22 de Mayo – PoT IBM InfoSphere Guardium

Horario: 09:00 - 17:30
Lugar: IBM Client Center Technology Solutions
Brand: Information Management

Descripción:

The objective of the IBM InfoSphere Guardium PoT is to promote familiarity with its new and important features. This will be accomplished by working with up to 17 Lab exercises which will be in step-by-step workbook format. This gives clients a feel of how to use Guardium to safeguard critical enterprise information, to reduce operational costs by automating compliance processes, to simplify governance with centralized policies for heterogeneous infrastructures and to continuously monitor access changes to high-value databases. Some Labs will be optional and some will be read only. Each of the 17 Labs will focus on a specific Guardium feature.

Agenda:

Welcome and Introduction
Lecture and Overview
Lab Exercises 1-5 (each lab will be preceded by slide presentation for that topic)
- Database Auto Discovery
- Sensitive Data Finder
- Entitlement Reports
- Guardium Client installation
