## Market Dynamics are Shifting

- As Data Professionals you know that ...
  - Data Warehousing and Business Analytics is now more strategic/mission critical
    - Need to support broader more intense users
    - Users require increased access to more data
    - Greater demand for high scalability, availability & performance
  - Business & IT being asked to do more with less
    - Need economies of scale / consolidation
  - Stronger focus on corporate regulatory compliance
    - Driving intense scrutiny of data security policies
  - Environmental concerns continue to be top of mind

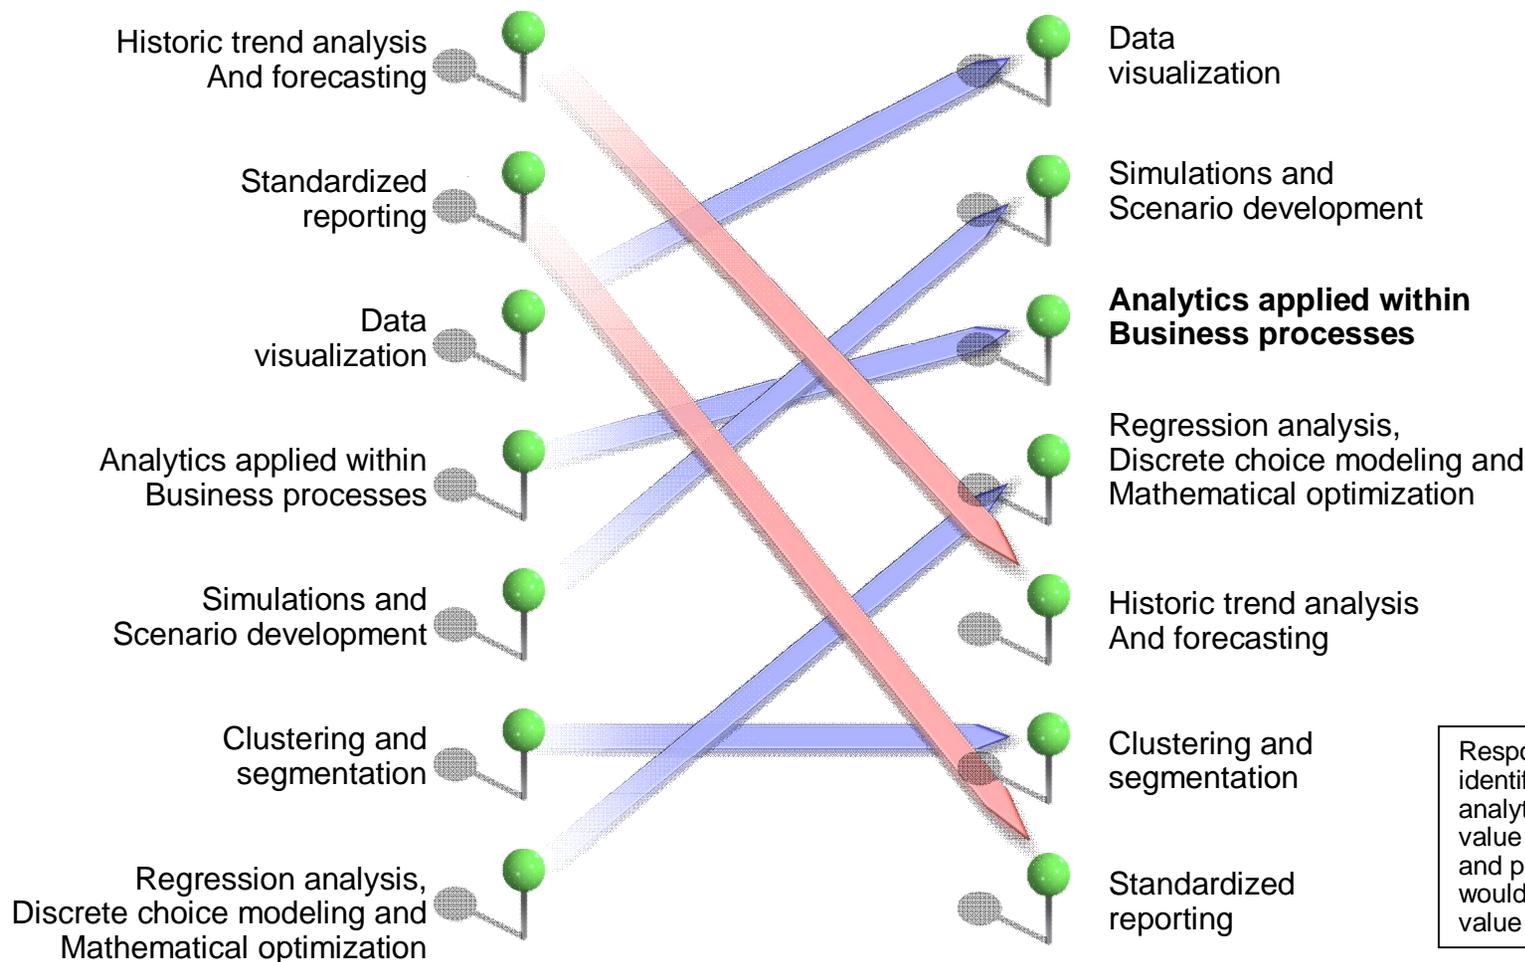

### IBM: 2009 CIO survey results

#### *CIOs select their ten most important visionary plan elements*

- 3/4 of CIOs anticipate moving to a strongly centralized, shared infrastructure to improve economies of scale
- 83% say Business Intelligence & Analytics is their top focus area

# What matters is changing

Results of New Intelligence Enterprise Survey of nearly 3,000 executives

Respondents were asked to identify the top three analytic techniques creating value for the organization and predict which three would be creating the most value in 24 months.

Source: MIT Sloan Management Review, 10 Data Points: Information and Analytics at Work, N Kruschwitz and R Shockley, Fall 2010

# All departments, all users, in all roles across the organization need access to business insights

Modern and Legacy Sources

# Today, many business users are not getting to the information they need, when they need it

**60%+** of CEOs need to do a better job capturing and understanding information rapidly in order to make swift business decisions

