BUSINESS ANALYTICS

Business Intelligence, Performance Management, Business Analytics… Many different definitions are available for each and every one of these business terms. Bottom-line however, they all refer to delivering information for decision-making in order for organizations to improve their business outcome.

Business Analytics is about utilizing relevant information available inside and outside of organizations, whether this is structured information coming from ERP-type applications to unstructured information coming from sources such as social networks. Business Analytics is geared towards creating insight for the whole of the organization and comprises:

- Insight on past performance
- Real-time insight
- Planned foresight
- Predictive foresight

Business Analytics combines the capability to monitor, report, analyze, plan and predict in order to achieve improved business outcome.

CREATE INSIGHT & FORESIGHT

| PAST | REAL-TIME | PLANNED FORESIGHT | ↻ | PREDICTIVE FORESIGHT |

monitor > report > analyze > plan > predict

NUMIUS SERVICES

Numius is focused on delivering Business Analytics to its customers to help them optimize their business outcome and become smarter clients. Our highly skilled and motivated team uses best practices, high quality of work and leader technology to engage in a long-term relationship with our clients. We value an interactive partnership with our clients very highly.

Numius offers a full range of Business Analytics services that enable clients to become smarter clients. Our full range of services allows us to develop tailor made service solutions for our clients, depending on their need, context and maturity in dealing with Business Analytics.

Vision & Strategy · Consulting & Implementation · Software · Smarter CLIENT · Academy · Platform Services · Solutions · Service Desk & Support

The true power for our clients comes from combining several of our service offerings in a tailor made solution.

- We can run your projects, educate your users using our Academy services and support your live applications through our Service Desk, delivering an **End-to-End Project Service**.
- We can deliver **Managed Platform Services** by combining our Software, Platform Services and Service Desk capabilities, delivering your Business Analytics Platform in a flexible and cost-effective way.
- We can deliver **Managed Analytical Services** by combining our project expertise on top of our Managed Platform Services. While you make decisions, let us worry about your decision-making platform.
- We can deliver **Managed Analytical Solutions** by combining our and your solutions on top of our Managed Analytical Services.

Vision & Strategy

Starting from your strategy, we help your organization in defining a Business Analytics roadmap that will drive how your organization introduces required solutions in line with your strategy.

Consulting & Implementation

We implement Business Analytics solutions using leader technology. We closely work together with your teams to drive projects from A to Z, ensuring that results are met on-time and within budget. We rely on approved engineering and project methodologies.

Academy

We deliver education and coaching on-site and through our public calendar. Based on standard in-house developed training materials, we can customize according to your needs and existing solutions, ensuring a real-life experience to trainees. All our materials are based on our vast implementation experience, are very pragmatic and focus on what's important so that trainees are kick-started and advanced into their Business Analytics environment.

Solutions

We deliver pre-built solutions and Business Analytics templates with business content that allow organizations to be up and running at a much faster pace. The wheel does not have to be reinvented all over again as customers can profit from the experience and knowledge we have gained, implementing cross-sector and cross-function projects.

Service Desk & Support

We deliver Support and have our own Service Desk to accommodate our clients with live Business Analytic applications.

Platform Services

To ensure maximum flexibility and agility in deploying Business Analytics, Numius has its own Platform Services on which clients' solutions are deployed. You only pay what you consume and no longer need to invest in hardware and software.

Software

As IBM Premier Business Partner, Numius has the special credentials and certifications to resell IBM's Business Analytics authorized distribution portfolio.
