

Information Integration Lab Services

Accelerate your solution deployment

Highlights:

- Experience world-class implementation services for Information Integration solutions
- Leverage proven methodologies and standard practices to accelerate the deployment of Information Integration solutions
- Achieve improved business performance with trusted information

Today, as a new era of computing unfolds with an explosion in the volume, variety, and velocity of data, integrating trusted information is more important than ever to enable critical projects and key analytics initiatives.

Thousands of clients world-wide leverage IBM's Information Integration Lab Services to ensure their Information Integration solution is soundly architected and running efficiently in order to meet the demands of their business at the speed of their business.

Through years of product implementation successes, we have harvested the knowledge, standard practices, methodologies, tools and proven architecture to enable you to achieve your goals more quickly and with decreased risk.

Overview

The Information Management's Information Integration Lab Services team provides industry and technology expertise to maximize your investment on IBM's Information Integration technology portfolio. Deploying a solution to integrate and transform your data to deliver authoritative, consistent, timely and complete information, while governing its quality throughout its lifecycle can be a complex task. By engaging our team of experts when deploying your solution, we will ensure you do it right the first time, and will accelerate your return on investment.

Our Services team supports the entire InfoSphere Information Server, Federation and Replication Server product portfolio; a list of these products can be found at:

ibm.com/software/data/services/ii.html

Our experts

Our experienced Lab Services experts are skilled in helping clients optimize their information integration investments, and recognize that these are the key tools that connect their enterprise solutions.

Through our deep product and domain expertise we provide a framework that effectively maps out an enterprise information integration delivery strategy. Identifying, analyzing, translating, and moving existing data through our powerful tools to help our clients gain the competitive edge they seek.

The success of our experts relies on:

- Deep product and industry expertise
- Experience in architecting and developing enterprise-wide solutions in large and complex environments
- Ability to transfer their knowledge to your project team through mentoring activities

Our offerings

IBM's Information Integration Lab Services world-wide team provides services which allow our clients to better understand and govern one of their most important assets, their data.

With years of experience accompanied by flexible engagement models, our world-wide Lab Services team delivers world class solutions that achieve the goals set forth by our clients, in both an efficient and cost effective manner.

Some of our services include:

- Architecture & Information Governance Workshops
- Installation & Configuration of Data Integration, Data Lineage & Replication Solutions
- Data Quality Assessments
- Health Checks
- Upgrades
- Advisory & Implementation Support Services

Our team is committed to providing whatever level of services our clients require to achieve their business goals.

Your independence is our greatest success

We believe there is nothing more important than transferring our knowledge to your organization as an on-going effort in implementing Information Integration Solutions. Our goal is to provide you with long-term self-sufficiency through our mentoring and side-by-side partnering approach.

Engage today

With a world-wide team of highly trained professionals, the IBM Information Management Lab Services team can help build your solution with confidence while assuring that the business needs and expectations of your organization are met. Our experts are ready to assist your organization with:

- Establishing project goals and expectations
- Maximizing the return on your investment
- Reducing project delivery times, complexity and risk through the delivery of proven offerings
- Reducing total cost of ownership

Available for any delivery approach, the IBM Information Management Lab Services team will produce results quickly, and will help to put your project on the road to success.