**47%** of users don't have confidence in their information

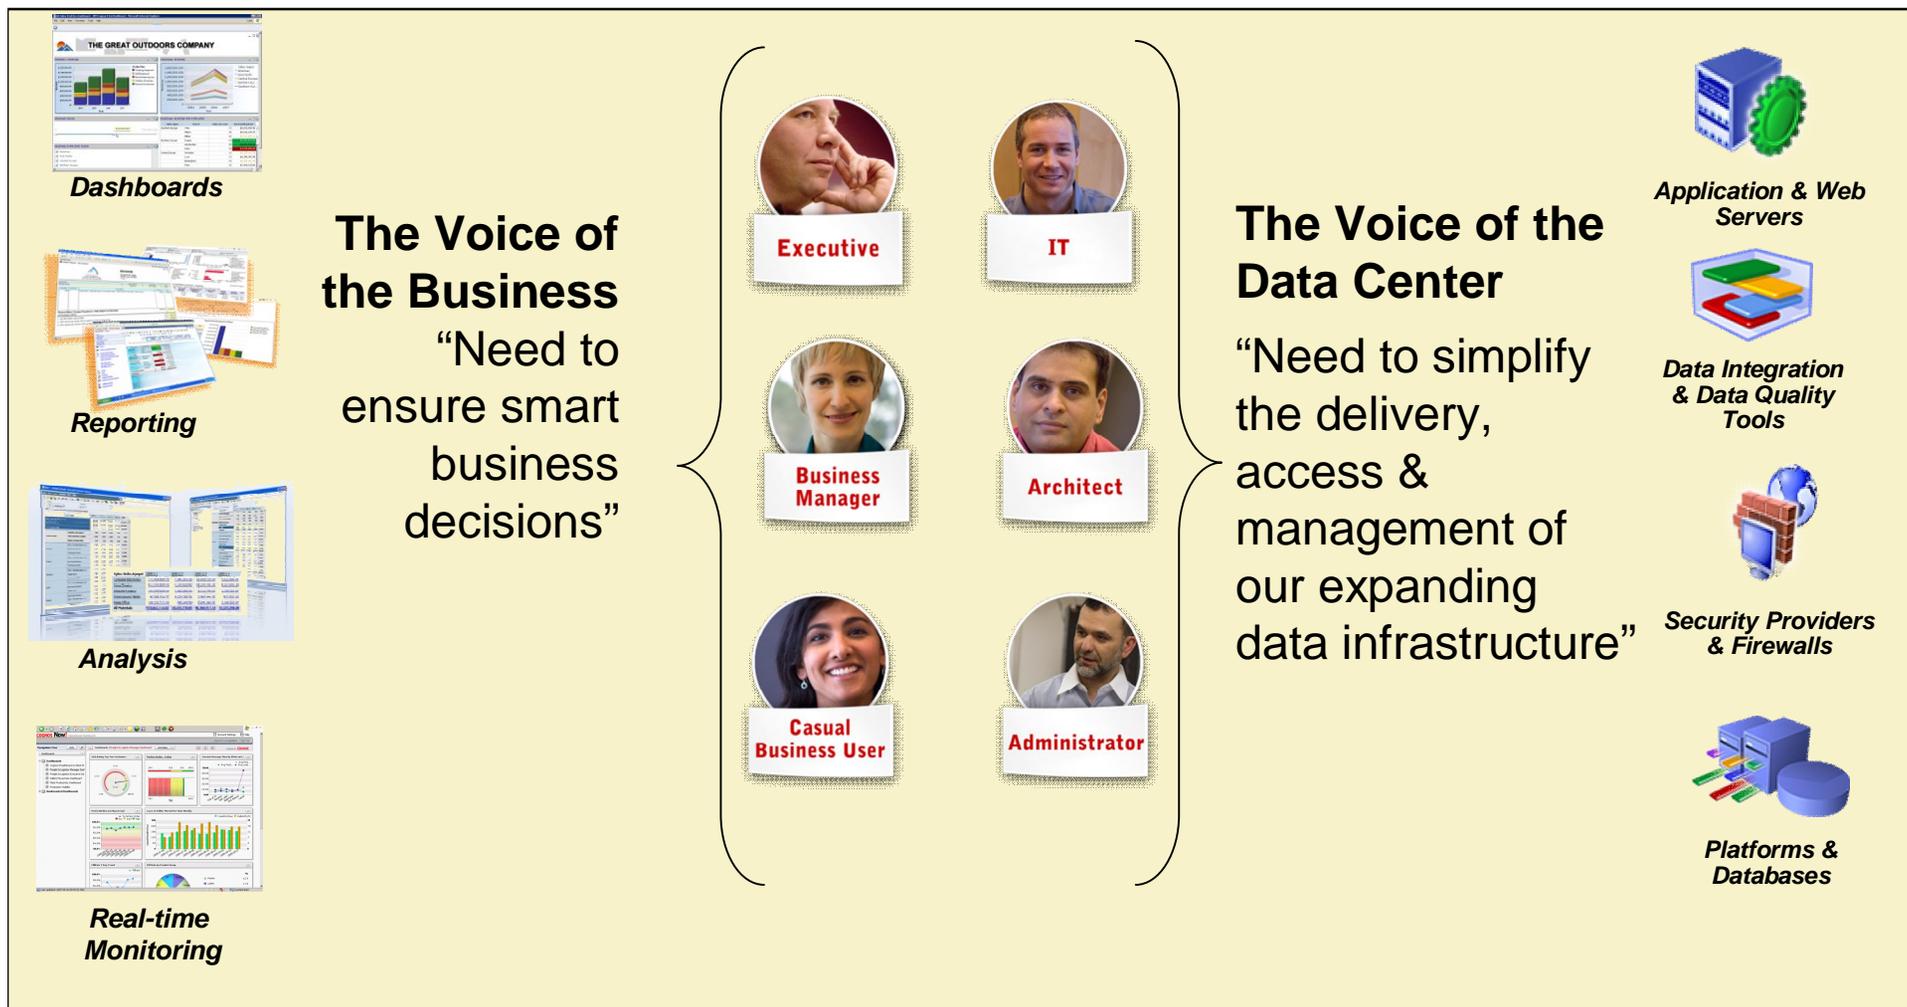

**59%** of users say that they miss information that might be of value to their jobs because they can not find it

**27%** of managers time is spend