Highlights

- ***Install and configure products from the IBM WebSphere Information Integrator family***
- ***Accelerate your integration of diverse, distributed and real-time data***
- ***Leverage IBM experts to enhance the information integration skills of your team***

Unlock the value of enterprise data

Organizations face an information challenge. Where is it? How do I get it when I need it in the form I need? What does it mean? What insight can I gain from it? Can I trust it? How do I control it? The list goes on, and the challenges grow unceasingly if organizations cannot ensure they have access to authoritative, consistent, timely and complete information.

Services from IBM Information Integration Solutions complement the IBM WebSphere® Information Integration platform, which integrates and transforms any data and content to deliver information you can trust for your critical business initiatives. Designed to ensure customer success with IBM solutions, IBM information integration services range from technical support to education to professional services.

IBM WebSphere Information Integrator integrates data and content on demand. It provides a foundation for your on demand business, enabling your company to have integrated, real-time access to

diverse and distributed information. As a result, your organization can increase efficiencies, better serve customers and suppliers, make better decisions and respond more quickly to new opportunities or threats.

Fast Start Services

These services will help your organization get off to a quick start with your newly acquired WebSphere Information Integrator software by providing assistance with the installation and configuration process.

Consultants from IBM Information Management Software Services can assist you with the installation and configuration of the WebSphere Information Integrator family of products. Working jointly with your staff, the consultants can provide technical assistance and knowledge transfer for the administration and operational procedures required to support the WebSphere Information Integrator family of products in your unique environment. The IBM consulting team will also assist with implementing the design generated during the design and planning engagement.

The IBM consulting team will:

- *Review the service contract, prerequisite activities and scheduling*
- *Create and review an implementation task list with your team, including identification of federation, replication, event publishing or search data sources*
- *Assist with the installation of the WebSphere Information Integrator products and any prerequisite software such as IBM WebSphere MQ in replication and event publishing environments*
- *Configure data federation, replication, event publishing or search functions*

The IBM consulting team will deliver biweekly status reports and a final report detailing the installation process for your specific environment, configuration modifications made to the default settings and specific operational information required to administer your unique federation, replication, event publishing or search system.

Supported products

- *IBM WebSphere Information Integrator*
- *IBM WebSphere Information Integrator OmniFind™ Edition*
- *IBM WebSphere Information Integrator Content Edition*
- *IBM WebSphere Information Integrator Classic Federation for z/OS®*
- *IBM WebSphere Information Integrator Replication for z/OS*
- *IBM WebSphere Information Integrator Event Publisher for z/OS*

IBM WebSphere Information Integration Professional Services

To help you achieve success in meeting your business objectives through enterprise information integration solutions, and to accelerate your solution design and implementation, the IBM Information Management Software Services team offers a broad range of planning, education, design and engineering, and implementation services. Whatever industry your company serves, our Professional Services team can help you implement the right IBM WebSphere information integration solution.
