Overview | Agile Software Delivery | Embedded Agile | **Training and Services**

Ensure your agile success

Being agile can mean significant organizational change. Many Agile software development teams can increase their chances of success by taking along a trusted guide. Let IBM help.

We can help you implement Agile software development strategies to the unique needs of your project. IBM provides training and services that can help you avoid common adoption, implementation and expansion pitfalls:

- Training paths for product owner, team leads and team members
- Training classes from Scrum basics to advanced Disciplined Agile Delivery
- Quickstart tool services to help in automating your agile practice
- Coaching and mentoring services to improve your velocity and support your agile teams

Latest news

Sprint 0: An oxymoron, or necessary?
As software engineers, we are used to counting by starting with zero, but the practice of using iteration "0" as a starting point might subliminally encourage the delivery of zero value to your overall project. The average teams spends over 4 weeks in iteration/Sprint 0. Tools like Rational Team Concert, an Agile ALM, can drastically reduce the time teams spend on the geeky stuff. [Learn more >>](#)

Our tools help you plan, design, develop, and deliver better software and systems

Agile Development

- ✓ Task tracking
- ✓ Source control
- ✓ Agile planning

Rational Team Concert

Requirements

- ✓ Capture business needs
- ✓ Manage requirements

Rational Requirements Composer

Quality Testing

- ✓ Get products ship-ready
- ✓ Plan, execute, and report on testing

Rational Quality Manager

Design

- ✓ Collaborate on architecture and design
- ✓ Manage design change

Rational Software Architect
 Rational Rhapsody

Lifecycle management for the whole team

Our products combine seamlessly to improve collaboration across the lifecycle and can integrate with a wide range of

- Rational Collaborative Lifecycle Management
- Rational Systems and Software Engineering