searching for information

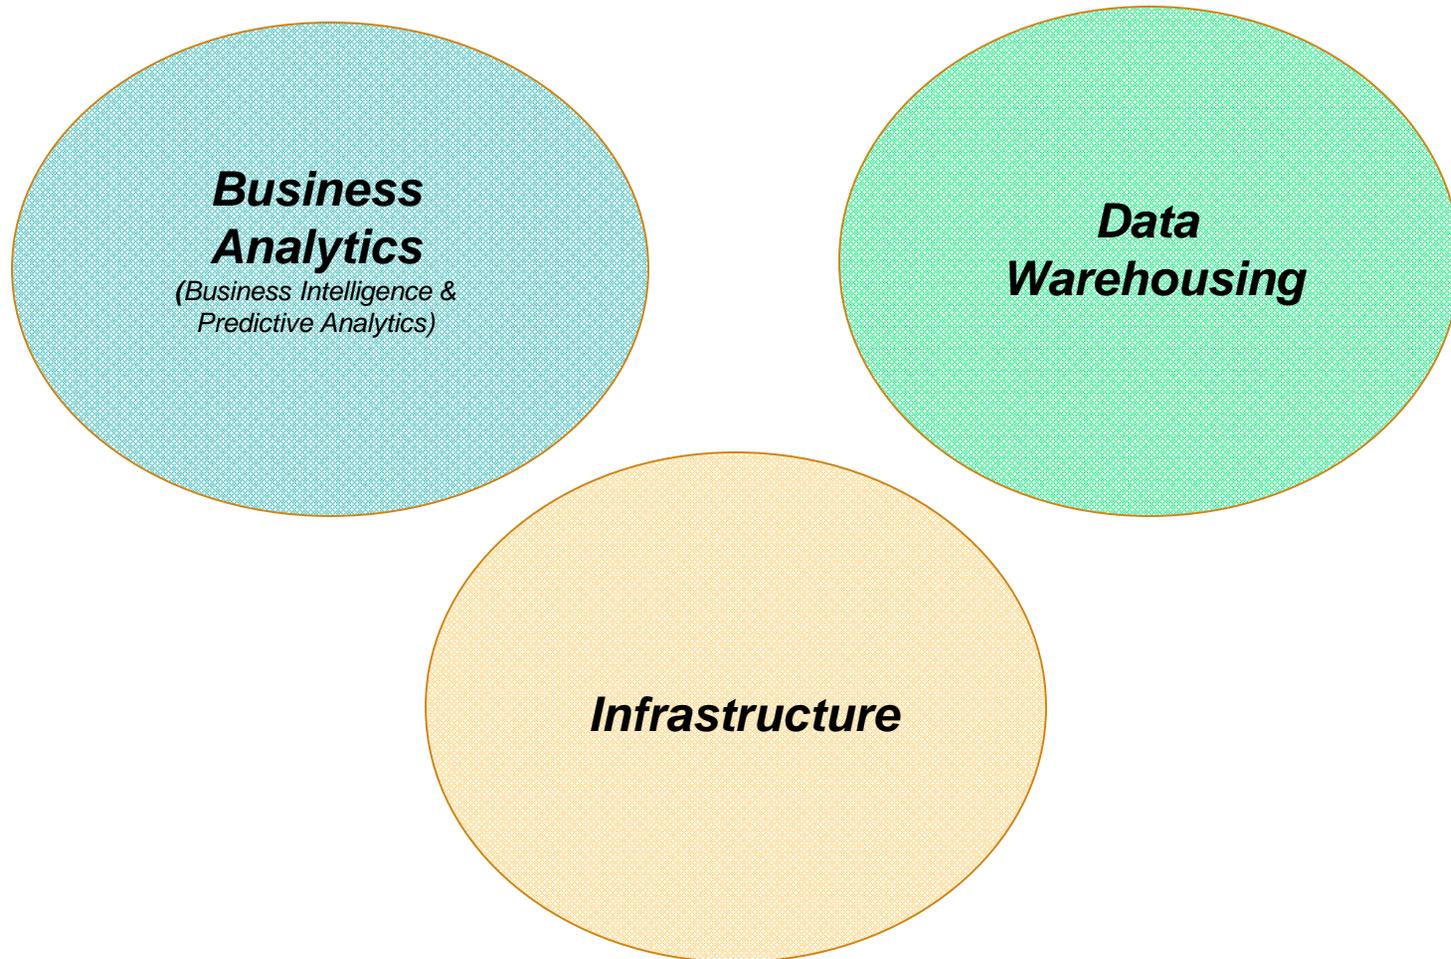

**50%** of the information they obtain has no value to them

*Sources: IBM & Industry Studies, Customer Interviews  
IBM CIO Survey, June 19, 2007  
Accenture survey, January 04, 2007*

