Information Management Software Services
Grid Computing Discovery, Architecture and Planning Services Offering

---

HIGHLIGHTS

- *Determine requirements and standards*

- *Determine Grid deployment readiness*

- *Gain hardware and software recommendations*

- *Leverage IBM Grid computing standard practices and methodologies*

Grid Computing Discovery and Architecture

The Grid computing discovery and architecture workshop provides the planning and readiness efforts required to support clients' deployment of the Information Integration Solutions parallel framework on Grid computing platforms. This workshop prepares the foundation on which a Grid deployment will be executed by assessing clients' objectives, existing infrastructure and overall level of readiness.

Research and Discovery

IBM analyzes clients' requirements and goals, existing standards and infrastructure, administrative and developer skill sets. Additionally, a technical needs analysis is performed that investigates the number of nodes involved and their potential optimal configuration. Based on the results of the analysis IBM presents an overview of the Grid Enablement toolkit, as it specifically relates to clients':

• *Architecture*

• *Hardware and software requirements, including operating system and Grid resource manager requirements*
• *Administrative and support considerations*

Information Management Software Services

IBM offers a broad set of services offerings designed to maximize success with the InfoSphere product suite through standard practices developed across numerous successful deployments. Intended to establish a foundation of product knowledge and guidelines, these strategic workshops and offerings are customized to the customer's existing environments, standards, and methodologies.

IBM's objective is to provide the most cost effective and expedient means of achieving project goals through the utilization of the IBM InfoSphere product suite, repeatable processes, and consistent deliverables. To achieve these goals and ensure the continued success of our initiatives,

Information Management software

IBM leverages standard methodologies, proven consulting expertise and experience refined throughout hundreds of successful client engagements.
