Information Management software

Information Management Software Services
Data Warehouse Solution Delivery Capabilities

Highlights

- *World Wide solution and industry delivery experience*
- *Demonstrated implementation methodologies and best practices*
- *Predefined offerings, workshops, and packages*

Organizations today face significant information challenges. Where is it? How do I get to it when I need it? What does it mean? What insight can I gain from it? Organizations that are unable to access reliable, consistent, and complete information in a timely manner could find the challenges of gaining or remaining competitive in today's marketplace insurmountable.

IBM offers the industry's most comprehensive set of data warehouse technology; providing you with the capabilities necessary to glean the maximum return from your most important investment - information! Additionally, IBM Industry Models deliver industry expertise and regulatory best practices in a form useable by both business and IT

communities to analyze the information in your data model, customized for your Industry.

Offerings and Capabilities Overview

IBM Information Management Services supporting Data Warehouse solutions provides a full lifecycle of design, integration and implementation capabilities based on years of diverse engagement experience with clients in all industries worldwide. By leveraging our vast set of best practices, methodologies, tools and proven architectures, we can enable you to achieve your goals more quickly and with decreased risk.

The success of our consultants is rooted in both their skills in producing valuable and timely deliverables as well as in their ability to transfer their knowledge to the your project team through mentoring activities. This two-pronged approach is key to making you successful in your data warehousing initiatives.

Offerings and capabilities include:
IBM Smart Analytics System Solution Installation Services
The IBM Smart Analytics System is a proven solution, based on thorough pre-integration testing and certification of the solution

elements. This solution also provides ongoing maintenance in the form of a healthcheck in the first year.

Infosphere Warehouse Healthcheck

A complete system review of your InfoSphere Warehouse environment to validate the health of your business intelligence products and systems.

InfoSphere Clinical Analytics Fast Start

InfoSphere Clinical Analytics (ICA) Fast Start is an integrated data warehouse platform that provides a single source of trusted administrative, clinical and research information across the healthcare enterprise to help improve operational efficiency and outcomes.

InfoSphere Warehouse SQL Warehousing (SQW) Fast Start

This service will help you start your first SQW project alongside expert consultants to install and configure the tool as well as mentor your staff.

Industry Models Quick Start Offering

Providing customers and partners with mentored, reduced cost, Industry Models implementation approach.

Your independence is our greatest success!

That is the underlying theme to our delivery approach for the data warehouse domain. We believe that transferring our knowledge to your organization is just as important as the successful implementation of your data warehouse project. This mentoring is a key component of every engagement and is designed to provide you with long-term self-sufficiency.

Engage Today

These days your organization requires more from your data warehouse environment to accommodate growth and to be able to capitalize on new market opportunities. The overall health of your data warehouse is a critical foundation to fully leveraging business intelligence solutions for ongoing customer insight. Thousands of customers leverage IBM IM Data Warehouse Services to ensure their data warehouse environment is soundly architected to meet the demands of the business and running efficiently to do so in a timely manner.

Our experts are ready to assist your organization with:

- Establishing project goals and expectations