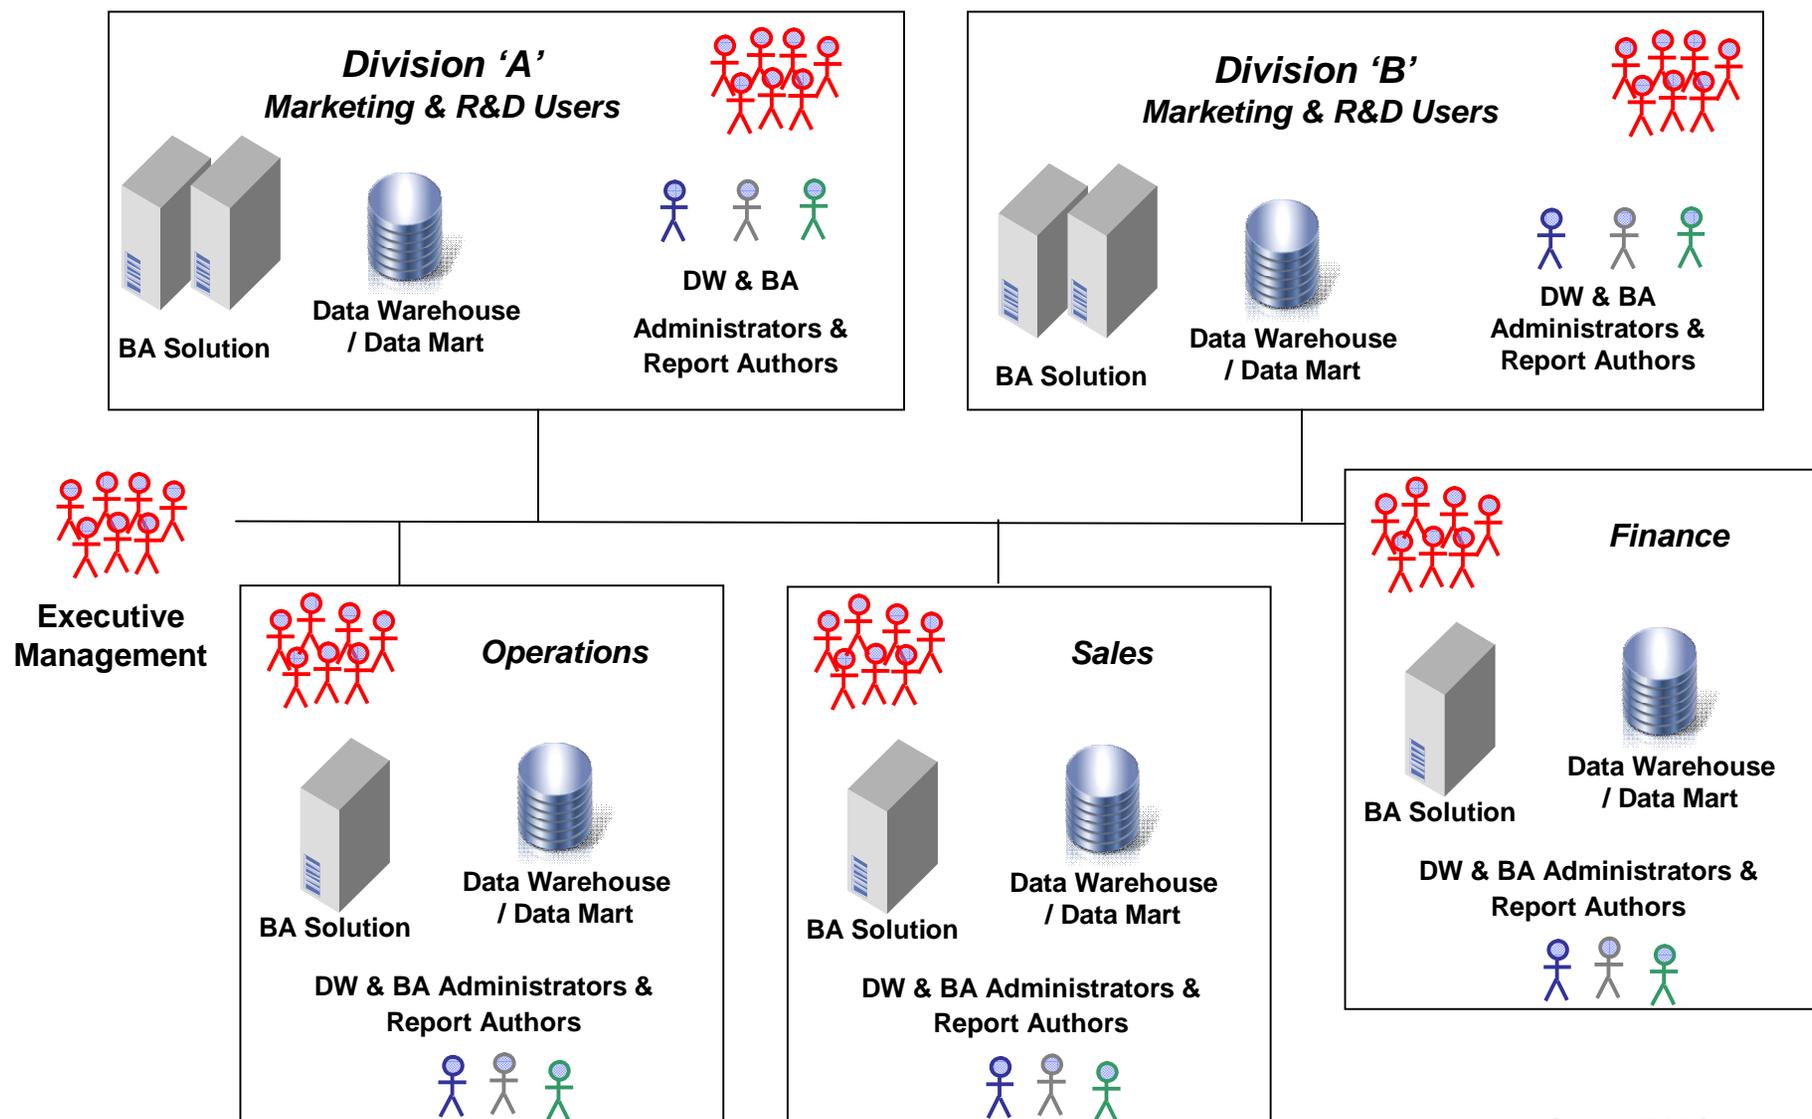

# Few are satisfied...

# Key components for Business Analytics success are being implemented & managed in isolation

# Today's Traditional Infrastructure – a siloed approach

## Business Analytic not keeping pace with changing business requirements

- Supporting multiple BA tools
- Disparate tools lack functionality users need access to more data
- Users need access to diverse types of data (transactional & historical)
- Infrastructure costs are a barrier to entry
- BA taking too long to deploy, access, and grow
- Information quality/security is in question

*Only 8.2% of the employees of a typical organization regularly use BI applications*

## Data Warehouses have become isolated

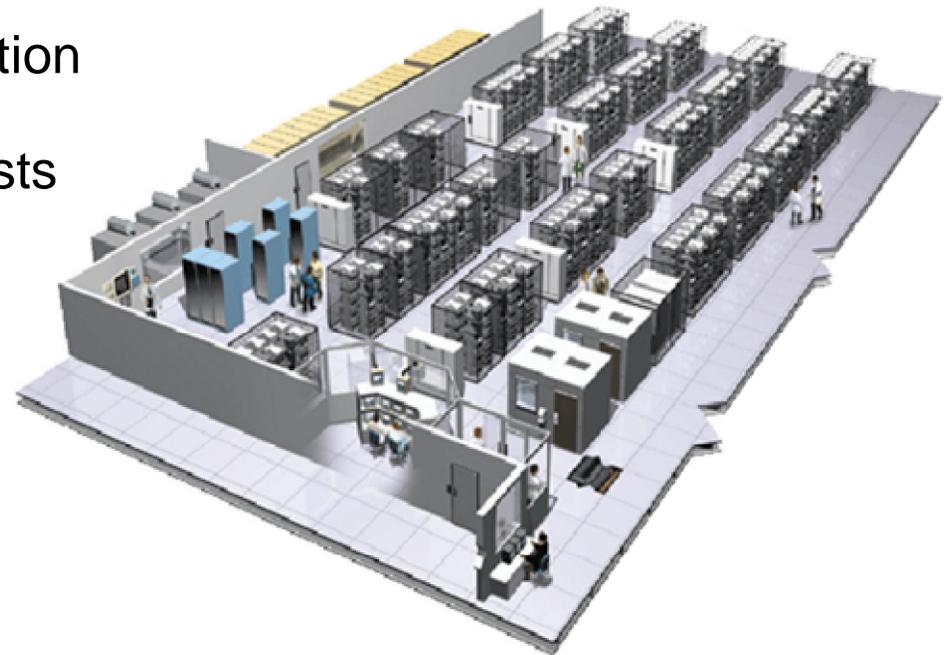

- Information to drive the business is known but not available to the decision makers
- Information in the DW is limited to a small number of people in the organization
- Little to no interactivity with other systems
- Not built with the same criteria as the operational systems
- Difficult to manage and maintain multiple servers and copies of the data
- Minimal control over who is accessing the data

*“Nearly 70% of data warehouses experience performance-constrained issues of various types.”*

