

IBM® **Information Management** software

Take Control with DB2 Express-C 9

Businesses thrive on information. You're doing business with more suppliers than ever. Sharing information is critical to achieving efficient order processing for your customers. Your suppliers have adopted industry-standard XML formats and service oriented architecture (SOA) interfaces. Chances are, your current database is having a hard time keeping up. DB2 9, with pureXML™ capabilities, is a perfect fit to streamline order processing and improve customer satisfaction to generate additional revenue.

The rapid adoption of XML for application integration and SOA is driving the need for innovative hybrid data servers. A **hybrid data server** is capable of managing the storage and retrieval of both XML and traditional data. Hybrid data servers are capable of powering the next-generation applications to reduce the time required to make effective business decisions.

DB2 Express-C 9 is:

- Free to develop, deploy, distribute: no limits, just data
- Take control of your XML
- Application development has never been this easy

Choose your programming language. DB2 Express-C 9 provides application drivers to create next generation applications using: C/C++, Java™, .NET, PHP, Perl and Ruby.

Integrate DB2 Express-C 9 into your development environment. DB2 Express-C 9 provides no-charge add-ins and tools for popular integrated development environments (IDEs) including: Microsoft® Visual Studio 2005 and Eclipse.

The new **DB2 Developer Workbench** is designed to save you time as a developer with comprehensive SQL, XQuery and stored procedure tools.

No limits, just data: Deploy solutions on Linux® or Microsoft Windows® systems (32-bit and 64-bit) with up to two processors and 4 GB of memory with no user or database size limitations.

Perhaps the most important benefit of DB2 Express-C 9 is the seamless path to deploy databases and applications to any DB2 data server. Applications built using DB2 Express-C 9 are easy to deploy using: DB2 Express 9, DB2 Workgroup 9 or DB2 Enterprise 9, with comprehensive support from IBM.

Free to develop, deploy and redistribute

Take the new DB2 Express-C 9 data server for a test-drive and discover how you can build better applications faster using the pureXML data server advantage from IBM. Join the growing DB2 Express-C 9 user community online and deliver innovative applications faster.
