# A Note about Icons (Images) in Sample Extensions

Many of the sample extensions (e.g. SampleExtensionOpenDashboard_11_2.zip) use hard-coded icons that are light in color (e.g. #f4f4f4):

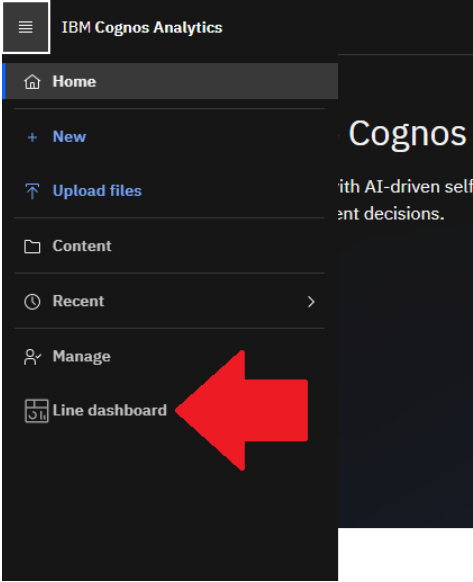

These samples have been optimized for Cognos Analytics' 11.2.0 default theme (IBM Carbon X), which employs the following background colors:
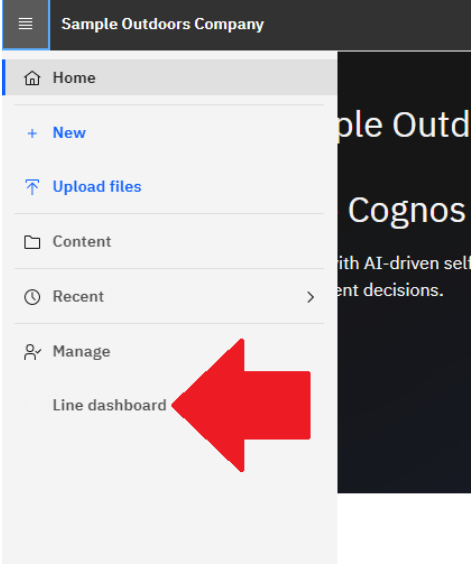

- App Bar: #161616
- Hamburger Menu: #161616

These are only samples, or *examples*. In the sample extensions, the SVG icons that you will find in the images folder are all light (e.g. #f4f4f4). This light color works perfectly with the dark background of Cognos Analytics' default theme:

However, if you have modified the theme for your instance of Cognos Analytics to have a similarly light background, the image may become indiscernible:

To address this issue, you will need to:

- [Download](#) the extension
- Unzip the contents of the extension
- Modify the color of the image(s) in the *images* folder and save the changes
- Zip up all the files/folders
- [Upload](#) the revised extension

For more information, see:

- [Creating extensions](#)