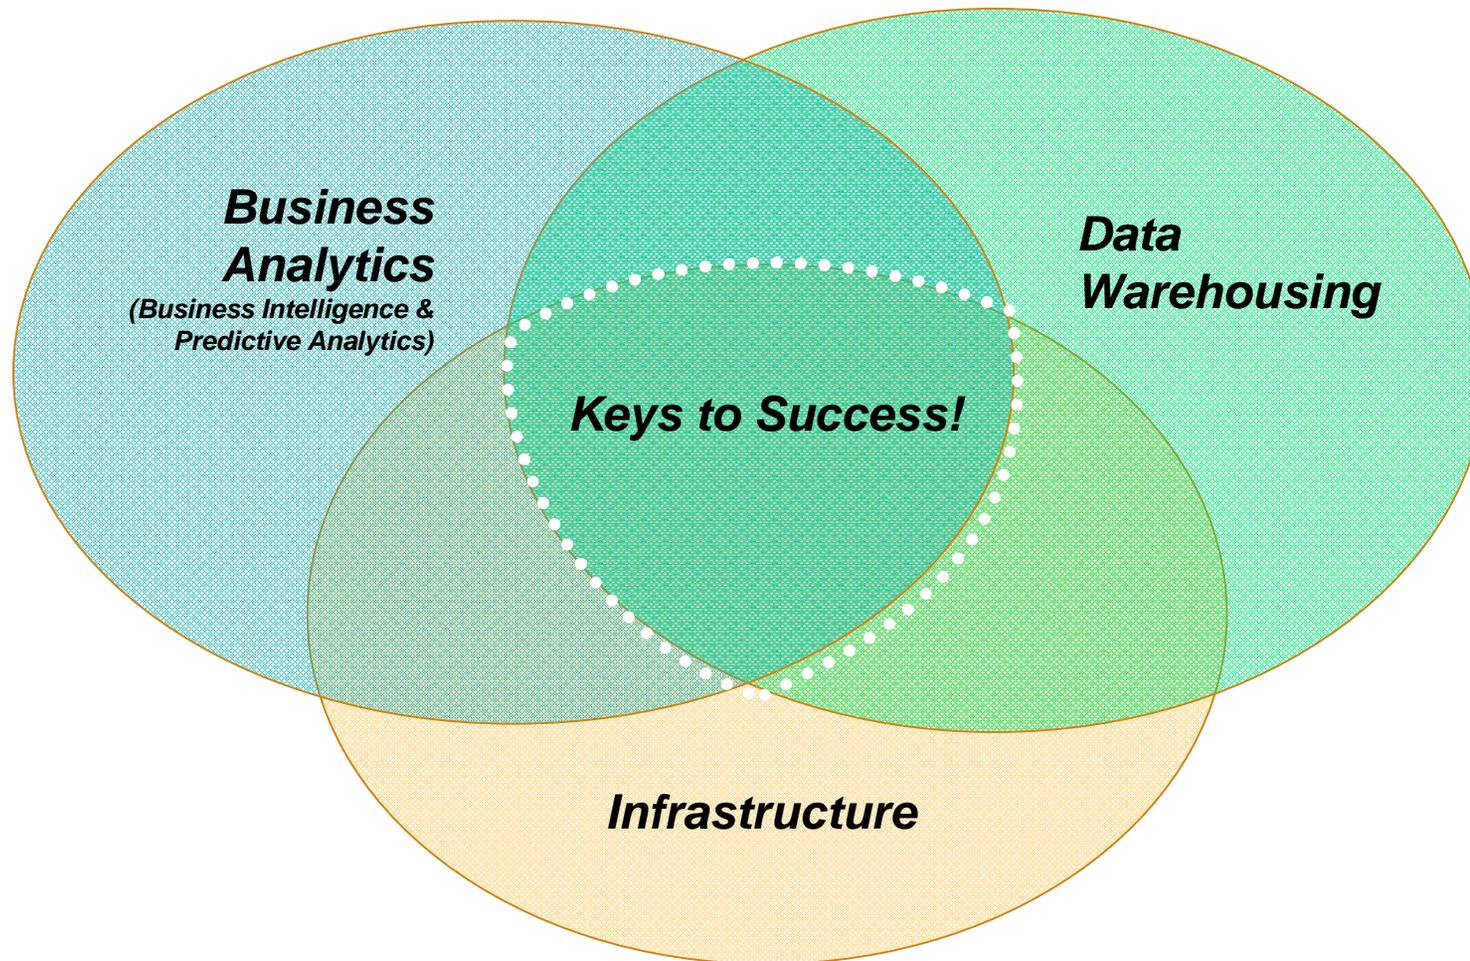

## Infrastructure complexity and cost on the rise

- Growing physical servers and network gear
- Excessive energy usage and heating problems
- Inadequate power and cooling infrastructure
- Data Silos and Data Synchronization
- Linear per processor software costs
- Linear Staffing Costs
- Frequent outages

