Help mobile workers access the information and expertise needed to remain productive while on the go.

Easy to use. Easy to share.

The BlackBerry Client for IBM Lotus Connections v2.5 encourages users to participate in their enterprise social network.

Even more functionality at your fingertips

- Navigate between key IBM Lotus Connections components with ease
- Form a personal network of colleagues, and keep up to date with the activities of individuals in your network
- Set alert profiles to be notified of Top Updates

Simplified multi-tasking and usability

- Built as a BlackBerry application means faster access to information. There's no need to launch the browser and log in, and no time spent waiting for web pages to render
- Tight integration with core BlackBerry smartphone features and applications such as phone, email, tasks, contacts, and the camera. For example, easily call or email colleagues from Profiles, and convert emails to Activity Entries or To Dos

Rapid adoption with the "Tell A Friend" feature

- Users can send a download link, and invite team members and colleagues to download and install the BlackBerry Client for IBM Lotus Connections v2.5

Localized for use by regional teams

- Enables users to interact with their IBM Lotus Connections server in English, French, Italian, German, Spanish, and Brazilian Portuguese

Highly Secure and Manageable for IT

Organizations can leverage the existing BlackBerry® Enterprise Solution plus gain additional reporting and data optimization with the BlackBerry® Social Networking Application Proxy.

Information protection

- Existing permissions for IBM Lotus Connections are respected, and shared content is only available to those who have access
- The advanced security features of the BlackBerry® Enterprise Server employ high encryption standards to help protect intellectual property

Managed from the BlackBerry Enterprise Server

- IT can enable or disable the "Tell A Friend" feature, or wirelessly push the application to users
- Implement IT policies and set application permissions

BlackBerry Social Networking Application Proxy

- Designed to optimize the data sent from IBM Lotus Connections to BlackBerry smartphones for improved performance
- High Availability infrastructure enables deployment of multiple servers to increase capacity and ensure continued service in the event individual servers become unavailable
- Tracks which BlackBerry smartphones have accessed IBM Lotus Connections and displays the services used
