

BI Version	Reporting Type	Visualization Type	Difficulty Level
Cognos 10.2.2	Active Report	Chart or Visualization	Beginner
Sample data: Go Sales (query) package			
Visualization: az.Bar			

TIP 3: CAN I DELETE A CHART WITHOUT DELETING ITS QUERY?

If you drag a Chart into your report, create a Query for it, and subsequently delete the Chart, Report Studio will also delete the Query. Suppose you wanted to keep the Query and use it for something else? **The answer is to Cut (CTRL + X) the Chart.** Now the Query remains available for use with other objects, and the original Chart is no longer on your report.
