

A Business Partner Solution for the Cross Industry Sector

Accelerate IBM FileNet P8 Secured Access

REACTIS

SSO Ready

Technology Description

SSO Ready facilitates rapid access to the IBM FileNet P8 system by avoiding the manual opening of a session (login and password) when accessing the FileNet P8 thin client. Instead, SSO Ready uses Windows authentication of the user and gives direct access to FileNet P8 applications without the need to re-authenticate. SSO Ready for IBM FileNet P8 is based on Sign&Go technology from security and identity management company Ilex. Their Agent Sign&Go AD (Active Directory) technology is installed on the Microsoft Active Directory and Reactis' SSO Ready Virtual Machine captures the access request and manages the automatic authentication of users.

Features & Benefits

- No need for double authentication.
- Decreases administration operation.
- Components are packaged and integrated quickly.
- No change to FileNet P8 applications regardless of the application server.
- Access to application through "home" URL.
- Reduces cost of implementation.
- Extends SSO Ready functionality to other enterprise applications.

Value Proposition

SSO Ready allows you to implement an SSO (single sign on) solution with IBM FileNet P8 in a simple and low-cost manner because the components are ready to use. SSO Ready does not require modification and settings of the FileNet P8 system regardless of the application server used. Building a custom SSO solution can take more than 300 working days – but customers can implement the SSO Ready solution immediately.

Company Description

REACTIS, established in 2001, is an IT services company based in France. Our values are *Excellence* (by keeping commitments in advance), *Service Quality*, *Closeness* to our clients and to our staff and *Improvement* together by sharing experiences, skills, and knowledge.
