

# A Business Partner Solution for the Cross Industry Sector

*Reduce Costs while Increasing Efficiency and Accountability*

---

## Xenos – an Actuate company

*Enterprise Report Management (ERM) Consolidation*

---

### Technology Description

The Xenos Enterprise Report Management (ERM) Consolidation through Document Archive Migration offering is comprised of Xenos' proven DETAIL™ methodology and services expertise, proprietary Xenos Migration Components™ and Xenos d2e™ transforms. In the discovery and analysis phase, Xenos engages with the customer to review the existing systems and associated business requirements. Xenos delivers a detailed migration assessment document outlining the characteristics of the source system, proposed migration methodology, estimated effort, timelines and cost. This configurable solution is tailored to the requirements of each migration resulting in an automated process flow executing the following functions:

- Analysis of archived document or image files.
- Recall of offline document or image files.
- Download and association of archived document or image files, index information and print stream resources to a distributed processing environment.
- Transformation from archive formats to original print stream formats.
- Extraction of index information and document repurposing.
- Audit trail, alerts and notifications.
- Packaging of migrated content into IBM Content Manager OnDemand (CMOD) using ARSLOAD, into IBM FileNet P8 Content Manager using the Xenos Loader™ and into IBM FileNet Image Services using the IBM FileNet High Performance Image Import (HPII) Interface.

### Features & Benefits

- Xenos has years of proven experience helping organizations consolidate documents and images from most of the major ERM/ECM archive systems to help streamline operations, reduce costs, improve information access and simplify compliance.
- Proprietary Xenos technology and proven DETAIL™ methodology.
- Dramatically reduces storage costs using Xenos for single-instance resource bundling for AFP, PDF and Metacode print stream formats.

### IBM Segment

- Enterprise Content Management

### Business Function

- Import/Export

### Target Industry

- Cross Industry

- Eliminates recurring annual maintenance costs for redundant ERM/ECM systems.
- Reduces mainframe hardware and processing costs if mainframe modernization is required and solution is implemented on a distributed platform.

## Value Proposition

Many organizations are looking to consolidate documents and images on IBM ERM/ECM products to help streamline operations, reduce costs, improve information access and simplify compliance. These organizations face the following challenges:

- How to reduce costs by migrating high volumes of archived documents, images and metadata from disparate systems.
- Lack of proven methodology and expertise.
- Meeting regulatory requirements e.g. for PDF/A.

The Xenos ERM consolidation solution allows organizations to efficiently migrate document and image archives to the IBM ECM suite of products. With 25 years experience and 170 of our 350 worldwide customers among the Fortune 1000, Xenos is the leading provider of high-performance print stream document transformation and repurposing software solutions. Xenos enables organizations in a wide range of industries to rapidly achieve three strategic objectives: efficiency, agility and accountability.

## Company Description

Xenos provides high-performance solutions that optimize enterprise content management (ECM) implementations by streamlining the movement of information across the enterprise and slashing document storage costs. Xenos solutions, based on the scalable Xenos Enterprise Server™, process, extract, transform, repurpose and personalize high volumes of data and documents for storage, real-time access, ePresentment, printing and delivery in numerous formats across multiple channels. Effective Feb. 1, 2010, Xenos became an Actuate company.
