

IBM Information Management Software Services InfoSphere Information Server Version Upgrade Offering

implement your upgrade strategy. Our Upgrade services help you leverage your existing DataStage or Quality Stage investments to establish an Information Server version 8.X environment across your organization using standard practices techniques and methodologies.

Information Server Upgrade Assessment Services

The InfoSphere Information Server Upgrade Offering begins with an overall assessment by Information Management Services professionals of your existing DataStage or Quality Stage jobs. The intent of this assessment is to gain a joint understanding of the process and the effort required for upgrading. Specifically, a current job inventory and priority of jobs will be discussed. Upon the conclusion of the assessment, you will have an understanding of what it will take to complete your upgrade, cost, as well as recommendations for next steps to take to complete your upgrade.

Information Server Upgrade Implementation Services

Upon completing the Upgrade Assessment, the next step is to execute the Upgrade implementation. There are two different approaches that can be taken: Onsite or Offsite Upgrade Services.

- *Onsite Upgrade Services:*
Information Management Services

Highlights

- A seamless upgrade from one environment to another requires in-depth planning and testing
- Fully realize the benefits of your application on the latest version of IBM's InfoSphere Information Server
- Upgrade plan tailored for your environment
- Guidance through standard practices and test procedures to safeguard production system
- Learn valuable skills and gain hands on experience

InfoSphere Information Server Upgrade Offering Introduction

The benefits of upgrading to the latest version of Information Server 8.X are numerous; including performance benefits, expanded functionality, new and expanded transformation capabilities, and much more. Going through an upgrade for any software package can be a challenging and daunting task when it is gone about without support and guidance from the experts. With the InfoSphere Information Server Upgrade offering, IBM can simplify and streamline your approach allowing you to take advantage of the latest capabilities of Information Server as quickly as possible.

The InfoSphere Information Server Upgrade Offering can help you assess your upgrade needs and successfully

will come on site to your environment to install the latest version of InfoSphere Information Server, and complete the upgrade initiative. This approach includes all related testing activities and overall validation of your InfoSphere Information Server 8.X environment.

- *Offsite Upgrade Services:* You as the customer take responsibility to complete the upgrade in this scenario; however Information Management Services can be made available through our Virtual Services Implementation Services Desk available to provide remote guidance and best practices as you progress through the upgrade initiative.

IBM Information Management Services looks forward to working with you on determining and executing upon an approach to your upgrade initiative.
