Information Management, Analytics & Optimization Software Services
IBM DB2 for ECM Install Package

Install Package Deliverables

- *Prerequisite Environment Review and Checklist*

- *Sample Project Plan Provided*

- *System Configuration Document Deliverable*

What is a Package Offering?

Information Management Implementation Packages are fixed scope, fixed-priced services to help IBM clients ensure that they have a technically sound and functional system framework necessary for the successful development and deployment of their Information Management solution.

The **IBM DB2 for ECM Install Package** provides the expert resources to install DB2 software at your site to support an IBM FileNet P8 Content Manager ("P8 CM"), IBM Content Manager Enterprise Edition ("CM8"), or IBM Content Manager OnDemand for Multiplatforms environment.

The scope of this Install Package is limited to the install and base configuration of one instance of the limited use DB2 Workgroup Server Edition software as indicated in your ECM software license agreement.