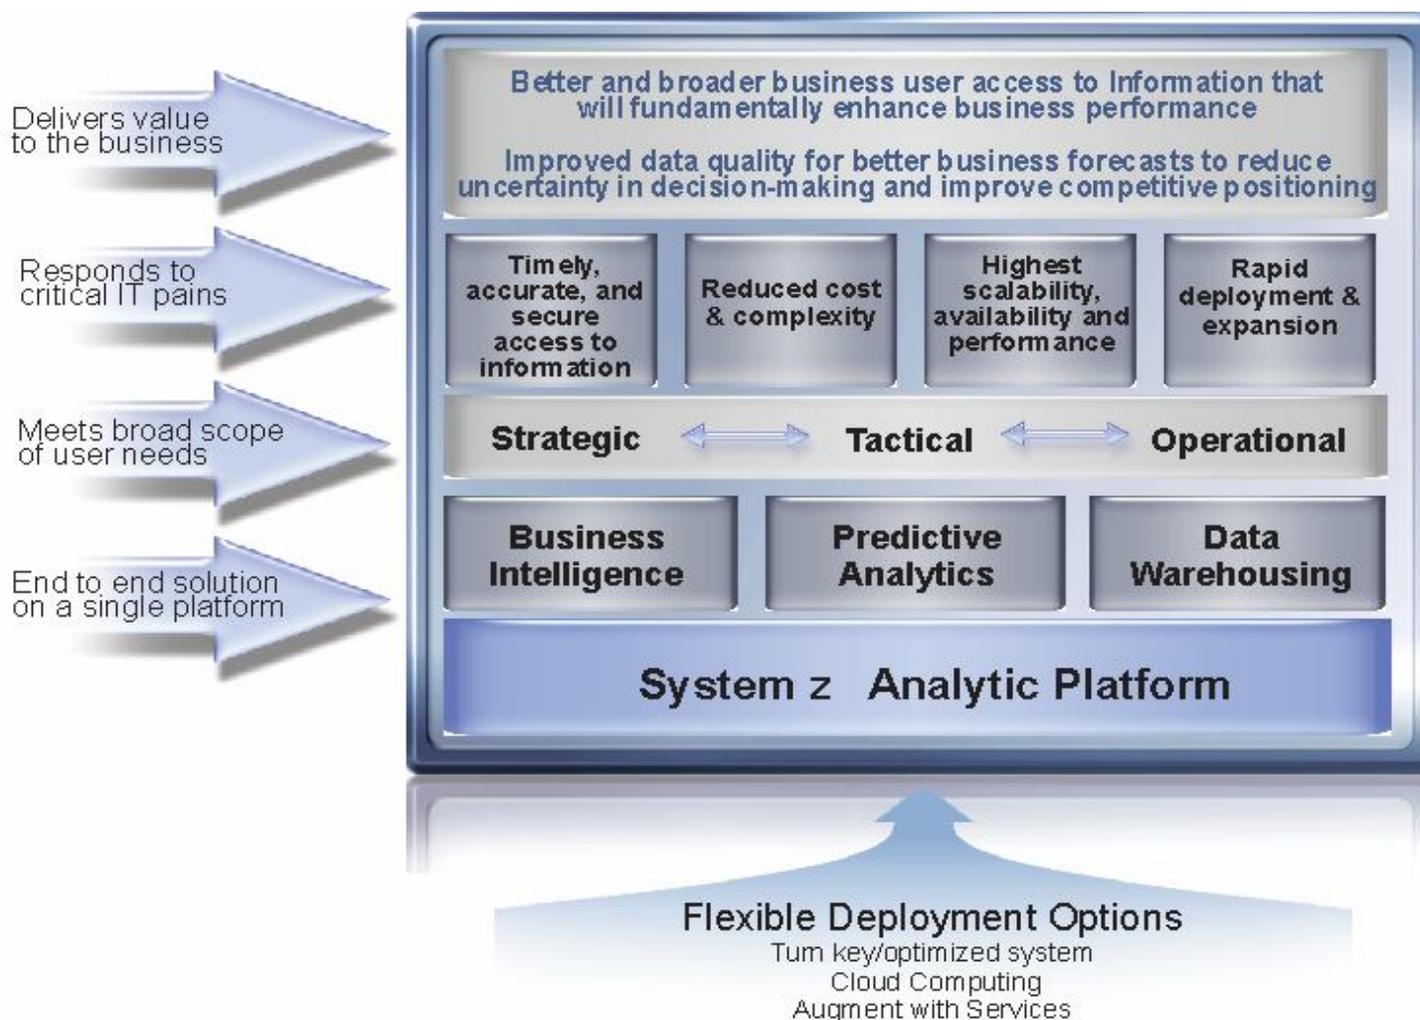

# A successful strategy requires the integration of all key components

## A new option ...

# IBM Business Analytics and Data Warehousing on System z

## Customers Select System z to Meet Critical Business Needs

**High business growth**

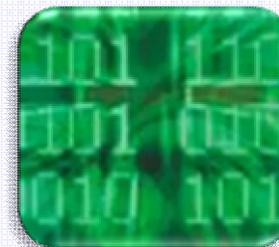

**HIGH SCALABILITY**

**Continuous business operations**

**HIGH AVAILABILITY & RELIABILITY**

**Flexibility and speed to respond**

**EXTREME VIRTUALIZATION**

**Reduce business risk**

**INDUSTRY LEADING SECURITY**

**Green strategy  
Energy and space**

**EFFICIENCY**

**Secure Cloud Services**

**CLOUD**

## Companies are recognizing mainframe cost savings

Based on an analysis of actual IT spend and business performance, comparing companies with greater than average mainframe mix vs. less than average mainframe mix...\*

44%

lower IT cost per credit card transaction

31%

lower IT cost per consumer loan

25%

lower IT cost per mega watt hour produced

24%

lower IT cost per hospital bed

20%

lower IT cost per airline passenger

26%

lower IT cost per new vehicle

25%

lower IT cost per retail store

23%

lower IT cost per barrel of oil

*"...in the long run the marketplace **rewards those that make the optimum use of the right computing resources in the right way** as evidenced by business performance"*

Dr. Howard Rubin, CEO and Founder, Rubin Worldwide

# The value of System z to an Enterprise BA & DW Initiative

## Timely, Accurate & Secure Access to Information

- ✓ Provides faster access to transactional data on System z through co-location
- ✓ Speeds up business decisions / faster access to broader, more detailed data
- ✓ Protects against unauthorized access to data
- ✓ Minimizes data duplication to increase user confidence in the data

## Reduced Cost & Complexity

- ✓ Reduces total cost of computing through consolidation/standardization
- ✓ Reduces complexity through a simple, flexible architecture
- ✓ Reduces administration cost up to 50%

## Highest Scalability, Availability & Performance

- ✓ Applies the industry's highest availability to mission critical business information
- ✓ Quickly implements cost effective disaster recovery
- ✓ Scales up to more users, out to more functionality and data
- ✓ Drastically improves query response times up to 1000X

## Rapid Deployment & Expansion

- ✓ Provides agility to align strategy with minimal expense and disruption to the business
- ✓ Offers a cost effective enterprise solution that can grow incrementally with growing business requirements
- ✓ Flexible deployment options to accommodate unique business needs

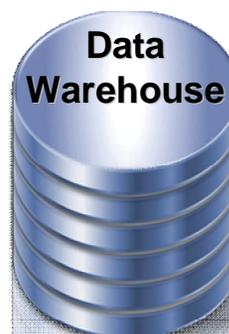

# End to end Business Analytics & Data Warehousing Solution on a single platform

➤ IBM System z

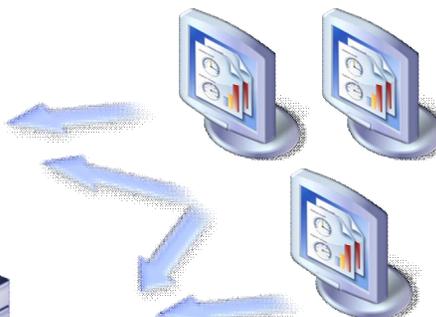

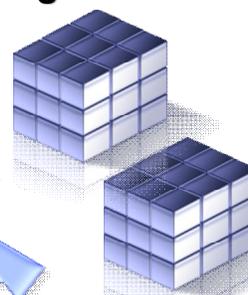

➤ InfoSphere Warehouse  
➤ Smart Analytics Optimizer

➤ Cognos BI  
➤ SPSS Predictive Analytics

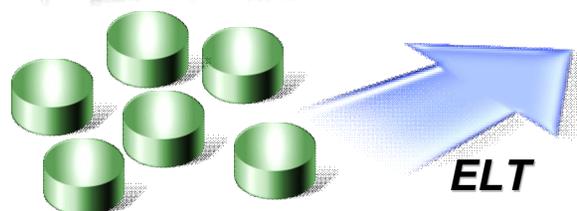

Cubing Services

Powercube Services

➤ DB2 for z/OS VUE  
➤ DB2 Utilities Suite

Operational Source Systems - Structured & Unstructured Data

# IBM Cognos Business Intelligence for Linux on System z

*Business  
Analytics*

## ■ Full range of BI capabilities

- Query, reporting, analysis, dashboarding, realtime monitoring

## ■ Delivers information where, when and how it is needed

- Self-service reporting and analysis
- Automated delivery of information in context
- Author once, consume anywhere

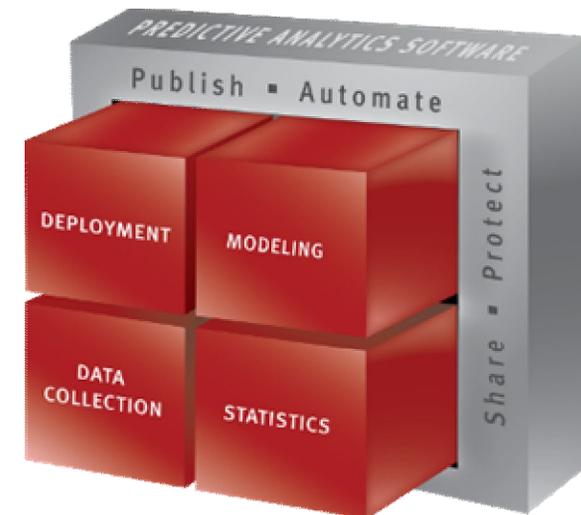

## ■ Purpose-built SOA platform

that fits client environments and scales easily

## IBM SPSS

- **Full breadth of predictive analytics**
  - Data collection, statistics, data mining, predictive modeling, deployment services...
- **Putting prediction in hands of the business**
  - Decision Management
- **Driving better business outcomes**
  - Attract and retain more profitable customers
  - Detect and prevent fraud
  - Improve resource allocation

