

IBM Information Platform & Solution Services – SAP Data Migration Acceleration

- *Data is on the critical path in every SAP implementation. We make sure the path is clearly paved for a smooth migration*
- *IBM IP&S Services provides the people, process and technology to ensure successful data migration for an SAP implementation*
- *Accelerators to estimate, plan and execute*
- *Benefit from mentored job development and hands-on experience*
- *Integrate IP&S standard practices and methodologies with your existing practices*
- *We bring the expertise to you*
- *We take the worry out of your data migration*

Data Challenges

Loading data into SAP correctly and loading the correct data into SAP will make the difference between a simple and a stressful “Go-Live”. Moving legacy data from multiple source systems to a new SAP environment is difficult. Complexity exists due to significant data volumes, a large number of disparate sources, and the complexity of legacy data structures. Typically, business rules have changed over time and many legacy systems have gone without adequate documentation. This issue results in degrading data quality and increasing data complexity, both of which adversely affect a project's chance of success.

The Winning Approach

IBM Information Platform & Solutions is committed to the success of your project. Our team provides extensive experience in SAP data migration and brings a strategic mentoring approach to each engagement.. We will get your project off to a great start through our SAP Accelerators and then leverage our internally developed SAP

Provisioning Environment to provide repeatable, reusable processes for data harmonization and accelerated loading into SAP.

Reduce the burden on your organization

Whether you are doing an upgrade, instance consolidation, or a new SAP deployment, we have the people, processes and technology to seamlessly migrate your data. We provide the value of migrating your data so that you can focus the business on what really matters to you – the analysis of the data.

Healthy Companies Run on Healthy Data

Treat your data as one of your most valuable assets and significantly improve the quality of business data in your new application. Partner with IBM IP&S Services to help you create data you can trust.

IBM Information Integration

Solutions

IBM offers a broad set of service offerings designed to maximize success with the IIS product suite through Standard Practices developed across numerous successful deployments. Intended to establish a foundation of product knowledge and guidelines, these strategic workshops are customized to the customer's existing environments, standards, and methodologies.

Within the overall project lifecycle, a comprehensive set of service offerings is available using the entire IIS suite.

IBM's objective is to provide the most cost effective and expedient means of achieving project goals - through the utilization of the IBM WebSphere Data Integration product suite, repeatable processes, and consistent deliverables. To achieve these goals and ensure the continued success of the initiative, IBM employs our standard methodologies, proven consulting expertise and experience refined throughout hundreds of successful client data integration engagements.

For More Information

For more information regarding this or any other service offerings, please visit the IBM Information Integration Solutions website at <http://www-306.ibm.com/software/data/integration>.
