Philadelphia IMS User Group Meeting
May 7, 2015
IBM Corporation
30 S 17th St, Room 1416
Philadelphia, PA
Sponsored by IBM

8:30 – 9:00	**Continental Breakfast and Registration**	**IBM**
9:00 – 9:10	**Welcome and Host Presentation**	Poonam Chitale **IBM Host**
9:15 – 10:15	**IMS Tools** As DBA resources dwindle, IT often lacks adequate time and resources for developing new applications, pursuing new technologies and growing business You'll hear about the new features of the Autonomics Director, which can alleviate database-related outages by giving you the information needed to forecast the future. The latest Administration Console will combine information across your IMSPlex and more – so you can better understand what the issues are and how to resolve them. We will also share use cases of how this can improve your day-to-day work as a DBA.	Richard Phipps **IBM**
10:15 – 10:30	**Break**	
10:30 – 11:45	**Mix it Up: How your enterprise assets fit perfectly with Bluemix** With IBM Bluemix, you can rapidly build, deploy, and manage cloud apps; you have an ecosystem of services and runtime frameworks at your fingertips! What about Enterprise clients? How does Bluemix complement and enrich your mainframe systems of record? Kyle Charlet, z Systems Architect, is ready to give you the good news! Enterprise clients can also reduce time-to-market, explore new workloads, reduce TCO, and much more, by taking advantage of IBM Bluemix coupled with Liberty z/OS Connect. Learn how its capabilities in Java, Node.js, mobile backend development, and robust ecosystem become your competitive advantage!	Kyle Charlet **IBM – IMS Architect**
12:00 – 13:00	**Lunch – Provided by IBM***	
13:00 – 14:00	**Real-Time Analytics from IMS Data Using the DB2 Analytics Accelerator** Do you remember the good old days, when you had to issue long-running decision support queries against copies of data in data warehouses? The queries ran forever! Or when your DBA spent similar hours analyzing and fine-tuning the SQL queries themselves? The IBM DB2 Analytics Accelerator is a workload optimized, appliance add-on to DB2 for z/OS, that enables the integration of business insights into operational processes to drive winning strategies. It automatically accelerates select queries, with unprecedented response times.	Deepak Kohli **IBM – IMS Development**
14:00 – 14:45	**Free Form discussion among user group members**	**User group**
14:45 – 15:45	**Guardium Encryption and IMS** Are your compliance and security organizations constantly challenging you with a continuing onslaught of requirements to demonstrate how you protect your data on z/OS? A holistic data security strategy for IMS should include encryption of sensitive data at rest. This presentation will discuss how IBM InfoSphere Guardium Encryption provides ability to protect IMS at rest data. The presentation addresses various Methods of Encryption and Implementation. A summary of monitoring of IMS activities for regulatory compliance is included.	Dennis Eichelberger **IBM – Advanced Technical Solutions**
15:45 – 16:00	**Meeting Close**	Poonam Chitale **IBM Host**