***Business  
Analytics***

## IBM InfoSphere Warehouse

- Adds core DW and analytics capability to DB2 for z/OS
- Advanced physical database modeling and design
- In-database data movement and manipulation capabilities
- Multidimensional reporting and analysis of data with Cubing Services

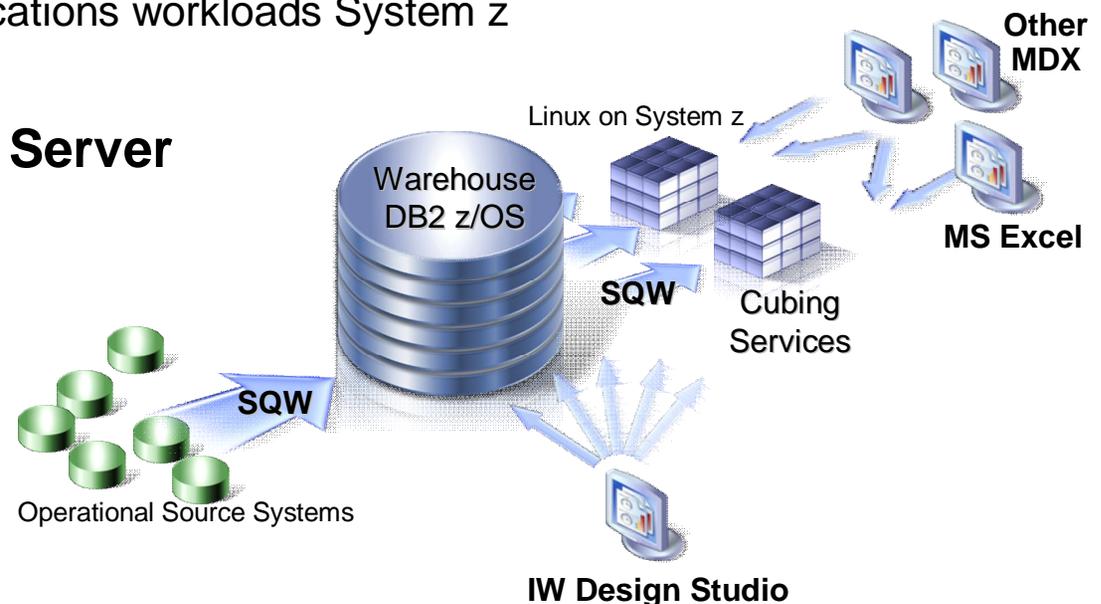

**Data  
Warehousing**

## IBM DB2 Value Unit Edition

- Offers the same robust DB2 for z/OS data server at a one-time charge price
- Available for eligible net new applications workloads System z

## IBM InfoSphere Information Server

- Profiles, cleanses and integrates information from heterogeneous sources to drive greater business insight faster, at lower cost

# IBM Smart Analytics Optimizer

*Capitalizing on the best of relational and columnar databases*

**Data  
Warehousing**

## What is it?

*The IBM Smart Analytics Optimizer is a workload optimized, appliance-like add-on that enables the integration of business insights into operational processes to drive winning strategies. It accelerates select queries, with unprecedented response times.*

## How is it different

- **Performance:** Unprecedented response times to enable 'train of thought' analyses frequently blocked by poor query performance.
- **Integration:** Connects to DB2 through deep integration, providing transparency to all applications.
- **Self-managed workloads:** queries are executed in the most efficient way
- **Transparency:** applications connected to DB2 are entirely unaware of the accelerator
- **Simplified administration:** appliance-like hands-free operations, eliminating many database tuning tasks

***Breakthrough Technology Enabling New Opportunities***

# IBM zEnterprise System

## A New Dimension in Computing

### Infrastructure

Unified management for a smarter system:  
zEnterprise Unified Resource Manager

The world's fastest and most scalable system:  
IBM zEnterprise™ 196  
(z196)

- Ideal for large scale data and transaction serving and mission critical applications
- Most efficient platform for Large-scale Linux® consolidation
- Leveraging a large portfolio of z/OS® and Linux on System z applications
- Capable of massive scale up, over 50 Billion Instructions per Second (BIPS)

- Unifies management of resources, extending IBM System z® qualities of service end-to-end across workloads
- Provides platform, hardware and workload management

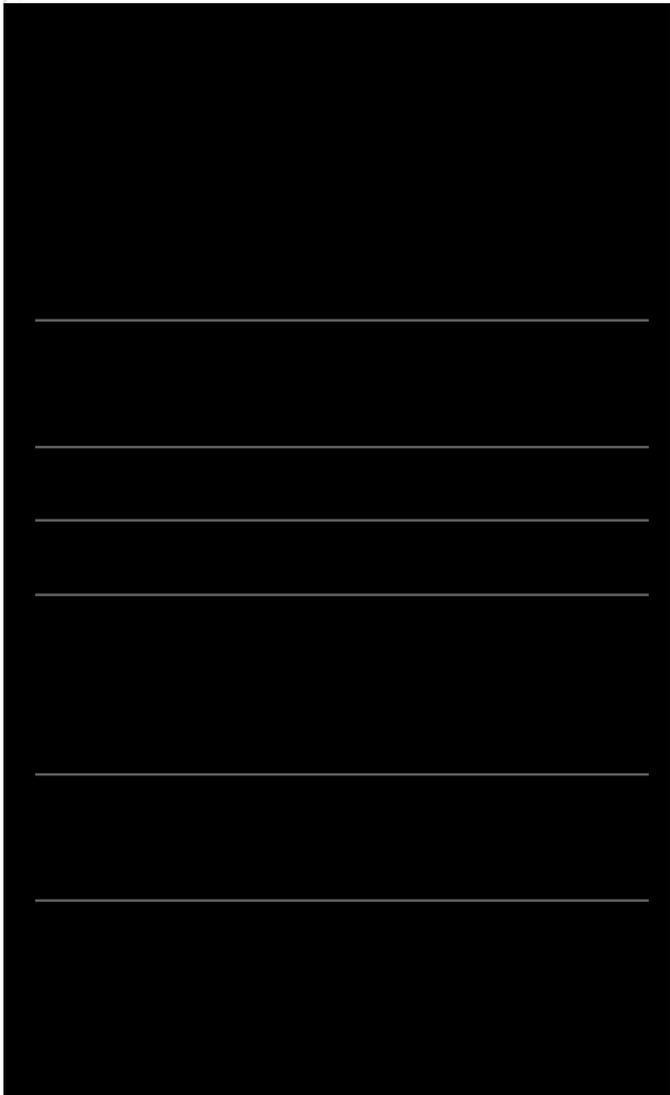

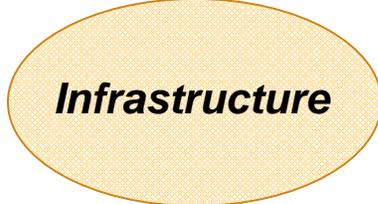

Scale out to a trillion instructions per second:  
IBM zEnterprise BladeCenter® Extension  
(zBX)

- Selected IBM POWER7® blades and IBM System x® Blades<sup>1</sup> for tens of thousands of AIX® and Linux applications
- High performance optimizers and appliances to accelerate time to insight and reduce cost
- Dedicated high performance private network

<sup>1</sup> All statements regarding IBM future direction and intent are subject to change or withdrawal without notice, and represents goals and objectives only.

