 - **Build Book Provided**
-

What is a Package Offering?

Information Management Implementation Packages are fixed-scope, fixed-priced services to help IBM clients ensure that they have a technically sound and functional system framework necessary for the successful development and deployment of their IM solution.

The MDM Server Blue Stack Install Package provides the expert resources to install the MDM Server - Blue Stack software at your site. It also provides hands-on assistance to address questions, recap key issues covered in formal training classes, and to confirm that your systems and resources are ready to begin applying the knowledge gained in class to your business needs and operational requirements.
