

Mentored Pilot

Highlights

- ***Take the IBM WebSphere Information Integration portfolio for a test drive before you buy***
- ***Proceed immediately with your project as a “no risk mentored pilot phase” with delivery milestones that establish proof points as you go***
- ***Your staff learns by doing as part of the IBM implementation team***

Unlock the value of enterprise data

Organizations face an information challenge. Where is it? How do I get it when I need it in the form I need? What does it mean? What insight can I gain from it? Can I trust it? How do I control it? The list goes on, and the challenges grow unceasingly if organizations cannot ensure they have access to authoritative, consistent, timely and complete information.

Services from IBM Information Integration Solutions complement the IBM WebSphere® Information Integration platform, which integrates and transforms any data and content to deliver information you can trust for your critical business initiatives. Designed to ensure customer success with IBM solutions, IBM information integration services range from technical support to education to professional services.

Accelerate your projects

Often times the procurement (RFI/RFP) and the decision making process around selecting vendors and tools can add months or even years to a project and delay the critical benefits to your business.

Upon successful completion of the Pilot and proof points, your vendor selection of IBM is made, and you are launched in an accelerated start. In the unlikely event that IBM does not meet your proof points, then the project may be canceled by you with no payment due. There is no risk to you the customer.

IBM WebSphere Information Integration Mentored Pilots have a long track record of success and demonstrate the confidence, value, and leading market position IBM brings to the table. As a customer it allows you to proceed rapidly in a no-risk procurement with the leading solutions provider in the information integration market place. It also provides you a way to accelerate your procurements and your projects.

IBM WebSphere Information Integration Mentored Pilots are typically a six-to-eight week on site engagement that provides you with:

- *Requirements Definition, Scoping, and Planning*
- *Architecture and Pilot Design*
- *Source System Analysis, Data Acquisition*

- *Data Analysis, and Data Modeling*
- *Job & Process Construction and Test*
- *Production Automation, and Results Reporting*
- *Full Volume Runs*
- *Hardware, Software and Job Performance Tuning*
- *Final Runs and Acceptance Testing*
- *Statistics Gathering and Reporting Deliverables:*
- *Pilot Final Report*
- *Project Plan and Proposal for Balance of Project*
- *Customer Briefing*
- *Iterations® Methodology*

The IBM WebSphere Information Integration Business Assessment is a rapid turn-around engagement that enables you to rapidly evaluate your organization's business processes and your readiness to proceed with your project initiative.

Integrate all your information

The IBM WebSphere Information Integration platform reduces risks and costs and supports key business initiatives by integrating and transforming all types of corporate data and content to deliver authoritative, consistent, timely and complete information, and governing its quality throughout its life cycle.

IBM WebSphere Information Integration Professional Services

To help you achieve success in meeting your business objectives through information integration solutions, and to accelerate your solution design and implementation, the IBM WebSphere Information Integration Professional Services team offers a broad range of planning, education, design and engineering, and implementation services. Whatever industry your company serves, our Professional Services team can help you implement the right IBM WebSphere information integration solution.
