traditional Enterprise Content Management capture methods can have high costs per cycle and waste valuable time and employee effort. The document capture and distribution capabilities of Lexmark MFP's and LDD software works with FileNet's Capture Professional and makes converting hardcopy to digital format fast, simple and cost-effective. Solution benefits include:

- Reduced cycle times.
- Increased workflow efficiency.
- Higher customer satisfaction.
- Faster time to market.
- Optimized FileNet ROI.
