# How to add a summary (big numbers)

A dashboard wouldn't be a dashboard without a nice set of summaries ("big numbers") across the top:

To create these summaries (also known as "by-the-numbers), we can use a Summary visualization. This chapter will show you how to do that…
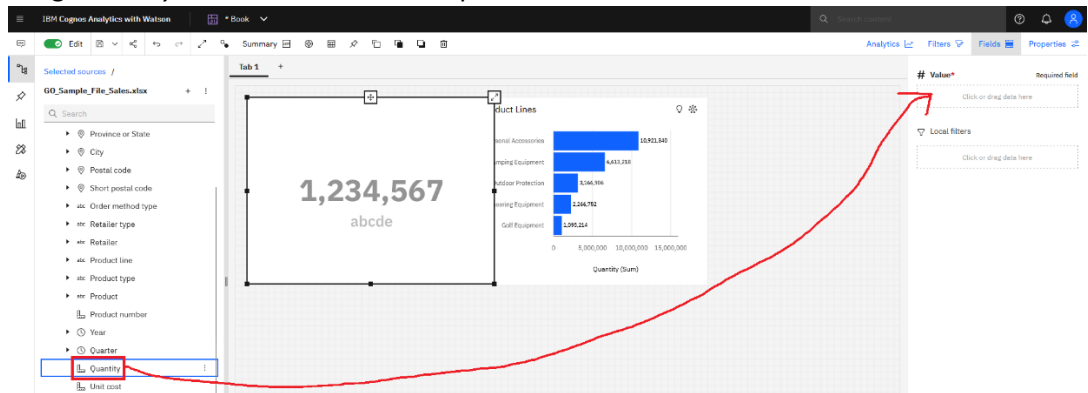

Create summaries

1. Start with the bar chart you recently created (see [How do I change the color of the bars?](#)).

2. Click the *Visualizations* ![icon] panel:

3. Scroll down and drag a *Summary* visualization onto the canvas:

4. Drag *Quantity* from the *Sources* panel onto the *Value* slot of the visualization:

5. Using the handles, resize the Summary visualization and place it so that your dashboard looks like this:

6. To remove the redundant title, select the Summary visualization and open the *Properties* Properties ⚙.

7. Open the *Chart* section ⌄ **Chart**
8. Set the *Title type* to *No title*:

Title type   No title   ⌄
