

A Business Partner Solution for the Cross Industry Sector

Provides Advanced Migration Options

SYSCOM, Inc.

IP2CM Migration Utility

Technology Description

The SYSCOM IP2CM Migration Utility is used to migrate IBM DB2 ImagePlus for z/OS to IBM Content Manager Enterprise Edition v.8, it is a set of programs and batch jobs that run on z/OS. The jobs are configured to unload ImagePlus data and prepare the data for a load into IBM Content Manager. The prepared data may also be cross-loaded into a non-z/OS IBM Content Manager system and a job generation tool is also included. Image objects in ImagePlus do not move; the objects remain in z/OS managed storage to be accessed by the IBM Content Manager Resource Manager for z/OS.

Features & Benefits

- Customizable for use with non-standard ImagePlus front-end applications.
- IP2CM can be customized to edit the migrated data before storing into IBM Content Manager to correct any errors that might exist.
- Folders can be reorganized based on customizable criteria (ex. a primary folder can become a child of an existing or new folder).
- Documents can be consolidated into other folders or duplicated in other folders.
- Additional attributes can be added to the existing attributes before storing into IBM Content Manager.
- Batch jobs can be fully re-restorted from any point.
- High volume roll-back capability without restoring the database.

Value Proposition

Migrate from ImagePlus to IBM Content Manager without the need to access any images - images stay where they are in z/OS managed storage. SYSCOM's IP2CM Migration Utility provides the ability to migrate the extremely high volumes of data generally found in ImagePlus Systems in a precise and consistent manner. Metadata from ImagePlus can be cleansed as it is processed, if necessary, using customer-supplied exit programs. New metadata can also be married to the existing metadata prior to the load into IBM Content Manager thus enhancing the new system. The IP2CM Utility is highly customizable allowing for complete flexibility of the migration effort.

IBM Segment

- Enterprise Content Management

Business Function

- Migration

Target Industry

- Cross Industry