**IBM zEnterprise 196: The heart of the new machine**  
*The industry's fastest and most scalable enterprise system*

Dramatic improvement over IBM System z10™:

**For Linux**

Up to **60%**

**Improvement in performance**

for **35%**

**Less cost**

**For z/OS**

Up to **40%**

**Improvement in performance**

with **60%**

**More capacity**

- **With no increase in energy consumption**
- **And even better performance with new software**

# IBM Smart Analytics System 9600

*Unprecedented Value in Deploying New Business Analytics*

*Flexible  
Deployment  
Options*

***An integrated solution of hardware, software and services that enables customers to rapidly deploy cost effective game changing analytics across their business.***

- ✓ Broad Analytic capabilities
- ✓ Powerful Warehouse capabilities
- ✓ Scalable & fully-integrated IBM hardware
- ✓ Set-up services & single point of premium support

## ***What it delivers***

- Pre-integrated end to end solution on a single platform
  - Reporting, Analysis, Dashboarding & Data Warehousing
- Reduced total cost of acquisition
  - Competitively priced solution
- Faster time to value
  - Delivered fully integrated/ready to go
- Improved performance
  - Pre-tested and optimized

***Delivers business results  
in days, not months***

# IBM Professional Services

## Accelerated Success

- New “how-to” books deliver expertise
  - BI Strategy Book
  - BI on Cloud
  - BI Redbook
- Workshops to help shape strategy
  - Champion workshops
  - Business Analytics experience
- Services & Training
  - Proven practice workshops, learning assessment and user adoption services
  - Broader portfolio of self-paced training options
- Growth in communities
  - Innovation Center
  - DeveloperWorks, C^3 Blog
  - Twitter, facebook and linked-in

## University of North Carolina Health Care

*Deploys a hybrid data warehouse solution combining the strengths of InfoSphere and DB2 software on System z and System p platforms*

*With the deployment of the Carolina Data Warehouse for Health, we have been able to increase the timeliness of the information available to our researchers, staff and physicians," "Because the system can also support general queries that relate to the diagnosis and treatment of a wide array of patients, we are now able to make more intelligent decisions leading to improved patient care."*

*Donald Spencer, MD, MBA,  
Associate Director of Medical Informatics, UNC Health Care*

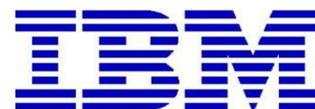

## Numius' Client Success Story

*Uses DB2 for z/OS and Cognos 8 BI for Linux on System z*

- ✓ Produced 400 reports in the same time as 1 report in the old environment
  - ✓ 400 reports ran in 45 minutes as opposed to 1 report in 46 minutes
  - ✓ Easily supported 130 concurrent users, as opposed to 8 on the source environment
- ✓ No reports timed out, not one user was rejected. Even when the system slowed down, it remained stable
- ✓ The client would not need to redesign his application to achieve his objective of reaching out to a large community
- ✓ This solution helps improve waste control in Belgium by informing producers, consumers and authorities faster and more thoroughly

*Jo Coutuer, Senior Business Intelligence Architect, Numius*

## **IBM Cognos BI Total Cost of Ownership Study**

*Explores the TCO of choosing an x86 based infrastructure vs. System z for a Cognos 8 BI deployment using proven IBM TCO measurement methodology*

- ✓ Average savings over 5 years of with a System z deployment: 36%
- ✓ Reduction in high availability costs with System z: 50%
- ✓ System administration savings alone pay for System z investment.

## Industry Analysts Agree

*“In short, I believe that **mainframes are the most modern platforms available in the commercial marketplace today.**”*

Source: Clabby Analytics, *Migrate From Mainframe? To What?*, Joe Clabby, June 24, 2010

*“Companies that buy into outdated hype about its complexity fail to realize the potential **performance gains associated with mainframe use.**”*

Source: Aberdeen Group, *The Fable of Mainframe Complexity*, Max Gladstone,  
May 5, 2010

*“Clients wishing to **evolve their legacy application portfolios into more-modern technologies and architectures can do so on the IBM mainframe.**”*

Source: Gartner, *Mainframe Modernization: When the Platform Is the Solution*,  
Dale Vecchio, 8 January 2010

*“The mainframe has long been recognized as a platform with an **enviable reputation for reliability, security, and efficiency**, Ovum considers that IBM by exploiting these characteristics has produced the next generation of data centre and cloud centre management platforms.”*

Source: Roy Illsley, Principal Analyst, Ovum

### Typical Utilization for Servers

Windows: 5-10%    Unix: 10-20%    **System z: 85-100%**

System z can help **reduce** your floor space up to **75%-85%** in the data center

# Thank You

*For additional information please visit*  
[www.ibm.com/software/data/businessintelligence/systemz/](http://www.ibm.com/software/data/businessintelligence/systemz/)

**System z** can lower your total cost of ownership, requiring **as little as 30%** of the power of a distributed server farm running equivalent workloads

The cost of storage is typically **three times more** in distributed environments

# IBM Product Portfolio

## Business Analytics and Data Warehousing on System z

### **Business Intelligence**

- Cognos 10 Business Intelligence

### **Predictive Analytics**

- SPSS Statistics 19
- SPSS Modeler
- SPSS Collaboration and Deployment Services

### **Data Warehousing**

- DB2 for z/OS VUE (Value Unit Edition)
- InfoSphere Warehouse
- Smart Analytics Optimizer

*\*Solution Edition for Data Warehousing (pricing option)*

### **Data Integration and Movement**

- InfoSphere Information Server
- InfoSphere Change Data Capture
- InfoSphere Replication
- InfoSphere Federation
- Global Name Recognition

### **Master Data Management**

- InfoSphere Master Data Management Server

### **InfoSphere Industry Models**

- Banking, Insurance, Retail, Telco, Health Payor, Health Provider, Financial Markets

### **Flexible Deployment Options**

- IBM Smart Analytics System 9600
- IBM Smart Analytics Cloud
- IBM Services

## Information protection & compliance on the System z platform

- Reduce number of security intrusion points by reducing the complexity of the architecture
- Secure data with cryptography, encryption, user identification, authentication at all levels
- Apply security capabilities rated the highest by government agencies
- Provide granular protection with column access control at the cell level
- Apply administrative authorities without allowing data access
- Use legendary built-in security and trace features for end-to-end auditing capabilities
- Define user access down to the cell level
