

## Solution Architect Workshops

---

### Highlights

---

- ***Learn about best practices from the industry leader and leverage them within your information integration projects***
- ***Shorten time to benefit with faster development and deployment cycles with reduced risks and errors***
- ***Implement a full life cycle information integration process to maximize the value of a critical corporate asset – integrated information on demand***

### **Unlock the value of enterprise data**

Organizations face an information challenge. Where is it? How do I get it when I need it in the form I need? What does it mean? What insight can I gain from it? Can I trust it? How do I control it? The list goes on, and the challenges grow unceasingly if organizations cannot ensure they have access to authoritative, consistent, timely and complete information.

Services from IBM Information Integration Solutions complement the IBM WebSphere® Information Integration platform, which integrates and transforms any data and content to deliver information you can trust for your critical business initiatives. Designed to ensure customer success with IBM solutions, IBM information integration services range from technical support to education to professional services.

### **Solution Architect Workshops**

The IBM WebSphere Information Integration Solution Architect Workshop is a mentored technical architecture assessment and design session, combined with a facilitated requirements analysis and project planning session. The Solution Architect Workshop incorporates IBM best-practices iterative methodology, performs an on-site technical project analysis, and delivers a complete roadmap and technical architecture for your information integration project.

The workshop is targeted at assisting you with technical architecture and design of your information integration project using the IBM WebSphere Information Integration platform. In addition, it will help you plan and deploy a complete data integration infrastructure to support your individual needs.

The workshop is recommended for strategic, data quality and enterprise engagements. The Solution Architect Workshop gives you these deliverables:

- *Architecture, design, and best practices report*
- *Project plan and recommendation*
- *Iterations best practices*

### **Integrate all your information**

The IBM WebSphere Information Integration platform reduces risks and costs and supports key business initiatives by integrating and transforming all types of corporate data and content to deliver authoritative, consistent, timely and complete information, and governing its quality throughout its life cycle.

Automatically analyzing data, enhancing its quality, and delivering it in an understandable format, at the right time, to the systems and people who need it, this unique solution addresses a broad data spectrum. The IBM WebSphere Information Integration platform integrates complex business transactions coming from customers and partners as well as operational information moving within the enterprise and the analytical data that supports critical business decisions.

With the IBM WebSphere Information Integration platform, you can streamline your operations, improve customer support, expedite business transactions, and make your tactical and strategic decisions on the basis of the best available information.

### **IBM WebSphere Information Integration Professional Services**

To help you achieve success in meeting your business objectives through enterprise information integration solutions, and to accelerate your solution design and implementation, the IBM WebSphere Information Integration Professional Services team offers a broad range of planning, education, design and engineering, and implementation services. Whatever industry your company serves, our Professional Services team can help you implement the right IBM WebSphere information solution.
